

Department of Bioanalytical Sciences
Ramnarain Ruia Autonomous College, Mumbai
Announces

Certificate Course in Pharmacovigilance

Pharmacovigilance is the science relating to the detection, assessment, understanding and prevention of adverse effects, particularly long term and short term side effects of medicines. It is a scientific discipline that is primarily concerned with reporting and analyzing of drug side effects.

At present, India is the fourth largest producer of pharmaceuticals in the world and therefore is a surfeit of drug brands with more than 6,000 licensed drug manufacturers and over 60,000 branded formulations. Pharmacovigilance professionals continuously monitor the safety of the drugs in clinical trials as well as the drugs already being sold in the market. Pharmacovigilance is therefore a great career option for life science and pharmacy graduates.

Salient Features:

- *Job oriented course*
- *Eminent experts from leading pharmaceutical industry as resource persons*
- *Limited Batch Size*
- *Placement assistance will be provided.*
