

Resolution number: AC/I(21-22).2(II). RUS1

**S. P. Mandali's**

**Ramnarain Ruia Autonomous College**

(Affiliated to University of Mumbai)

**Syllabus for:**

**Program: M.Sc. in Bioanalytical  
Sciences**

**(Undergraduate syllabus)**

**Program Code: RUSBAS**

**(Choice Based Credit System for the academic year 2022-  
23)**

## GRADUATE ATTRIBUTES

<b>GA</b>	<b>GA Description</b>
	<b>A student completing Bachelor's Degree in Science program will be able to:</b>
<b>GA 1</b>	Recall and explain acquired scientific knowledge in a comprehensive manner and apply the skills acquired in their chosen discipline. Interpret scientific ideas and relate its interconnectedness to various fields in science.
<b>GA2</b>	Evaluate scientific ideas critically, analyse problems, explore options for practical demonstrations, illustrate work plans and execute them, organise data and draw inferences.
<b>GA 3</b>	Explore and evaluate digital information and use it for knowledge upgradation. Apply relevant information so gathered for analysis and communication using appropriate digital tools.
<b>GA4</b>	Ask relevant questions, understand scientific relevance, hypothesize a scientific problem, construct and execute a project plan and analyse results.
<b>GA 5</b>	Take complex challenges, work responsibly and independently, as well as in cohesion with a team for completion of a task. Communicate effectively, convincingly and in an articulate manner.
<b>GA 6</b>	Apply scientific information with sensitivity to values of different cultural groups. Disseminate scientific knowledge effectively for upliftment of the society.
<b>GA 7</b>	Follow ethical practices at work place and be unbiased and critical in interpretation of scientific data. Understand the environmental issues and explore sustainable solutions for it.

<b>GA 8</b>	Keep abreast with current scientific developments in the specific discipline and adapt to technological advancements for better application of scientific knowledge as a lifelong learner.
-------------	--

Ramnarain Ruia Autonomous College

## PROGRAM OUTCOMES

<b>PO</b>	<b>Description</b>
<b>PO 1</b>	A student completing Bachelor's Degree in Science program in the subject of Bioanalytical Sciences will be able to:  This course will impart high quality science education in a vibrant academic ambience with the faculty of distinguished teachers and scientists.
<b>PO 2</b>	It will also equip students for the future who will take up the challenge of doing quality research and teaching and also contribute to industrial production and R & D in the fields of Bioanalysis, Bioinformatics and Nutraceutical Sciences.
<b>PO 3</b>	It will amalgamate classical analytical chemical techniques with modern genomic and proteomic technologies of manufacturing and analysis to better characterize the products useful as medicines as well as nutraceuticals.

**Course Code: RUSBAS101**  
**Course Title: Biological Sciences I**  
**Academic Year 2022-23**  
**F.Y.B.Sc.**

**COURSE OUTCOMES:**

COURSE OUTCOME	DESCRIPTION
<b>CO 1</b>	Students should realize the importance of type specimens and in-vivo models in Biological research.
<b>CO 2</b>	Students will understand basic concepts of microbiology. They should be able to successfully understand the significance and perform aseptic transfer techniques.
<b>CO 3</b>	Students should learn the operation of simple light microscope.
<b>CO 4</b>	Student will know the significance of studying plant and animal anatomy and the functions of specialized cells present in them.

Paper Code	Semester I	lectures
<b>RUSBAS101</b>	<b>Biological Sciences I</b>	<b>45</b>
<b>101.1 Plant Diversity &amp; Bioprospecting</b>		<b>15</b>
<b>Plant Diversity &amp; Conservation</b> Identification, authentication and anatomical characterization of plants Cultivation of plants Physiological and Biochemical processes in plants - seed germination and photosynthesis Storage compounds in plants Commercial applications and plant bioprospecting		
<b>101.2 Introduction to Animal Anatomy and Physiology</b>		<b>15</b>
Importance of animal anatomy- Cell differentiation, Specialized cells of Animals Tissue and Tissue systems in Animals, Classification of Animal tissues. Animal models in drug research: Significance of Zebra Fish, Mice, Guinea Pig, Non-human primates, Ethical considerations for use of animals in research. Research involving human subjects <i>Homo sapiens sapiens as type specimen</i> Marine bioprospecting		

<p><b>Animal systems:</b> Respiratory System, Digestive System, Excretory System, Nervous System, Reproductive System,</p>	
<p><b>101.3 Microbes &amp; microbial bioprospecting</b></p>	<b>15</b>
<p>Types of Microorganisms- Bacteria, Viruses, Protozoa, Algae, Fungi Significance and Scope of Microbiology, Significance of <i>E. coli</i>, Yeast &amp; <i>Neurospora crassa</i> as type specimens Microbial prospecting Commercial applications of microorganisms with suitable examples: Pharmaceutical industry: Vaccine production, Antibiotic production(amoxicillin, tetracycline, ciprofloxacin), Food and Dairy Industries. Applications of microorganisms in sustainable development</p>

**Course Title: Biological Sciences II**  
**Academic Year 2022-23**  
**F.Y.B.Sc.**

**COURSE OUTCOMES:**

COURSE OUTCOME	DESCRIPTION
<b>CO 1</b>	Students will appreciate versatility and dynamic nature of carbon.
<b>CO 2</b>	Students should be able to draw the correct structures of biomolecules and understand structure-function and correlation.
<b>CO 3</b>	They should be able to schematically represent and explain various physiological processes in plants and animals.

Paper Code	Semester I	lectures
<b>RUSBAS102</b>	<b>Biological Sciences II</b>	<b>45</b>
<b>102.1 Biochemical Basis of Life and Carbohydrates</b>		
<p><b>Introduction to Biomolecules</b></p> <p>Overview of chemical and physical attributes of Biomolecules, Classification of Biomolecules, Significance of Biomolecules in nature and science.</p> <p><b>Carbohydrates</b></p> <p>Classification of carbohydrates                      Structure, structure properties, Isomerism, derivatives, functions &amp; reactions of Monosaccharides, Oligosaccharides, Homopolysaccharides (Starch, Inulin, Glycogen, Cellulose), Heteropolysaccharides</p>		
<b>102.2 Proteins&amp; Nucleic Acids</b>		<b>15</b>
<p><b>Amino acids &amp; Proteins</b></p> <p>Structure, classification, physical and chemical properties, levels of structural organization of Proteins, Introduction to Ramachandran plot.</p> <p><b>Nucleic Acids</b></p>		

Chemistry of nucleic acids, nucleosides, nucleotides, Structure and properties of DNA, stability of nucleic acid structures, Chargaff's rules, Watson and Crick model, Confirmations of DNA-A, B, Z forms of DNA, Structure, function and types of RNA	
<b>102.3 Lipids, Vitamins &amp; Interconversion of Biomolecules</b>	<b>15</b>
<p><b>Lipids</b> Classification of fatty acids and lipids, Physical and Chemical properties, Functions of fatty acids, glycolipids, phospholipids, Structure and function of Cholesterol, <b>Vitamins:</b> Storage and Occurrence, Structure, properties, Recommended dietary allowance, Deficiency and treatment. Interconversion of Biomolecules.</p>	
<b>RUSBASP101 PRACTICALS</b>	
<ol style="list-style-type: none"> <li>1. Cleaning, Sterilization of glassware</li> <li>2. Various types of Media preparation for Microbial growth</li> <li>3. Aseptic Transfer</li> <li>4. Isolation of bacteria</li> <li>5. Study of colony characteristics</li> <li>6. Morphological characteristics -Staining techniques: Monochrome Staining, Gram staining, Fungal Staining</li> <li>7. Visualization of Microorganisms: Simple and Compound Microscopy</li> <li>8. Qualitative analysis of Biomolecules- Carbohydrates, Proteins, Nucleic Acids, Lipids</li> </ol>

**Course Code: RUSBAS103**  
**Course Title: Chemical Sciences I**  
**Academic Year 2022-23**  
**F.Y.B.Sc.**

**COURSE OUTCOMES:**

COURSE OUTCOME	DESCRIPTION
CO 1	Students should be able to prepare buffers and operate pH meter.
CO 2	Students should accurately name and identify aromatic compounds.
CO 3	Students should understand the concepts of molecular bonding.

Paper Code	Semester I	lectures
RUSBAS103	Chemical Sciences I	45
<b>103.1 Introduction to Molecular Bonding</b>		<b>15</b>
<p>Concept of atoms and molecules and atomic structure orbitals</p> <p>Concept of electronic configuration-Pauli's exclusion principle, Hund's rule, Aufbau principle</p> <p>Types of bonds and bonding, Chemical bonding theory, Valence-Bond theory and Molecular orbital theory, Concept of hybridization and its types(change)</p> <p>Molecular orbital theory for polyatomic species:</p> <p>I) BeH<sub>2</sub> II) H<sub>2</sub>O III) NH<sub>3</sub> IV) CH<sub>4</sub>(New)</p> <p>Polar covalent bonds and Electronegativity, Drawing chemical structures (Based on Lewies dot structure), Molecular models</p>		
<b>103.2 IUPAC Nomenclature and Aromaticity</b>		<b>15</b>
<p><b>IUPAC:</b> Rules of IUPAC nomenclature, IUPAC nomenclature of basic functional groups, aliphatic poly functional compounds, including monocyclic compounds on the basis of IUPAC priority order. (Line formulae expected) IUPAC nomenclature of Spiro, Biphenyls, Bicyclic compounds, SMILES Notation</p> <p><b>Aromaticity:</b> Characteristic properties of aromatic compounds, Huckel's rule, Aromaticity and anti-aromaticity, Resonance energy, Aromatic hydrocarbons: Benzenoid &amp; Nonbenzenoid compounds (benzene, naphthalene, anthracene, phenanthrene, cyclopropenium, cyclopentadienyl, cycloheptatrieniumcation)</p>		

<b>103.3 Ionic Equilibrium, pH and Buffers</b>	<b>15</b>
<p>Acid- Base concept, Hard and soft acid and base (<i>HSAB</i>), Concept of pH, pKa, pKw, Isoelectric pH, Buffer, Buffering Capacity, Relation between pI, pKa1 and pKa2 for a neutral, acidic and basic amino acid.</p> <p>Ionic product of water, Activity coefficient, Solubility, Complex formation and organic complexes, Oxidation and reduction equilibria, Hydrolysis of salts and Solubility product</p> <p>Derivations: Ostwald's Dilution Law, Hendersen–Hasselbalch equation,</p> <p>Physiological Buffers: Preparation, properties and uses of Carbonate-Bicarbonate, Phosphate, and Citrate buffers</p> <p>Preparation and Numericals based on pH and Buffer</p>

**Course Code: RUSBAS104**  
**Course Title: Chemical Sciences II**  
**Academic Year 2022-23**  
**F.Y.B.Sc.**

**COURSE OUTCOMES:**

COURSE OUTCOME	DESCRIPTION
CO 1	Students should analyze conductometric, pH metric and acid-base titration curves to predict the chemical nature of titrant and titrate. They should realize the importance of calibration in science.
CO 2	Students should be able to demonstrate mechanisms of organic reactions and identify the similarities between organic and biochemical reactions

Paper Code	Semester I	lectures
RUSBAS104	Chemical Sciences II	45
<b>104.1 Stoichiometry and Preparation of Standard Solutions, Titrimetric analysis</b>		<b>15</b>
<p>Methods of expressing concentration of solutions-molarity, normality, molality, mole fraction, % calculations (w/w, v/v, w/v) dilution of solutions, concept of milliequivalents, millimols, ppm and ppb, ppt &amp; Femtomoles levels interconversion between different concentration units to (% to ppm, % to molar, % to mg/mL, PPM to mg/ mL, etc.)</p> <p>Primary and secondary standards, Preparation of standard solutions, Calculation of concentration of commercial samples of acids and bases, Use of computers in chemical calculations.</p> <p>Requirements for a reaction to be used in titrimetric analysis, classification of titrimetric analysis, Terms: titration, titrand, titrant, titre value, indicator, endpoint, equivalence point, titration error.</p> <p>Principles of acid-base, oxidation–reduction, complexometric titrations, and precipitation titration with suitable examples.</p> <p>Karl-Fischer Titration</p>		

<b>104.2 Sampling &amp; Treatment of Analytical Data</b>	<b>15</b>
<p>Types of errors, determinate and indeterminate errors, minimization of errors, constant and proportionate errors, accuracy and precision, measures of dispersion and central tendency: mean, median, average deviation, relative average deviation, standard deviation, variance, coefficient of variation. [Numerical problems expected]</p> <p>Sensitivity, limit of Detection, Detection Power</p> <p>Terms involved, importance of sampling, sampling techniques, sampling of gases, ambient and stack sampling, equipment used, sampling of homogeneous and heterogeneous liquids, sampling of static and flowing liquids, methods and equipments used, sampling of solids, importance of particle size and sample size, samples used, need for the reduction in the sample size, methods of reduction in sample size, collection, preservation and dissolution of the sample</p> <p>Summary of experimental methods currently available for analysis : History and development.</p>	
<b>104.3 Introduction to Good Laboratory Practices and Safety in Laboratory</b>	<b>15</b>
<ol style="list-style-type: none"> <li>1. General Lab safety rules, laboratory hygiene</li> <li>2. Introduction to Good Lab Practices</li> <li>3. Introduction to Standard Operating Procedure (SOP)</li> <li>4. Importance of calibration of instruments with any two examples</li> <li>5. Importance of documentation in laboratory</li> </ol>	
<b>RUSBASP102 PRACTICALS</b>	
<ol style="list-style-type: none"> <li>1. Calibration of glassware: Burette, Pipette, Standard Flask</li> <li>2. Stoichiometric calculations and preparation of primary and secondary standard solutions.</li> <li>3. Volumetric analysis (Calculation of % error expected)                         <ol style="list-style-type: none"> <li>a) Acid – Base titration</li> <li>b) Estimation of Iron using Internal Indicator</li> <li>c) Estimation of Vitamin C from various samples</li> <li>d) Estimation of Total Hardness</li> <li>e) Estimation of iodine in iodised common salt using iodometry.</li> </ol> </li> </ol>

-----------------------------	---

**Course Code: RUSBAS105**  
**Course Title: Mathematics**  
**Academic Year 2022-23**  
**F.Y.B.Sc.**

**COURSE OUTCOMES:**

COURSE OUTCOME	DESCRIPTION
<b>CO 1</b>	Students should adapt for basic arithmetic calculations.
<b>CO 2</b>	Students should apply the mathematical equations to find solutions to given problems.

Paper Code	Semester II	Lectures
<b>RUSBAS105</b>	<b>Mathematics</b>	<b>30</b>
<b>105.1 System of linear equations and Matrices</b>		<b>10</b>
Matrices over R (order 2 & 3): Matrix operations (addition, subtraction, scalar multiplication, matrix multiplication, transpose of a matrix (it's properties), inverse by elementary row transformation, adjoint method, solution of system of equation both homogenous and non-homogenous using matrix (concept of Rank to be introduced) Determinants: Determinant of a matrix of order 2 and 3, elementary properties of determinants, solving a system of linear equations (up to 3 variables) using Cramer's rule and application to medicines, pharmaceuticals, food and vitamins.		
<b>105.2 Calculus</b>		<b>10</b>
Derivatives and its application (one variable) Definition by first principle method, rules addition, subtraction, multiplication, division (only statements) Application of derivatives: Rate measure (Physics, Chemistry, Industrial aspects), Approximation and errors, Mean value theorems (without proof) Rolle's theorem, Lagrange's mean value theorem, Cauchy's mean value theorem Extreme values using first and second derivatives (application type problem)		
<b>105.3 Ordinary Differential Equation and Applications</b>		<b>10</b>
First order differential equations: Review of separable differential equations, homogenous and non- homogenous differential equation. Linear differential equations and Bernoulli differential equations. Modeling with first order equations: examples from financial mathematics, chemistry, environmental sciences, population growth and decay. Second order linear differential equations: The general second order differential equations, existence and uniqueness, theorem for the solutions of a second order initial value problem (statement only) Emphasis should be on solving problems with different rules.

-------------	--

**Course Code: RUSBAS106**

**Course Title: Analytical Instrumentation**

**Academic Year 2022-23**

**F.Y.B.Sc.**

**COURSE OUTCOMES:**

COURSE OUTCOME	DESCRIPTION
CO 1	Students should appreciate the extensive applications of optics in analytical instrument like colorimeter and spectrophotometer.
CO 2	Students should grasp the fundamental concepts of crystal geometry and X-ray diffraction.

Paper Code	Semester II	Lectures
RUSBAS106	Basic Instrumentation	30
<b>106.1</b>	<b>Equipments in Biological, Chemical &amp; Bioanalytical Laboratory</b>	<b>10</b>
Principle, significance and applications of: Muffle furnace, Hot Air Oven, Water bath, Ultrasonicator (probe and bath), Centrifuge, Rotary shaker (for tubes & flasks), Rotary vacuum evaporator, Autoclave, Incubator, vortex machine, Cyclomixer & pulverizer		
<b>106.2</b>	<b>Elementary instruments</b>	<b>10</b>
Principle, significance and applications of: Analytical weighing balance, pH meter, Conductometer, Dissolved Oxygen meter, TDS meter, Potentiometer, Colorimeter. Need of automation and its advantages for the laboratory instruments/equipments.		
<b>106.3</b>	<b>Light scattering techniques &amp; Microscopy</b>	<b>10</b>
<b>Light scattering techniques:</b> Turbidometry, Nephelometry. <b>Microscopy:</b> Simple microscope, Compound microscopy, Phase contrast microscopy, Fluorescence microscopy		

RUSBASP103	Basic Instrumentation Practicals:
<ol style="list-style-type: none"> <li>1. Operation of Hot Air Oven, Water bath, Vortex, Rotary shaker, Ultrasonicator, Centrifuge in routine analysis.</li> <li>2. Extraction of phytoconstituents from herbal raw material/products using rotary vacuum evaporator.</li> <li>3. Operation of pH meter (calibration and analysis)</li> <li>4. Preparation of various buffers and measurement of pH using pH meter and pH paper. Calculation of % error: Acetic acid—Sodium acetate Buffer.</li> <li>5. Operation of Colorimeter</li> </ol>

**Course Code: RUSBAS107**  
**Course Title: Foundation course I**  
**Academic Year 2022-23**  
**F.Y.B.Sc.**

**COURSE OUTCOMES:**

COURSE OUTCOME	DESCRIPTION
<b>CO 1</b>	Students should be aware about their constitutional rights and current socio-political scenario of India.

Paper Code	Semester II	Lectures
<b>RUSBAS107</b>	<b>Foundation Course</b>	<b>30</b>
<b>107.1</b>	<b>Overview of Indian Society, Gender and social issues</b>	<b>10</b>
<b>Overview of Indian Society:</b> Understanding social stratification of Indian society through its demographic composition: population distribution according to Religion, Caste and Gender. Regional variations in India – Rural, Urban and Tribal characteristics Harmony, Tolerance and National integration <b>Gender &amp; Social Issues:</b> LGBTQIA+ issues, Problems and Safeguards, Domestic Violence Act 2005 ( Violence against Women; Trafficking of Women), Sex education, Menstrual Leave debate, Sexual Harassment at Workplace.		
<b>107.2</b>	<b>Value Education and New Education Policy 2020</b>	<b>10</b>
Value education: Meaning, Need and Importance. Basic Human Values: Equality, Secularism, Patriotism and Justice. Value education and Inclusive education in New Education Policy 2020.		
<b>107.3</b>	<b>Contemporary Rights</b>	<b>10</b>
Right to Information and Right to Privacy Consumer Rights and Intellectual Property Rights Right to City and Right to Development

## Modality of Assessment for: F.Y.B.Sc. Semester I

### Theory Examination Pattern:

#### A) Internal Assessment- 40%- 40 Marks

Sr No	Evaluation type	Marks
1.	Internal Examination	20
2.	Assignment/Group Discussion/Presentation/Class Activity	20
	<b>TOTAL</b>	<b>40</b>

#### B) External Examination- 60%- 60 Marks

##### Semester End Theory Examination:(Deviation from the usual modality)

Owing to the pandemic situation prevailing in 2020 and continuing in 2021, the external examinations (Semester End) may be conducted online as per the instructions/circulars received from the University of Mumbai and Maharashtra State notifications from time to time. The conventional mode of external examination will commence again only after the declaration of normalcy by the Government authorities.

1. Duration - These examinations shall be of **2.0 Hours** duration.
2. Theory question paper pattern:

#### Paper Pattern for Biological, Chemical, Computational Sciences:

Question	Options	Marks	Questions Based on
Q.1. Short answer question (5 Marks each)	3 out of 5	15	Unit I
Q.2. Short Answer questions (5 Marks each)	3 out of 5	15	Unit II
Q.3. Short Answer questions (5 Marks each)	3 out of 5	15	Unit III
Q.4. Objective/short answer question (5 Marks each)	5 out of 5	15	Combination of all units
	<b>TOTAL</b>	<b>60</b>	

**Practical Examination Pattern:**

**A) Internal Examination: 40%- 40 Marks**

Particulars	
Journal	10
Experimental tasks/Attendance	10
Small project/Class assignment/Presentation/Activity /Viva	20
<b>Total</b>	<b>40</b>

**B) External Examination: 60%- 60 Marks**

**Semester End Practical Examination:**

Particulars	Paper
Required Experiments Performed with appropriate principle, approach, Observations, Result, Demonstration of skills, Conclusion and Viva.	60
<b>Total</b>	<b>60</b>

**Overall Examination & Marks Distribution Pattern:**

Course	101			102			103			104		
	Internal	External	Total	Internal	External	Total	Internal	External	Total	Internal	External	Total
Theory	40	60	100	40	60	100	40	60	100	40	60	100
Practicals	—	—	—	40	60	100	—	—	—	40	60	100

Course	105			106			107			Grand Total
	Internal	External	Total	Internal	External	Total	Internal	External	Total	
Theory	40	60	100	40	60	100	40	60	100	700
Practicals	—	—	—	40	60	100	—	—	—	300

## Semester II

Course Code: RUSBAS201

Course Title: Biological Sciences I

Academic Year 2022-23

F.Y.B.Sc.

### COURSE OUTCOMES:

COURSE OUTCOME	DESCRIPTION
CO 1	Students should comprehend fundamental concepts of genetics.
CO 2	Students should realize the significance of enzymes with respect to drug design.
CO 3	Students should learn the properties and dynamics of plasma membrane as a prerequisite to study transport of drug molecules.

Paper Code	Semester II	Lectures
RUSBAS201	Biological Sciences I	45
<b>201.1 Enzymology</b>		<b>15</b>
<ol style="list-style-type: none"> <li>Enzymes: Chemical nature, properties, nomenclature, classification, units of enzyme activity: katal specific activity.</li> <li>Mechanism of enzyme action: concept of active site, activation energy, binding energy, energy diagram for enzyme catalysed reactions, lock &amp; key Vs induced fit mechanism</li> <li>Enzyme kinetics: Michaelis-Menton equation, Lineweaver-Burk plot</li> <li>Enzyme inhibitors: Equations &amp; Graphs</li> <li>Allosteric enzymes</li> <li>Types of catalysis: Acid base, covalent, metal ion</li> <li>Isoenzymes, abzymes, synzymes, ribozymes, Applications of enzymes, immobilized enzymes</li> </ol>		

<b>201.2 Coenzymes and Biological Membranes &amp; Transport</b>	<b>15</b>
<p><b>201.3.1 Coenzymes:</b>                  Coenzymes: Coenzymes in hydrogen transfer reactions- nicotinamide nucleotide, flavin nucleotide, lipoic acid. Co enzymes involved in group transfer-biotin, pyridoxal phosphate, thiamine pyrophosphate, coenzyme A, cobalamine, tetrahydrofolic acid <b>(7L)</b></p> <p><b>201.3.2 Membranes &amp; Transport</b>                  Composition of biological Membranes, Different models of Biological Membranes, Membrane dynamics, Solute transport across Biological Membrane (Types &amp; specific examples) <b>(8L)</b></p>	
<b>201.3 Introduction to Genetics</b>	<b>15</b>
<ol style="list-style-type: none"> <li>1. Cell cycle- G and S Phases, Control of cell cycle</li> <li>2. Concept of genes, chromosomes, Mitosis and Meiosis, Apoptosis</li> <li>3. Non-Mendelian inheritance, Linkage and crossing over, Gene expression</li> <li>4. Sex determination in animals, sex linked, sex limited and sex influenced genes</li> <li>5. Variations in chromosome number and structure (e.g., Rice, and Drosophila)</li> </ol>

-----------------------	---

**Course Code: RUSBAS202**  
**Course Title: Biological Sciences II**  
**Academic Year 2022-23**  
**F.Y.B.Sc.**

**COURSE OUTCOMES:**

COURSE OUTCOME	DESCRIPTION
<b>CO 1</b>	Students should appreciate the efficient manner in which cells perform their biological functions while strictly obeying the laws of thermodynamics. They should be able to calculate entropy, enthalpy and free energy change for biochemical reactions.
<b>CO 2</b>	Students should accurately demonstrate metabolic pathways in a sequential manner. They should study metabolic pathways with the perspective of their applications in drug design.

Paper Code	Semester II	Lectures
<b>RUSBAS202</b>	<b>Biological Sciences II</b>	<b>45</b>
<b>202.1 Principles of Bioenergetics</b>		<b>15</b>
Concept of catabolism, anabolism & metabolism. Types of Metabolic pathways converging (catabolism), diverging (anabolism) and cyclic. Types of biochemical reactions- a) Oxidation- reduction. b) Carbon-carbon bond formation or breakdown. c) Internal rearrangement, isomerisation and elimination. d) Group transfer reaction. e) Free radical reaction Concept of Gibbs free energy, enthalpy, entropy, free energy change ( $\Delta G$ ) and standard free energy change ( $\Delta G^0$ ) with suitable examples. Laws of thermodynamics with suitable examples.		
<b>202.2 Carbohydrate Metabolism</b>		<b>15</b>
Introduction to Metabolism, Glycolysis, Krebs Cycle, Pentose Phosphate Pathway, Gluconeogenesis, Glycogenesis, Glycogenolysis, Metabolic disorders		

<b>202.3 Lipid Metabolism, Nucleic Acid Metabolism &amp; Amino Acid Metabolism</b>		<b>15</b>
Lipid Metabolism & Metabolic Disorders		
<b>Nucleic Acid metabolism:</b> Synthesis of Purines & Pyrimidines ( <i>De novo</i> & <i>Salvage pathway</i> ), Catabolism of Purines & Pyrimidines		
<b>Amino Acid:</b> Synthesis of Amino acids, Urea Cycle		
<b>RUSBASP201</b>	<b>PRACTICALS</b>	
<ol style="list-style-type: none"> <li>1. Estimation of reducing sugars by DNSA method</li> <li>2. Enzymology:             <ol style="list-style-type: none"> <li>a) Extraction of amylase from starch using buffers.</li> <li>b) Determination of optimum pH, temperature</li> <li>c) Optimization of substrate and enzyme concentration</li> <li>d) Determination of Km value</li> <li>e) Effect of inhibitor(s)</li> </ol> </li> <li>3. Extraction and immobilization of Invertase from yeast.</li> <li>4. Application of enzyme in diagnostics (Example of glucose oxidase kit, Glucometer demonstration)</li> <li>5. Microscopic visualization of Storage carbohydrates from plant sample</li> <li>6. Study of Seed germination and effect of various factors on seed germination</li> <li>7. Study of Karyotype(s)</li> </ol>

**Course Code: RUSBAS203**  
**Course Title: Chemical Sciences I**  
**Academic Year 2022-23**  
**F.Y.B.Sc.**

**COURSE OUTCOMES:**

COURSE OUTCOME	DESCRIPTION
CO 1	Students should precisely draw and identify stereoisomers. They should realize the applications of stereochemistry for assessment of safety and potency of pharmaceuticals.
CO 2	They should be able to solve problems based on chemical kinetics and thermodynamics

Paper Code	Semester II	Lectures
RUSBAS203	Chemical Sciences I	45
<b>203.1 Stereochemistry-I</b>		<b>15</b>
<p>Optical and Geometrical isomers: Study of enantiomers, diastereoisomers, Geometrical isomerism due to restricted rotation around C-C double bond and Substituted cycloalkanes</p> <p>Idea of configuration. Stereochemistry of carbon compounds with one and two similar and dissimilar asymmetric carbon atoms: enantiomers, diastereomers, and racemic mixtures and their properties, threo, erythro and mesoisomers.</p> <p>Representation of configuration by 'flying wedge formula' and projection formula- Fischer, Newman and Sawhorse. The interconversion of formula</p> <p>Conformational analysis of ethane, propane, 2-methylpropane, 2,2-dimethylpropane, n-butane.</p> <p>Molecular chirality and element of symmetry: Plane of Symmetry, Centre of Symmetry, Alternating axis of symmetry. Chirality without asymmetric carbon</p> <p>Stability of cycloalkanes: Strains in cycloalkanes-angle, eclipsing, transannular (3 to 6 membered).</p> <p>Conformations of cyclohexane, mono and di- alkylcyclohexanes and their relative stabilities.</p>		

<p><b>203.2 Stereochemistry-II</b></p> <p>Assigning stereo descriptors to chiral centres:Cahn-Ingold-Prelog(CIP),Rules for assigning absolute configuration(R&amp;S) to a stereogeniccenter. Assigning absolute configuration to molecules having maximum two chiral carbon atom E &amp; Z stereodescriptors to geometrical isomers.</p> <p>Stereo selectivity and Stereo specificity: Idea of enantioselectivity (ee) and diastereoselectivity(de). Topicity-enantiotopic and diastereotopic atoms, groups and faces.</p> <p>Stereochemistry of –</p> <p>Substitution reactions- SN1, SN2, SNi (reaction of alcohol with thionyl chloride).</p> <p>E2-anti-elimination-Base induced dehydrohalogenation of 1-bromo-1,2-diphenylpropane.</p> <p>Addition reactions to olefins-i)Catalytic hydrogenation ii)Bromination (electrophilic anti addition) iii)Synhydroxylation (molecular addition) with OsO<sub>4</sub> and KMnO<sub>4</sub>.</p>	<p><b>15</b></p>
<p><b>203.3 Chemical Kinetics and Chemical Thermodynamics</b></p> <p><b>Chemical Kinetics:</b></p> <p>Rate of reaction, definition of rate constant, measurement of reaction rates, order and molecularity, integrated rate equations for zero, first and second order reactions (for second order reactions only a=b to be considered), kinetic characteristics of first and second order reactions, pseudo first order reactions</p> <p><b>Chemical Thermodynamics</b></p> <p>Transition state theory, Transition State-Activation energy, Measurement of Activation energy, Reaction profile diagram, the rate determining Step, Hammond's postulate, Principle of microscopic reversibility, Kinetics Vs. thermodynamic control.</p> <p>Product analysis, Kinetic studies, Stereochemical outcome, Detection and trapping of intermediates, Crossover experiments, Kinetic isotope effect –primary kinetic &amp; secondary kinetic isotope effect.</p>	<p><b>15</b></p>

**Course Title: Chemical Sciences II**  
**Academic Year 2022-23**  
**F.Y.B.Sc.**

**COURSE OUTCOMES:**

COURSE OUTCOME	DESCRIPTION
CO 1	Students should grasp the functioning and handling of basic instruments in bioanalytical laboratory. They should realize the need and importance of automation in bioanalysis.
CO 2	Students should realize that correct choice of sampling and minimization of error is essential for the success of scientific experiments.

Paper Code	Semester II	Lectures
RUSBAS204	Chemical Sciences II	45
<b>204.1 Fundamentals of Organic Reactions &amp; Mechanism I</b>		<b>15</b>
<p>Electronic effects in organic molecules: Polarization or Inductive effect Nature and polarity of a covalent bond, dipole moment and its effect on properties of molecules such as melting point/boiling point, solubility; Polarizability effect, Hyperconjugation and Tautomerism,</p> <p>Bonds weaker than a covalent bond: Hydrogen bond – nature, effect on melting point/boiling point, solubility in water; Van der waals forces.</p> <p>General Idea of types of reaction: Introduction and few examples of following types of reaction expected: Addition, Elimination, Substitution, Condensation, Rearrangement,</p> <p>Three kinds of Pericyclic reactions: Molecular orbital, Orbital symmetry, Electrocyclic reactions (FMO-Approach)</p> <p>Concept of Electrophilicity, Nucleophilicity, acidity and basicity of organic molecules</p>		
<b>204.2 Fundamentals of Organic Reactions &amp; Mechanism II</b>		<b>15</b>
<p>Homolysis &amp; Heterolysis, Concepts of intermediate, carbocation, carbanion and free radicals: Geometry, stability and reactivity.</p> <p>Mechanism and applications of Pinacol-Pinacolone rearrangement, Schmidt reaction, Benzilic acid rearrangement.</p>		

<p>Lossen rearrangement, Knoevenagel condensation, Reimer-Teimann reaction, Hunsdiecker reaction, Sand-Meyer reaction</p> <p>Pericyclic Reaction: 1,3-Dipolar cycloadditions, Cheletropic Reactions, Cycloaddition reactions, Sigmatropic rearrangements, The ENE reaction . (New)</p>	
<b>204.3 Gravimetric &amp; Volumetric Analysis</b>	<b>15</b>
<p><b>A) Gravimetric analysis:</b>            Conditions of precipitation, Nucleation, Particle size, Crystal growth, Co-precipitation, Precipitation from homogeneous solutions, Drying and ignition of precipitate</p> <p>Different types of analysis: (Introduction only) Elemental and elementary analysis, Microanalysis, Stereochemical and topochemical analysis, Trace analysis, surface analysis, Radioanalytical methods and activation analysis, Species analysis (Speciation), DNA analysis</p> <p><b>B) Volumetric analysis:</b>            Theoretical aspects of titration methods, titration curves, and end point evaluation and choice of indicators in: i) Complexometric titrations: <math>\text{Cu}^{2+}</math> /EDTA and <math>\text{Ca}^{2+}</math>/EDTA, ii) Redox titrations: <math>\text{Fe}^{2+}</math> /<math>\text{Ce}^{4+}</math>, <math>\text{Fe}^{2+}</math>/<math>\text{Cr}_2\text{O}_7^{2-}</math> and <math>\text{Fe}^{2+}</math>/<math>\text{MnO}_4^{1-}</math> and iii) Precipitation titrations: Mohr and Volhard methods.</p> <p>Non aqueous titrations- Basic principles and applications.</p>	

<b>RUSBASP202</b>	<b>PRACTICALS</b>
<p>1. Chemical Kinetics &amp; Chemical Thermodynamics:</p> <p>A. To determine the rate of acid hydrolysis of methyl acetate and determination of order by graphical method.</p> <p>B. To determine the order of the acid hydrolysis of methyl acetate by the method of equi fractional time. Second order reaction between-a) <math>\text{K}_2\text{S}_2\text{O}_8</math> and KI (With equi-molar concentrations)</p> <p>2. b <math>\text{K}_2\text{S}_2\text{O}_8</math> and KI (With unequal concentrations)</p> <p>3. Complete identification of an organic compound: Identification by micro-scale techniques following – Preliminary tests, Solubility, Type, Elemental detection, Group tests, Physical Constant determination [Minimum 08 compounds to be given for the identification (4 solid, 4 liquid)]</p> <p>4. Synthesis of Fluorescein, a classic fluorescein dye</p> <p>5. Gravimetric Analysis</p> <p>A. Estimation of mixture of <math>\text{BaSO}_4</math> and <math>\text{NH}_4\text{Cl}</math></p> <p>B. Estimation of mixture of <math>\text{Na}_2\text{CO}_3</math> and <math>\text{NaHCO}_3</math></p>

**Course Code: RUSBAS205**

**Course Title: Physics**

**Academic Year 2022-23**

**F.Y.B.Sc.**

**COURSE OUTCOMES:**

COURSE OUTCOME	DESCRIPTION
CO 1	Students should be able to choose the correct statistical test to analyze biological data.

Paper Code	Semester II	Lectures
RUSBAS205	Physics	30
<b>205.1</b>	<b>Alternating current theory &amp; transient response of circuit.</b>	<b>10</b>
	AC circuit containing pure R, pure L and pure C Representation of sinusoids by complex numbers, Series L-R, C-R and LCR circuits. Resonance in LCR circuit (both series and parallel) Power in ac circuit. Q-factor. Series LR, CR, LCR circuits. Growth and decay of currents/charge.	
<b>205.2</b>	<b>Optics</b>	<b>10</b>
	<p><b>Image formation:</b> coaxial system of two thin lenses in contact and separated by a distance, cardinal points and qualitative description of image formation by a thin lens, aberration of optical images (spherical aberration, distortion, chromatic aberration), methods reducing aberrations, Ramsden eyepiece.</p> <p><b>Interference by division of amplitude:</b> interference in thin films (reflected system only) a wedge shaped film in monochromatic light, Newton's rings, determination of wavelength and the refractive index of a liquid using Newton's rings.</p> <p><b>Fraunhofer diffraction:</b> expression for the resultant of N simple harmonic vibrations of equal amplitude, the same period and phases increasing in an arithmetic progression, use of this expression to study a single slit, a double slit, and a plane diffraction grating(transmission type), comparison of prism and grating spectra.</p> <p><b>Introduction to polarization:</b> pictorial representation of polarized light, polarization by scattering and by reflection, Brewster's law, Malus's law, double refraction in calcite and quartz, experimental determination of <math>\mu_0</math> and <math>\mu_E</math> of a quartz or a calcite prism</p>	

205.3 Material Science, Crystal Geometry & X-Ray Techniques	10
<p>Material science: classification of materials, organic, inorganic and biological materials, semiconductor materials, current trends and advances in materials, materials structure and examination, selection of materials</p> <p>Crystal geometry and structure: crystals, single crystal, whiskers, lattice point and space lattice, unit cell, primitive cell, atomic radius, density of crystal, direction lattice planes, miller indices, interplanar spacing, crystal planes in cubic unit cells, common planes in simple cubic structure, Co-ordination number, crystal growth</p> <p>X-rays: production, continuous and characteristic X- ray spectra, Bragg’s law and intensity of X- rays, Mosley’s law.</p> <p>Compton Effect and its experimental verification, energy dependence of photoelectric effect and Compton Effect.</p>

**Course Code: RUSBAS207**  
**Course Title: Environmental Sciences**  
**Academic Year 2022-23**  
**F.Y.B.Sc.**

**COURSE OUTCOMES:**

<b>COURSE OUTCOME</b>	<b>DESCRIPTION</b>
<b>CO 1</b>	Students should be aware of the current trends in globalization.
<b>CO 2</b>	Students should realize the importance of stress management to live a healthy life.
<b>CO 3</b>	Students should be aware about basic human rights.

<b>Paper Code</b>	<b>Semester II</b>	<b>Lectures</b>
<b>RUSBAS207</b>	<b>Environmental Sciences</b>	<b>30</b>
<b>207.1 Environment: An overview and Natural Resources</b>		<b>10</b>
1. Environment – Structure and components – Topology – Natural and Human. 2. Ecosystem as part of Environment – Functioning and levels of organization – Linkage with society and economy. 3. Emerging issues of development – Environment as a source and depository of resources, products and waste. 4. Sustainable use of resources – a multidisciplinary approach – importance of Environmental Studies. 5. Definition, importance and classification of natural resources. 6. Resource rich and resource poor regions – emerging gaps 7. Distribution patterns, utilization and conservation of water, forest and energy resources		
<b>207.2 Disaster – Natural and Man-made &amp; Environmental issues and Movements</b>		<b>10</b>
1. Concept of disaster – Natural and man-made 2. Natural hazard/Disasters: Causes and Consequences – Earthquake and Tsunami, Cyclone, Flood and Drought (a case study) 3. Man-made disasters – Causes and Consequences – nuclear accident, oil spill and leakage, industrial accident 4. Disaster Management cycle – Pre-disaster, disaster occurrence and post-disaster- Role of technology 5. Environmental problems – Causes and Effects 6. Global issues – Global climate changes, Threats to Biodiversity, tremendous pollution, population and ozone depletion (a case study) 7. Regional issues – Acid rain, Desertification (a case study) 8. Major environmental movements in India		

207.3 Environmental Management	10
<ol style="list-style-type: none"> <li>1. Environmental management – concept and need – relevance of Environmental education</li> <li>2. Constitutional and legal provisions in India – International efforts towards environmental protection – role of WTO</li> <li>3. Environmental Statement, ISO 14000, ISO 16000, Environmental Impact Assessment</li> <li>4. Role of technology in environmental management (GIS, GPS, Remote sensing as tools)</li> <li>5. Carbon bank and Carbon credit</li> </ol>

## Modality of Assessment for: F.Y.B.Sc. Semester II

### Theory Examination Pattern:

#### A) Internal Assessment- 40%- 40 Marks

Sr No	Evaluation type	Marks
1.	Internal Examination	20
2.	Assignment/Group Discussion/Presentation/Class Activity	20
	<b>TOTAL</b>	<b>40</b>

#### B) External Examination- 60%- 60 Marks

##### Semester End Theory Examination:(Deviation from the usual modality)

Owing to the pandemic situation prevailing in 2020 and continuing in 2021, the external examinations (Semester End) may be conducted online as per the instructions/circulars received from the University of Mumbai and Maharashtra State notifications from time to time. The conventional mode of external examination will commence again only after the declaration of normalcy by the Government authorities.

- Duration - These examinations shall be of **2.0 Hours** duration.
- Theory question paper pattern:

#### Paper Pattern for Biological, Chemical, Computational Sciences:

Question	Options	Marks	Questions Based on
Q.1. Short answer question (5 Marks each)	3 out of 5	15	Unit I
Q.2. Short Answer questions (5 Marks each)	3 out of 5	15	Unit II
Q.3. Short Answer questions (5 Marks each)	3 out of 5	15	Unit III
Q.4. Objective/short answer question (5 Marks each)	5 out of 5	15	Combination of all units
	<b>TOTAL</b>	<b>60</b>	

**Practical Examination Pattern:**

**A) Internal Examination: 40%- 40 Marks**

Particulars	
Journal	10
Experimental tasks/Attendance	10
Small project/Class assignment/Presentation/Activity /Viva	20
<b>Total</b>	<b>40</b>

**B) External Examination: 60%- 60 Marks**

**Semester End Practical Examination:**

Particulars	Paper
Required Experiments Performed with appropriate principle, approach, Observations, Result, Demonstration of skills, Conclusion and Viva.	60
<b>Total</b>	<b>60</b>

**Overall Examination & Marks Distribution Pattern:**

Course	201			202			203			204		
	Internal	External	Total	Internal	External	Total	Internal	External	Total	Internal	External	Total
Theory	40	60	100	40	60	100	40	60	100	40	60	100
Practicals	—	—	—	40	60	100	—	—	—	40	60	100

Course	205			206			207			Grand Total
	Internal	External	Total	Internal	External	Total	Internal	External	Total	
Theory	40	60	100	40	60	100	40	60	100	700
Practicals	—	—	—	40	60	100	—	—	—	300

**Course Code: RUSBAS301**  
**Course Title: Biological Sciences III**  
**Academic Year 2022-23**  
**S.Y.B.Sc.**

**COURSE OUTCOMES:**

COURSE OUTCOME	DESCRIPTION
<b>CO 1</b>	Students should comprehend central dogma of molecular biology as a prerequisite to study techniques like cloning, PCR, RFLP, etc.
<b>CO 2</b>	Students should understand the significance and applications of developmental biology in the modern world.
<b>CO 3</b>	Students should understand the applications of ethnobotany and pharmacognosy in drug development

Paper Code	Semester III	Lectures
<b>RUSBAS301</b>	<b>Biological Sciences III</b>	<b>45</b>
<b>301.1: Central Dogma of Molecular Biology</b>		<b>15</b>
Concept of Central dogma of molecular biology, Genetic code Replication in prokaryotes, Transcription & Translation in prokaryotes Post translational modification, Regulation of gene expression in prokaryotes, (lac operon and trp operon)		
<b>301.2: Developmental Biology</b>		<b>15</b>
Development of organ system, Developmental signals – polarity, differentiation, apoptosis, Ageing, regeneration (Example of Limb Bud Development)  Process of Fertilization in humans, <i>in vitro</i> Fertilization- Gamete Collection and Storage, Technique, Introduction to Stem Cell therapy and its applications		
<b>301.3: Pharmacognosy &amp; Ethnobotany</b>		<b>15</b>
<b>Pharmacognosy: (12)</b> The scope & practice of Pharmacognosy, sources of crude drugs, Collection, Processing and evaluation of crude drugs Deterioration and adulteration of Crude drugs, Current Trends in Pharmacognosy, Good Cultivation & harvesting practices(introduction)		
<b>Ethnobotany: (3)</b> Principles & Importance of Ethnobotany

**Course Code: RUSBAS302**  
**Course Title: Biological Sciences IV**  
**Academic Year 2022-23**  
**S.Y.B.Sc.**

**COURSE OUTCOMES:**

COURSE OUTCOME	DESCRIPTION
<b>CO 1</b>	Students should study various sources of plants and animals used as antimicrobial agents. They should understand the significance of drug discovery, also the industrial significance of microorganisms.
<b>CO 2</b>	Students should be able to classify viruses with respect to their properties and nature also to study their associations with humans.
<b>CO 3</b>	Students should study the basics of immunology. They should be able to describe autoimmune disorders. They should be able to correctly interpret the results of diagnostic tests like VIDAL, VDRL and ELISA.

Paper Code	Semester III	Lectures
<b>RUSBAS302</b>	<b>Biological Sciences IV</b>	<b>45</b>
<b>302.1 Industrial Microbiology</b>		<b>15</b>
Sources of antimicrobial agents: plants and microorganisms, Antimicrobial Agents Used <i>In vivo</i> and their commercial production. Antimicrobial Drug Resistance and Drug Discovery Important microbes in Food & Drug industry, Pathogenic Organisms in Food & Pharma Industry Commercial significance of Microbes: Biopolymers, Biosurfactants.		
<b>302.2 Virology &amp; Interaction of microbes with humans</b>		<b>15</b>
<b>Virology:</b> Introduction, Scope and Current trends in virology Structures and life cycles of bacteriophages, plant and animal viruses <b>Interactions of microbes with Humans</b> - <i>Influenza, Staphylococcus, Plasmodium, Candida, SARS-CoV-2</i>  Control of Viruses and Eukaryotic Pathogens.		
<b>302.3 Introduction to Immunology</b>		<b>15</b>
Concept of antigen, antibody, Types of immunity, Antigen-Antibody Reactions (MHC, APC introduction), Hypersensitivity and its types, Mechanism of wound healing Autoimmune disorders ( <i>minimum two</i> ) and their management		

RUSBASP301	PRACTICALS
a) Blood grouping b) Isoagglutinin titer- Widal, VDRL tests, Use of diagnostic tests- ELISA demonstration c) Handling of Micropipettes d) Working in Laminar air flow e) Total viable count of the provided sample. f) Direct microscopic counts of provided sample using Breeds count method g) Physical and chemical methods of disinfection h) Study of Normal flora of human body, common microbial contaminants in foods: <i>S. aureus</i> , <i>S. typhi</i> , <i>B. subtilis</i> i) Analysis of Crude drugs by Microscopy with an emphasis on identification of adulteration j) Preparation of antigen and vaccines

**Course Code: RUSBAS303**  
**Course Title: Chemical Sciences III**  
**Academic Year 2022-23**  
**S.Y.B.Sc.**

**COURSE OUTCOMES:**

COURSE OUTCOME	DESCRIPTION
CO 1	Students should apply theoretical principles of electrochemistry in analysis of solutions using pH meter and Conductometer.
CO 2	Students should be adept in operation of these two instruments. They should perform organic synthesis with minimal use of resources and apply greener methods of synthesis.

Paper Code	Semester III	Lectures
RUSBAS303	Chemical Sciences III	45
<b>303.1</b>	<b>Electrochemistry</b>	<b>15</b>
<p>Nature of electrolytes in solution: Variation of molar conductance with concentration for weak and strong electrolytes (derivation of equation is not expected).</p> <p>Kohlrausch's law and its application to determine Molar conductance at infinite dilution of a weak electrolyte, Dissociation constant of a weak electrolyte, Solubility of sparingly soluble salts, Migration of ions, ionic mobilities.</p> <p>Nernst theory, EMF, cells, activity, ionic strength, Membrane potential-applications</p> <p>Conversion of chemical energy to electrical energy. Galvanic cells, reversible and irreversible cells.</p> <p>Types of electrodes: Metal – metal ion electrode, Redox electrodes, Gas electrode, Glass electrode</p> <p>Classification of cells – Chemical and concentration cells, concentration cells with transference, concentration cells without transference, liquid junction potential, use of salt bridge.</p> <p>Applications, strengths and limitations of electrochemical analysis</p>		

<b>303.2</b> Newer methods of organic synthesis & Name Reactions (Mechanism and Applications)	<b>15</b>
<p>Newer methods of organic synthesis: Introduction to the use of following organic synthesis Ultrasound, Microwaves, Phase Transfer Catalyst                  Name Reactions (Mechanism and Applications): Baeyer-Villiger Oxidation, Beckmann rearrangement, Corey-Kim Oxidation, Cornforth rearrangement, Robinson Annulation, Houben-Hoesch Reaction, Favorskii rearrangement, Swern Oxidation, Luche Reduction, Dienone-Phenol rearrangement.</p>	
<b>303.3</b> Instrumental methods of analysis	<b>15</b>
<p>Principle, instrumentation, working and applications of:                  Conductometry, Potentiometry, pH metry, Turbidometry, Nephelometry, and Colorimetry                  Sample preparations for above methods, advantages, disadvantages                  Possible errors and Precautions in each instrumentation technique</p>

**Course Title: Chemical Sciences IV**  
**Academic Year 2022-23**  
**S.Y.B.Sc.**

**COURSE OUTCOMES:**

COURSE OUTCOME	DESCRIPTION
<b>CO 1</b>	Students should comprehend the fundamentals of spectroscopy and separation methods which will be useful to study advanced instrumentation in these fields.
<b>CO 2</b>	Students should correctly demonstrate the structures and organic reactions of heterocyclic compounds.

Paper Code	Semester III	Lectures
<b>RUSBAS304</b>	<b>Chemical Sciences IV</b>	<b>45</b>
<b>304.1 Basic Spectroscopy</b>		<b>15</b>
<p>Electromagnetic spectrum (EMR), Units of wavelength and frequency and their inter conversions.</p> <p>Interaction of EMR with matter: Nature of radiation, energy of molecules- electronic, vibrational and rotational</p> <p>Beer-Lambert's law, Concept of absorbance, transmittance and molar absorptivity, deviation of Beer-Lambert's equation and its limitations,</p> <p>Quantization of energy, Bohr frequency condition</p> <p>Single beam colorimeter – Principle, components and working.</p> <p>Regions of electromagnetic spectrum and process associated with each region.</p> <p><b>UV- VIS</b> : Basic theory, Solvents, Nature of UV-Visible spectrum, Concept of Chromophore, Auxochrome, Bathochromic Shift, Hyper chromic and Hypochromic effect, Chromophore-Chromophore interactions and Chromophore-Auxochrome interactions</p> <p>Sample Preparation, Evaluation of errors and applications of Colorimetry and UV-Visible spectroscopy</p>		

<b>304.2 Heterocyclic Compounds</b>	<b>15</b>
<p><b>Introduction:</b> Electronic structure and aromaticity of furan, pyrrole, thiophene and pyridine.</p> <p><b>Synthesis:</b> Synthesis of furans, pyrroles, and thiophenes by Paal-Knor synthesis. Pyridines by Hantzsch synthesis and from 1,5-diketones.</p> <p><b>Reactivity:</b> Reactivity towards electrophilic substitution reactions-of furan, pyrrole and thiophene on basis of stability of intermediate; and of pyridine on the basis of electron distribution. Nucleophilic substitution reaction of pyridine on the basis of electron distribution.</p> <p><b>Reactions of heterocycles:</b> The following reactions of furan, pyrrole and thiophene: Halogenation, Nitration, Sulphonation, Vilsmeier formylation reaction, Friedel-Crafts reaction.</p> <p><b>Furan:</b> Diels-Alder reaction. Ring opening of furan.</p> <p><b>Pyrrole:</b> Acidity and basicity of pyrrole -Comparison of basicity of pyrrole and pyrrolidine, Acid catalyzed polymerization of pyrrole. Pyridine: Basicity. Comparison of basicity of pyridine, pyrrole and piperidine. Sulphonation of pyridine, with and without catalyst. Reduction, Oxidation of alkyl pyridines and action of sodamide (Chichibabin reaction). N methylation of pyridine. Quaternization of piperidine, pyrrolidine and Hofmann elimination of the quaternary salts.</p>	
<b>304.3 Methods of Extraction and Purification in analysis</b>	<b>15</b>
<p>Partition coefficient and distribution ratio, extraction efficiency, separation factor, role of complexing agents in solvent extraction, chelation, ion pair formation, solvation, types of solvent extraction: batch, continuous. Purification of solid organic compounds, recrystallisation, use of miscible solvents, use of drying agents and their properties, sublimation. Purification of liquids. Experimental techniques of distillation, fractional distillation, distillation under reduced pressure. Solvent extraction, use of immiscible solvents. Difference between extraction, separation and their applications.</p>	

**RUSBASP302 PRACTICALS**

**Conductometry:**

1. Determination of Cell constant of conductivity cell
2. Verification of Ostwald's dilution law
3. Investigate the titration of mixture of HCl and Oxalic acid by NaOH.
4. Determination of relative strength of Chloro-acetic acid and Acetic acid by Conductivity measurement.

**pH-Metry:**

5. Identification of an acid by acid-base titration pH-metrically
6. pH titration of sodium carbonate against HCl to demonstrate the selection of indicators for two inflections.

**Colorimetry:**

7. Verification of Beer-Lambert's law
8. To determine: a)  $\lambda_{max}$  b) Molar absorptivity constant

**Organic Derivative:**

9. Acetylation of Salicylic acid

**Course Title: Computational Sciences III**  
**Academic Year 2022-23**  
**S.Y.B.Sc.**

**COURSE OUTCOMES:**

COURSE OUTCOME	DESCRIPTION
<b>CO 1</b>	Students should effectively use algorithms and graphs for analysis and representation of biological data. They should be able to solve problems based on numerical methods.

Paper Code	Semester III	Lectures
<b>RUSBAS305</b>	<b>Computational Sciences III</b>	<b>30</b>
<b>305.1 Algorithms</b>		<b>10</b>
<ol style="list-style-type: none"> <li>1. Definition and characteristics of an algorithm, selection and interactive constructs in pseudocode. Data structures like array.</li> <li>2. Sorting, insertion sort, bubble sort</li> <li>3. Searching algorithms, linear search and binary search</li> <li>4. Algorithms on integers, algorithm on matrices.</li> </ol>		
<b>305.2 Graphs</b>		<b>10</b>
<ol style="list-style-type: none"> <li>1. Introduction to graphs: types of graph (simple graph, multigraph, pseudograph, directed graph, with an example of each), some special simple graphs (complete graph, cycle, wheel in graph, loop, bipartite graph, regular graph)</li> <li>2. Representing graphs and graph isomorphism, their application</li> <li>3. Elementary combinatorics: Sets; functions; relations (equivalence relations)</li> <li>4. Permutations and combinations with respect to applications.</li> </ol>		

<b>305.3 Numerical Methods</b>	<b>10</b>
<ol style="list-style-type: none"> <li>1. Finding roots of equations-             <ol style="list-style-type: none"> <li>a. Bisection method</li> <li>b. Iteration method</li> <li>c. Newton Raphson method</li> <li>d. Secant method</li> </ol> </li> <li>2. Finding solutions of system of linear equations and numerical approximations-             <ol style="list-style-type: none"> <li>a. LU decomposition (Doolittle’s method, Crout’s method)</li> </ol> </li> <li>3. Inverse of matrix by Cholesky method</li> </ol>

Skiena.</li> <li>• A Textbook of Graph Theory 2<sup>nd</sup> Edition, Kindle Edition by R. Balakrishnan (Author), K. Ranganathan (Author, Contributor)</li> </ul>
----------------------------	---

**Course Code: RUSBAS306**

**Course Title: Computational Sciences IV**

**Academic Year 2022-23**

**S.Y.B.Sc.**

**COURSE OUTCOMES:**

<b>COURSE OUTCOME</b>	<b>DESCRIPTION</b>
<b>CO 1</b>	Students should analyze significance and validity of experimental results with statistical tests such as correlation, regression and hypothesis testing. They should comprehend the concepts of probability theory as a prerequisite to study advanced biostatistics.

<b>Paper Code</b>	<b>Semester III</b>	<b>Lectures</b>
<b>RUSBAS306</b>	<b>Computational Sciences IV</b>	<b>30</b>
<b>306.1 Correlation, Simple linear Regression Analysis</b>		<b>10</b>
<ol style="list-style-type: none"> <li>1. Visualizing relationship using Scatter Diagram,</li> <li>2. Karl Pearson’s Product moment correlation coefficient and its properties.</li> <li>3. Spearman’s Rank correlation. (With and without ties)</li> <li>4. Concept of Simple linear regression. Principle of least squares. Fitting a straight line by method of least squares (Linear in Parameters)</li> <li>5. Relationship between regression coefficients and correlation coefficient, cause and effect relationship, Spurious correlation.</li> <li>6. Concept and use of coefficient of determination (<math>R^2</math>).</li> <li>7. Measures of association with the help of Tau A, Tau B, Tau C, Gamma and Lambda, Somer’s d</li> </ol>		
<b>306.2 Probability Theory</b>		<b>10</b>
<ol style="list-style-type: none"> <li>1. Trial, random experiment, sample point and sample space.</li> <li>2. Definition of an event, mutually exclusive and exhaustive events.</li> <li>3. Classical (Mathematical) and Empirical definitions of Probability -Discrete random variable</li> <li>4. Random variable- Discrete and Continuous</li> <li>5. Standard Discrete Probability Distribution Functions Binomial, Poisson (Concept Only)</li> <li>6. Standard Continuous Probability Distribution Functions: Normal, t, Chi-square and F distribution (Concept only)</li> </ol>		

<b>306.3 Basics of Theory of Estimation and Testing of hypothesis</b>		<b>10</b>
<ol style="list-style-type: none"> <li>1. Point and Interval estimate of single mean, single proportion from sample of large size.</li> <li>2. Statistical tests: Concept of hypothesis, Null and Alternative Hypothesis, Types of Errors, Critical region, Level of significance, Power</li> <li>3. Small sample tests-Independent sample t-test, paired t-test. Concept of p-value. (Use of Excel and SPSS)</li> </ol>		
<b>RUSBASP303</b>	<b>PRACTICALS</b>	
<ol style="list-style-type: none"> <li>1. Introduction of MS-Office: Different elements of word processing (MS-WORD), Spreadsheets (MS EXCEL) and PowerPoint presentation (MS POWERPOINT)</li> <li>2. Working with various forms of graphs</li> <li>3. Google docs: Word, Sheets, Slides and Forms</li> <li>4. Google Jam board, Concept Board and Mind Map</li> </ol>

## Modality of Assessment for: S.Y.B.Sc. Semester III

### Theory Examination Pattern:

#### A) Internal Assessment- 40%- 40 Marks

Sr No	Evaluation type	Marks
1.	Internal Examination	20
2.	Assignment/Group Discussion/Presentation/Class Activity	20
	<b>TOTAL</b>	<b>40</b>

#### B) External Examination- 60%- 60 Marks

##### Semester End Theory Examination: (Deviation from the usual modality)

Owing to the pandemic situation prevailing in 2020 and continuing in 2021, the external examinations (Semester End) may be conducted online as per the instructions / circulars received from the University of Mumbai and Maharashtra State notifications from time to time. The conventional mode of external examination will commence again only after the declaration of normalcy by the Government authorities.

Duration – These examinations shall be of **2.0 Hours** duration.

Theory question paper pattern:

#### Paper Pattern for Biological, Chemical, Computational Sciences III, Environmental Sciences:

Question	Options	Marks	Questions Based on
Q.1. Short answer question (5 Marks each)	3 out of 4	15	Unit I
Q.2. Short Answer questions (5 Marks each)	3 out of 4	15	Unit II
Q.3. Short Answer questions (5 Marks each)	3 out of 4	15	Unit III
Q.4. Objective/short answer question (5 Marks each)	3 out of 4	15	Combination of all units
	<b>TOTAL</b>	<b>60</b>	

#### Paper Pattern for Computational Sciences IV:

Question	Options	Marks	Questions Based on
Q.1. Short answer question	1 out of 2	8	Unit I
	Compulsory	7	
Q.2. Short Answer questions	1 out of 2	8	Unit II
	Compulsory	7	
Q.3. Short Answer questions	1 out of 2	7	Unit III
	Compulsory	8	

Q.4. Objective/short answer question (5 Marks each)	3 out of 4	15	Combination of all units
	<b>TOTAL</b>	<b>60</b>	

**Practical Examination Pattern:**

**A) Internal Examination: 40%- 40 Marks**

<b>Particulars</b>	
<b>Journal</b>	10
<b>Experimental tasks/Attendance</b>	10
<b>Small project/Class assignment/Presentation/Activity /Viva</b>	20
<b>Total</b>	<b>40</b>

**B) External Examination: 60%- 60 Marks**

**Semester End Practical Examination:**

<b>Particulars</b>	<b>Paper</b>
<b>Required Experiments Performed with appropriate principle, approach, Observations, Result, Demonstration of skills, Conclusion and Viva.</b>	<b>60</b>
<b>Total</b>	<b>60</b>

**Overall Examination & Marks Distribution Pattern**

**Semester III**

Course	301			302			303			304		
	Internal	External	Total	Internal	External	Total	Internal	External	Total	Internal	External	Total
<b>Theory</b>	40	60	100	40	60	100	40	60	100	40	60	100
<b>Practicals</b>	—	—	—	40	60	100	—	—	—	40	60	100

Course	305			306			307			Grand Total
	Internal	External	Total	Internal	External	Total	Internal	External	Total	
<b>Theory</b>	40	60	100	40	60	100	40	60	100	700
<b>Practicals</b>	—	—	—	40	60	100	—	—	—	300

**Course Code: RUSBAS401**  
**Course Title: Biological Sciences III**  
**Academic Year 2022-23**  
**S.Y.B.Sc.**

**COURSE OUTCOMES:**

COURSE OUTCOME	DESCRIPTION
<b>CO 1</b>	Students should be able to describe the functioning of nerve and muscles and understand the importance of neurotransmitters as potential target for drugs.
<b>CO 2</b>	Students should be able to understand genetics and describe inborn errors of metabolism and genetic disorders with respect to mutation, physiology, symptoms, diagnosis and cure. They should be aware of gene therapy as an emerging field to treat these disorders.

Paper Code	Semester IV	Lectures
<b>RUSBAS401</b>	<b>Biological Sciences III</b>	<b>45</b>
<b>401.1 Biology of Muscles and Nerve Conduction</b>		<b>15</b>
Muscle structure, Physiological and biochemical basis of muscle contraction Gibbs-Donnan Membrane Equilibrium and Physiology of nerve conduction Synapse & Synaptic conduction, Neurotransmitters. Drug addiction, Neuropathies		
<b>401.2 Genetic Mutation &amp; Repair and Genetic Engineering</b>		<b>15</b>
Types of mutation – Point and gross, Spontaneous and Induced, Types of Mutagens and effects, Cell survival strategies: repair mechanisms, Inborn errors of metabolism with examples, Concept of transposons, types of transposons, role of transposons in genetic disorders with suitable examples  <b>Introduction to genetic engineering</b> – Basics of cloning, Transgenic bacteria and their commercial applications		
<b>401.3 Genetic disorders</b>		<b>15</b>
Diagnosis of genetic disorders, Phenylketonuria, Albinism, Lesch-Nyhan Syndrome, Tay-Sachs Disease, Sickle-Cell Anemia, Cystic Fibrosis, Huntington’s Disease Duchenne muscular Disorder, Hemophilia, Thalassemia, Down’s Syndrome, Spinal Muscular Atrophy (SMA)

Ramnarain Ruia Autonomous College

**Course Code: RUSBAS402**  
**Course Title: Biological Sciences IV**  
**Academic Year 2022-23**  
**S.Y.B.Sc.**

**COURSE OUTCOMES:**

COURSE OUTCOME	DESCRIPTION
<b>CO 1</b>	Students should understand the theory, advantages and disadvantages of RIA, ELISA and Immunohistochemistry. They should be able to choose the most suitable technique as per the nature of sample and objective of analysis. They should understand wide range of the applications of these techniques in research and diagnostics.
<b>CO 2</b>	Students should have a knowledge of hormones and grasp the complex nature, co-ordination and integration of biochemical pathways.
<b>CO 3</b>	Students should have an idea about the tissue culturing techniques and be able to design animal and plant tissue culture laboratories.

Paper Code	Semester IV	Lectures
<b>RUSBAS402</b>	<b>Biological Sciences IV</b>	<b>45</b>
<b>402.1</b>	<b>Biochemical methods for Diagnostics</b>	<b>15</b>
Purification & Analysis of Biomolecules, Principle and diagnostics applications of: Immunohistochemistry, ELISA and RIA, IRMA, Flow Cytometry and its applications in cancer diagnostics		
<b>402.2</b>	<b>Cell communication and Cell signalling</b>	<b>15</b>
Hormones and classification of hormones, Hormone secreting glands, organization of endocrine system, Physiological role of – pancreatic hormones- (insulin, glucagon), thyroxine, glucocorticoids, epinephrine Signal transduction pathways, 2 <sup>nd</sup> messengers, and bacterial chemotaxis		

<b>402.3</b>	<b>Tissue Culture- Plants &amp; Animals</b>	<b>15</b>
<p><b>Plant Tissue culture:</b> Concept of Plant Tissue Culture, Nutrient Requirement, Callus Induction, Micropropagation, Callus Culture, Suspension Culture, Batch Culture, Application of Plant Tissue Culture</p> <p><b>Animal Tissue culture:</b> Concept of Animal Tissue culture                  Nutritional requirements of animal tissues (including significance of serum in media), Role of media components in production of tissue culture products, Concept of cell line &amp; its classification with specific examples, Application of Animal Tissue Culture</p>		
<b>RUSBASP401</b>	<b>PRACTICALS</b>	
<ol style="list-style-type: none"> <li>1. Protein estimation by Lowry's Method</li> <li>2. Total Sugar estimation by Anthrone's method</li> <li>3. UV survival curve of <i>E.coli</i>: photo reactivation and dark repair.</li> <li>4. Visit to Animal tissue culture &amp; Plant tissue culture laboratory.</li> <li>5. Radio immunosorbent assay (demo).</li> <li>6. Immunodiffusion assay</li> <li>7. Trypsinization of Liver Tissue &amp; Cell Viability studies</li> <li>8. Study of Glucose uptake by Yeast</li> </ol>		

Reference Books:

------------------------	--

**Course Code: RUSBAS403**  
**Course Title: Chemical Sciences III**  
**Academic Year 2022-23**  
**S.Y.B.Sc.**

**COURSE OUTCOMES:**

COURSE OUTCOME	DESCRIPTION
<b>CO 1</b>	Students should study pharmaceutical chemistry and bio-organic chemistry with the perspective of their applications in Bioanalytical sciences.
<b>CO 2</b>	Students should be aware of the advances in biopolymers biomaterials and their applications.

Paper Code	Semester IV	Lectures
<b>RUSBAS403</b>	<b>Chemical Sciences III</b>	<b>45</b>
<b>403.1 Introduction to Pharmaceutical Chemistry and Pharmacology</b>		<b>15</b>
Scope of pharmacology, Source, Nature and Nomenclature of Drugs, Factors influencing Dosage and Drug Action, Introduction to drug action: Absorption, Distribution, Metabolism, Excretion of Drug (Drug Disposition and Pharmacokinetics)		
<b>403.2 Introduction to Bio-Organic Chemistry</b>		<b>15</b>
Overview of $\alpha$ -Amino acids: Structure, configuration, Essential amino acids and their abbreviations, classification, Properties: pH dependency of ionic structure and isoelectric point, Methods of preparations of $\alpha$ -Amino acids: Strecker synthesis, amidomalonate synthesis, Erlenmeyer azalactone synthesis. Polypeptides and Proteins: Polypeptides: Peptide bond. Nomenclature and representation of polypeptides. Merrifields solid phase peptide synthesis (example of di- and tri- peptides for nomenclature and synthesis). Structures and properties of crown ethers, cryptands, cyclophanes, calixarenes, rotaxanes and cyclodextrins. Synthesis of crown ethers, cryptands and calixarenes. Molecular recognition and catalysis, molecular self-assembly.		

403.3 Material Chemistry: Polymers And Biomaterials	15
<p><b>Polymers:</b> Introduction: General idea of structure. Namings, types of polymers, tacticity, polymerization processes with examples, radical and ionic mechanisms of polymerizations. Characteristic properties of polymers. General ideas of resins, plastics, rubber, idea of plasticizers, stabilizers, stabilizers, fillers. Structure, preparation and applications of PE (types and Ziegler – Natta process), PP, Teflon, PVC, polyacrylates, PAN, Neoprene, Terylene, Nylons, Phenol/Melamine/Urea-formaldehyde Resins, polyurethane, polycarbonate, epoxy resins (structures of the monomers and those of the polymers are expected).</p> <p><b>Biomaterial:</b> Introduction: Definition of biomaterials, requirements &amp; classification of biomaterials, Comparison of properties of some common biomaterials. Effects of physiological fluid on the properties of biomaterials. Biological responses (extra and intra-vascular system). Surface properties of materials, physical properties of materials, mechanical properties. Metallic implant materials – Stainless steel, Co-based alloys, Ti and Ti-based alloys. Importance of stress-corrosion cracking. Host tissue reaction with biometal, corrosion behaviour and the importance of passive films for tissue adhesion. Hard tissue replacement implant: Orthopedic implants, Dental implants. Soft tissue replacement implants: Percutaneous and skin implants, Vascular implants, Heart valve implants-Tailor made composite in medium.</p>

**Course Code: RUSBAS404**  
**Course Title: Chemical Sciences IV**  
**Academic Year 2022-23**  
**S.Y.B.Sc.**

**COURSE OUTCOMES:**

COURSE OUTCOME	DESCRIPTION
<b>CO 1</b>	Students should grasp the concept of radioactivity and understand its applications in diagnostics and therapeutics.
<b>CO 2</b>	Students should understand importance of inorganic metals in maintenance of health.
<b>CO 3</b>	Students should comprehend basics of separation techniques as a prerequisite to study advanced and hyphenated separation techniques.

Paper Code	Semester IV	Lectures
<b>RUSBAS404</b>	<b>Chemical Sciences IV</b>	<b>45</b>
<b>404.1</b>	<b>Nuclear chemistry</b>	<b>15</b>
Basic nuclear chemistry: Overview, Definitions/Terms involved. Use of radioisotopes as tracers in: Chemical investigations- reaction mechanism, Age determination- dating by Carbon-14 Activation analysis- basic principles, fast neutron activation analysis, radio-chemical method in activation analysis Isotopic dilution method- principle and applications, Auto, x-ray and gamma radiography. Applications of radio-analytical techniques. Introduction to Nuclear medicine: Therapeutic Radioisotopes, Radiopharmaceuticals for therapy, Tissue targeting, Radiopharmaceutical quality control Beta particles: Copper Radioisotopes, Dysprosium-165, Erbium-169, Iodine-131, Iodine-125, Lutetium-177, Phosphorous-32, Radioisotopes of Rhenium, Samarium-153, Strontium-89, Yttrium-90, Indium-111, Tin-Sn-117 Alpha particle emitters: Actinium, Bismuth, and Other Alpha Emitters. Cancer Radio Therapy, Applications of Nuclear chemistry in genetics		

<b>404.2 Aspects of Bio-Inorganic Chemistry</b>	<b>15</b>
<p>Overview of Metals in biological systems,</p> <p>Significance of metals in various physiological processes: Cytochrome and Iron Sulphur proteins in Electron Transport Chain, Role of metal ions (<math>Mg^{2+}</math>, <math>Cu^{2+}</math>, <math>Zn^{2+}</math>, <math>Mn^{2+}</math>, etc) as co-factors of Metalloenzyme or Metal dependent enzymes, Role of calcium in biology, Metals in medicine with an emphasis of platinum-based DNA binding drugs.</p>	
<b>404.3 Introduction to Planar Chromatography</b>	<b>15</b>
<p>Principles of Planar Chromatography</p> <p>Basics of Chromatography: Stationary Phase, Mobile Phase, Rf Value, Chromatogram, Chromatograph, Solvent front, etc.</p> <p>Sample preparation for paper chromatography and thin layer chromatography (TLC)</p> <p>Paper chromatography and its applications</p> <p>TLC and its applications</p> <p>Introduction to High Performance Thin Layer Chromatography (HPTLC)</p> <p>Advances of HPTLC over TLC</p>	
<b>RUSBASP402</b>	<b>PRACTICALS</b>
<p><b>Separation of Organic mixtures:</b></p> <p>1. Water soluble + Water insoluble (Solid + Solid)</p> <p>2. Water insoluble + Water insoluble (Solid + Solid)</p> <p><b>Solvent Extraction:</b></p> <p>Determination of Fe and Cu from their mixture</p> <p><b>Viscosity measurements:</b></p> <p>To determine the molecular weight of polyvinyl alcohol using viscometer.</p> <p><b>Colorimetry</b></p> <p>To determine indicator constant of a given indicator by Colorimetric measurements</p> <p><b>Turbidimetry</b></p> <p>Turbidimetric analysis of cough syrup</p>

## Modality of Assessment for: S.Y.B.Sc. Semester IV

### Theory Examination Pattern:

#### A) Internal Assessment- 40%- 40 Marks

Sr No	Evaluation type	Marks
1.	Internal Examination	20
2.	Assignment/Group Discussion/Presentation/Class Activity	20
	<b>TOTAL</b>	<b>40</b>

#### B) External Examination- 60%- 60 Marks

##### Semester End Theory Examination: (Deviation from the usual modality)

Owing to the pandemic situation prevailing in 2020 and continuing in 2021, the external examinations (Semester End) may be conducted online as per the instructions / circulars received from the University of Mumbai and Maharashtra State notifications from time to time. The conventional mode of external examination will commence again only after the declaration of normalcy by the Government authorities.

5. Duration - These examinations shall be of **2.0 Hours** duration.

6. Theory question paper pattern:

#### Paper Pattern for Biological, Chemical, Computational Sciences IV:

Question	Options	Marks	Questions Based on
Q.1. Short answer question (5 Marks each)	3 out of 4	15	Unit I
Q.2. Short Answer questions (5 Marks each)	3 out of 4	15	Unit II
Q.3. Short Answer questions (5 Marks each)	3 out of 4	15	Unit III
Q.4. Objective/short answer question (5 Marks each)	3 out of 4	15	Combination of all units
	<b>TOTAL</b>	<b>60</b>	

#### Paper Pattern for Computational Sciences III, Technical Communication Skills:

Question	Options	Marks	Questions Based on
Q.1. Short answer question	1 out of 2	8	Unit I
	Compulsory	7	
Q.2. Short Answer questions	1 out of 2	8	Unit II
	Compulsory	7	
Q.3. Short Answer	1 out of 2	7	Unit III

questions	Compulsory	8	
Q.4. Objective/short answer question (5 Marks each)	3 out of 4	15	Combination of all units
	<b>TOTAL</b>	<b>60</b>	

**Practical Examination Pattern:**

**A) Internal Examination: 40%- 40 Marks**

<b>Particulars</b>	
<b>Journal</b>	10
<b>Experimental tasks/Attendance</b>	10
<b>Small project/Class assignment/Presentation/Activity /Viva</b>	20
<b>Total</b>	<b>40</b>

**B) External Examination: 60%- 60 Marks**

**Semester End Practical Examination:**

<b>Particulars</b>	<b>Paper</b>
<b>Required Experiments Performed with appropriate principle, approach, Observations, Result, Demonstration of skills, Conclusion and Viva.</b>	<b>60</b>
<b>Total</b>	<b>60</b>

**Overall Examination & Marks Distribution Pattern**

**Semester IV**

Course	401			402			403			404		
	Internal	External	Total	Internal	External	Total	Internal	External	Total	Internal	External	Total
Theory	40	60	100	40	60	100	40	60	100	40	60	100
Practicals	—	—	—	40	60	100	—	—	—	40	60	100

Course	405			406			407			Grand Total
	Internal	External	Total	Internal	External	Total	Internal	External	Total	
Theory	40	60	100	40	60	100	40	60	100	700
Practicals	—	—	—	40	60	100	—	—	—	300

**Course Code: RUSBAS501**  
**Course Title: Entrepreneurship Skills**  
**Academic Year 2022-23**  
**T.Y.B.Sc.**

**COURSE OUTCOMES:**

COURSE OUTCOME	DESCRIPTION
<b>CO 1</b>	Students will be motivated to start their own enterprise.
<b>CO 2</b>	Students should be aware of the required skill set for an entrepreneur and also realize the challenges in this area.

Paper Code	Semester V	Lectures
<b>RUSBAS501</b>	<b>ENTREPRENEURSHIP SKILLS</b>	<b>40</b>
<b>501.1 The Entrepreneur</b>		<b>10</b>
<ol style="list-style-type: none"> <li>1. Entrepreneurial motivation – dynamics of motivation.</li> <li>2. Developing Entrepreneurial competencies - requirements and understanding the process of entrepreneurship development, self-awareness, interpersonal skills, creativity, assertiveness, achievement, factors affecting entrepreneur's role.</li> <li>3. Case study of Successful Entrepreneurs from India.</li> </ol>		
<b>501.2 Conceptual Frame Work</b>		<b>10</b>
<ol style="list-style-type: none"> <li>1. Concept, need and process in entrepreneurship development.</li> <li>2. Change in the Global Business Environment in post Reform Time, LPG Reforms in India.</li> <li>3. Types of enterprise – Merits and Demerits</li> <li>4. Government policies and schemes for enterprise development</li> <li>5. Mudra Yojana, Start Up India.</li> </ol>		
<b>501.3 Business Economics</b>		<b>10</b>
<ol style="list-style-type: none"> <li>1. Demand analysis, concept &amp; types of demand, law of demand</li> <li>2. Introduction to Cost &amp; Revenue, its types</li> <li>3. Cost Classification (Various types of Cost Concepts)</li> <li>4. STP (segmentation / targeting / positioning)</li> <li>5. P's of Marketing</li> <li>6. WTO: Functions and Agreements with Reference to TRIPS, TRIMS and GATS.</li> <li>7. IPRs and Indian Start Ups, case study approach</li> </ol>		

<b>501.4 Knowledge Management</b>		<b>10</b>
<ol style="list-style-type: none"> <li>1. Introduction</li> <li>2. History and Evolution</li> <li>3. Pillars of Knowledge Management</li> <li>4. Scope &amp; Significance Technology &amp; Knowledge Management.</li> <li>5. Critical Success Factors of KM</li> <li>6. Case Studies</li> </ol>		
<b>RUSBASP501</b>	<b>PRACTICALS</b>	
<ol style="list-style-type: none"> <li>1. Case Study/Assignment/Project Report/Industrial Visit</li> <li>2. Work management tools (Google sheets, Trello)</li> <li>3. Effective use of modern tools like Slack in daily routine for communication.</li> <li>4. Preparing Project plan/ Project management</li> </ol>

**Course Code: RUSBAS502**  
**Course Title: Biological Sciences V**  
**Academic Year 2022-23**  
**T.Y.B.Sc.**

**COURSE OUTCOMES:**

COURSE OUTCOME	DESCRIPTION
<b>CO 1</b>	Students will be able to design basic cloning experiments to obtain genetically modified organisms. They should be sensitized regarding ethical guidelines of cloning.
<b>CO 2</b>	Students should realize the importance of phytochemicals as possible drug candidates and learn the techniques to extract phytochemicals from plants.

Paper Code	Semester V	Lectures
<b>RUSBAS502</b>	<b>Biological Sciences V</b>	<b>45</b>
<b>502.1: Recombinant DNA Technology</b>		<b>15</b>
Cloning and expression vectors (Plasmids, Phages, Cosmids, YACs, BACs, etc.), Restriction Enzymes, process of generating recombinant DNA, Transgenic Bacteria, Plants and Animals: Commercial applications with suitable examples (Any Two), Application of Transposons as genetic tools, Cloning- current Status, Regulations, Ethics etc.		
<b>502.2: Phytochemistry</b>		<b>15</b>
Primary and secondary metabolites from plants, Classification of Plant Secondary metabolites, Functions of Plant Secondary Metabolites, Chemistry of Phenolics, Terpenoids, Alkaloids, Phytochemicals as Drugs, Key factors affecting synthesis of secondary metabolites, Commercial applications		
<b>502.3: Extraction Technologies for Phytochemicals</b>		<b>15</b>
Extraction of phytoconstituents, Choice of solvent for extraction, classical and modern methods of extraction, Percolation & Maceration, Soxhlet extraction, Steam Distillation & Rotary vacuum evaporator, Liquid- Liquid & Solid Phase Extraction, Ultrasonication, Microwave Assisted Extraction, Supercritical Fluid extraction		

RUSBASP502	PRACTICALS
<ol style="list-style-type: none"> <li>1. Extraction of phytoconstituents by maceration, percolation, steam distillation and using soxhlet extractor</li> <li>2. Qualitative tests for Phytoconstituents</li> <li>3. Standardization of a solvent for extraction of phytoconstituents</li> <li>4. Estimation of alkaloids by gravimetry</li> <li>5. Quantitation of tannins by colorimetry</li> <li>6. Study of antimicrobial activity of phytoconstituents</li> <li>7. Extraction of Genomic DNA from suitable plant or microbial material</li> <li>8. Microscopic evaluation of plants</li> <li>9. Replica plate technique</li> <li>10. Problems on Restriction enzyme digestion</li> </ol>

------------------------------	---

**Course Code: RUSBAS503**  
**Course Title: Chemical Sciences V**  
**Academic Year 2022-23**  
**T.Y.B.Sc.**

**COURSE OUTCOMES:**

COURSE OUTCOME	DESCRIPTION
CO 1	Students will get familiar with the basic concepts of atomic and molecular spectroscopy and their applications in bioanalysis. They should be able to choose the correct method for analysis based on chemical property of analyte and objective of analysis.
CO 2	Students will also be introduced to concepts of Raman Spectroscopy and applications of the same.

Paper Code	Semester V	Lectures
RUSBAS503	Chemical Sciences V	45
<b>503.1 Atomic Spectroscopy</b>		<b>15</b>
1. Atomic Absorption Spectroscopy a. Principles & Instrumentation b. Applications 2. Atomic Emission Spectroscopy a. Principles & Instrumentation (Atomic Emission Spectrophotometer, Flame Photometer & Inductively Coupled Plasma- Atomic Emission Spectroscopy, Optical Emission Spectroscopy), Applications 3. Quantitative applications of atomic absorption and flame photometry, calibration curve method, standard addition and internal standard method.		
<b>503.2 Molecular Spectroscopy</b>		<b>15</b>
<b>Molecular Fluorescence and Phosphorescence Spectroscopy:</b> Theory, instrumentation and applications, Dipole moment: Dipole moment, polarization of a bond, bond moment, dipole moment and molecular structure. Rotational Spectrum: Rotational spectrum of a diatomic molecule, rigid rotor, moment of inertia, energy levels, selection rule, nature of spectrum, determination of inter nuclear distance and isotopic shift.  <b>Vibrational spectrum: (IR):</b> Vibrational motion, degrees of freedom, modes of vibration, Vibrational spectrum of a diatomic molecule, simple harmonic oscillator, energy levels,		

<p>zero point energy, conditions for obtaining Vibrational spectrum, selection rule, nature of spectrum.</p> <p><b>Vibrational-Rotational spectrum of diatomic molecule</b></p> <p>Vibrating rotor, energy levels, selection rule, nature of spectrum, R and P branches, harmonic oscillator: energy levels, selection rule, fundamental band, overtones. Application of vibration rotation spectrum in determining Force constant.</p> <p>Introduction to infrared spectra of simple molecules like H<sub>2</sub>O and CO<sub>2</sub></p>	
<p><b>503.3 Raman Spectroscopy &amp; IR Spectroscopy</b></p>	<p><b>15</b></p>
<p><b>Raman Spectroscopy:</b> Scattering of electromagnetic radiation, Rayleigh scattering, Raman scattering, nature of Raman spectrum, Stoke's lines, Anti-Stoke's lines, Raman shift, quantum theory of Raman spectrum, comparative study of IR and Raman spectra, rule of mutual exclusion. (Example of CO<sub>2</sub> molecule)</p> <p><b>Infrared spectroscopy:</b> Diatomic Molecules, Polyatomic Molecules, Characteristic Vibration Frequencies, Factors Affecting Group Frequencies. Qualitative Analysis –Identification of Structural Features, Quantitative Analysis, Sampling Procedures, Near Infrared Spectrometry, Applications of Infrared Spectroscopy</p>

**Course Title: Chemical Sciences VI**  
**Academic Year 2022-23**  
**T.Y.B.Sc.**

**COURSE OUTCOMES:**

COURSE OUTCOME	DESCRIPTION
CO 1	Students will be able to interpret simple IR and NMR spectra. They should be introduced to basic concepts of hyphenated techniques which will be useful in studying advanced instrumentation.
CO 2	Students should realize the importance of safe handling of biomatrices. They should be familiar with routine diagnostic tests and advanced instrumentation in pathological testing.

Paper Code	Semester V	Lectures
RUSBAS504	Chemical Sciences VI	45
<b>504.1</b>	<b>Nuclear Magnetic Spectroscopy</b>	<b>15</b>
Chemical shift, Shielding and deshielding of protons, low resolution N.M.R. spectrum of methanol and ethanol. PMR Spectroscopy: Basic theory of NMR, Nature of PMR spectrum, Chemical shift ( $\delta$ unit), Standard for PMR, Solvents used, Factors affecting Chemical Shift: Inductive effect, Anisotropic effect (with reference to C=C, C $\equiv$ C, C=O and benzene ring), Spin-spin coupling and coupling constant. Proton exchange application of deuterium exchange, Application of PMR in structure determination.		
<b>504.2</b>	<b>Biochemical methods of Analysis</b>	<b>15</b>
Electrophoresis: PAGE, SDS-PAGE, Western Blotting, 2D gel electrophoresis, AGE, ELISA, Microarray		
<b>504.3</b>	<b>Bioanalysis</b>	<b>15</b>
Introduction to Bioanalysis, Different sample matrices and special precautions to be taken while handling clinical samples Biochemical analysis of clinical samples: Glucose, calcium, kidney test, liver test, electrolytes, proteins, complete blood count. Advanced instrumentation in Bioanalysis: Flowcytometer, blood gas analyzer, automatic haematology analyzer, blood glucose analyzer, alcohol breath analyzer		

RUSBASP503	PRACTICALS
<ol style="list-style-type: none"> <li>1. Gravimetric Analysis of Estimation of Nickel as Ni-DMG</li> <li>2. Antioxidant activity of any one sample</li> <li><b>3. ## Modality of Assessment for: T.Y.B.Sc. Semester V

### Theory Examination Pattern:

#### A) Internal Assessment- 40%- 40 Marks

Sr No	Evaluation type	Marks
1.	Internal Examination	20
2.	Assignment/Group Discussion/Presentation/Class Activity	20
	<b>TOTAL</b>	<b>40</b>

#### B) External Examination- 60%- 60 Marks

##### Semester End Theory Examination: (Deviation from the usual modality)

Owing to the pandemic situation prevailing in 2020 and continuing in 2021, the external examinations (Semester End) may be conducted online as per the instructions / circulars received from the University of Mumbai and Maharashtra State notifications from time to time. The conventional mode of external examination will commence again only after the declaration of normalcy by the Government authorities.

7. Duration - These examinations shall be of **2.0 Hours** duration.
8. Theory question paper pattern:

#### Paper Pattern for Biological, Chemical and Computational Sciences:

Question	Options	Marks	Questions Based on
Q.1. Short answer question (5 Marks each)	3 out of 4	15	Unit I
Q.2. Short Answer questions (5 Marks each)	3 out of 4	15	Unit II
Q.3. Short Answer questions (5 Marks each)	3 out of 4	15	Unit III
Q.4. Objective/short answer question (5 Marks each)	3 out of 4	15	Combination of all units
	<b>TOTAL</b>	<b>60</b>	

#### Paper Pattern for Entrepreneurship skills:

Question	Options	Marks	Questions Based on
Q.1. Short answer question (5 Marks each)	3 out of 4	15	Unit I
Q.2. Short Answer questions (5 Marks each)	3 out of 4	15	Unit II

Q.3. Short Answer questions (5 Marks each)	3 out of 4	15	Unit III
Q.4. Short Answer questions (5 Marks each)	3 out of 4	15	Unit IV
	<b>TOTAL</b>	<b>60</b>	

**Practical Examination Pattern:**

**A) Internal Examination: 40%- 40 Marks**

Particulars	
Journal	10
Experimental tasks/Attendance	10
Small project/Class assignment/Presentation/Activity /Viva	20
<b>Total</b>	<b>40</b>

**B) External Examination: 60%- 60 Marks**

**Semester End Practical Examination:**

Particulars	Paper
Required Experiments Performed with appropriate principle, approach, Observations, Result, Demonstration of skills, Conclusion and Viva.	60
<b>Total</b>	<b>60</b>

**Overall Examination & Marks Distribution Pattern**

**Semester V**

**Academic Year 2022-23**  
**T.Y.B.Sc.**

**COURSE OUTCOMES:**

COURSE OUTCOME	DESCRIPTION
<b>CO 1</b>	Students will be keenly interested in developing innovative ideas which may be commercially viable.
<b>CO 2</b>	Students should start building knowledgebase and skill set which will be useful to start a new enterprise in future.

Paper Code	Semester VI	Lectures
<b>RUSBAS601</b>	<b>ENTREPRENEURSHIP SKILLS</b>	<b>40</b>
<b>601.1 Launching and Organizing An Enterprise</b>		<b>10</b>
<ol style="list-style-type: none"> <li>1. Environment scanning – Information, sources, schemes of assistance, problems.</li> <li>2. Enterprise selection, market assessment, enterprise feasibility study</li> <li>3. SWOT Analysis.</li> <li>4. Resource mobilisation – How to Manage Finance, Sources of Finance, Technology, Raw material Planning.</li> <li>5. Quality control and Quality Norms.</li> </ol>		
<b>601.2 Growth Strategies, Networking &amp; Innovation</b>		<b>10</b>
<ol style="list-style-type: none"> <li>1. Business diversification</li> <li>2. Future Growth – Techniques of expansion and diversification, vision strategies</li> <li>3. Types of Business Organisations (Joint Stock, Co-operative, MNCs)</li> <li>4. Human Resource Management and Start Ups (Training Methods)</li> <li>5. Case study of Successful Indian Brands.</li> </ol>		
<b>601.3 Principles of Corporate Management</b>		<b>10</b>
<ol style="list-style-type: none"> <li>1. Principles of Management</li> <li>2. Functions of management (Planning, Organizing, Directing, Controlling, Coordinating)</li> <li>3. Quality Circles</li> <li>4. Management by Wandering Around (MBW)</li> </ol>		

<b>601.4 Innovation</b>		<b>10</b>
<ol style="list-style-type: none"> <li>1. Introduction</li> <li>2. Principle 1 Seek Opportunity in adversity</li> <li>3. Principle 2 Do more with less</li> <li>4. Principle 3 Think &amp; act flexibly</li> <li>5. Principle 4 Keep it simple</li> <li>6. Principle 5 Include the margin</li> <li>7. Principle 6 Follow your Heart</li> </ol>		
<b>RUSBASP601</b>	<b>PRACTICALS</b>

**Course Code: RUSBAS602**  
**Course Title: Biological Sciences V**  
**Academic Year 2022-23**  
**T.Y.B.Sc.**

**COURSE OUTCOMES:**

COURSE OUTCOME	DESCRIPTION
CO 1	Students will learn Phytochemistry with an emphasis on its applications in pharmaceuticals and bioanalysis. They should be able to perform and interpret qualitative tests for phytochemicals.
CO 2	Students should be able to interpret results of molecular biology experiments like PCR and RFLP.
CO 3	Students should appreciate and study biopharmaceuticals as an upcoming branch in pharmaceuticals.

Paper Code	Semester VI	Lectures
RUSBAS602	Biological Sciences V	45
<b>602.1: Phytochemical Analysis</b>		<b>15</b>
Classical methods of analysis (Gravimetric & Titrimetric), Chromatographic & Spectroscopic analysis of phytoconstituents Chromatographic fingerprints, Phytochemical variations in plants Analysis of herbal formulation, Effect of drying on phytoconstituents		
<b>602.2: Techniques in Recombinant DNA Technology</b>		<b>15</b>
RFLP, AFLP, PCR, RAPD, Nucleic acid probes, Southern Blotting, Northern Blotting, Edible Vaccines, Biosensors and Biochips		
<b>602.3: Introduction to Biopharmaceuticals &amp; Biosimilars</b>		<b>15</b>
Introduction to Biopharmaceuticals, Sources of Biopharmaceuticals ( <i>E. Coli</i> , Animal cells, Additional systems), Upstream & Downstream processing, Product Analysis, Therapeutic Hormones, Recombinant Blood Products & Therapeutic Enzymes, Production of antibodies, Vaccines & adjuvants		

RUSBASP602	PRACTICALS
<ol style="list-style-type: none"> <li>1. Demonstration of SDS-PAGE</li> <li>2. Demonstration of PCR, RFLP</li> <li>3. Preparation of antigens for vaccine production (TAB vaccine)</li> <li>4. Sterility testing of biopharmaceuticals</li> <li>5. Preservation of microbial cultures</li> <li>6. Analysis of Biosimilars by Bradford’s method &amp; UV-Visible Spectrophotometer.</li> <li>7. Study of secondary metabolites produced by plants and their qualitative detection</li> <li>8. Study of Chromatographic fingerprint for raw material by: i) HPLTC ii) HPLC iii) GC</li> </ol>

**Course Code: RUSBAS603**  
**Course Title: Chemical Sciences V**  
**Academic Year 2022-23**  
**T.Y.B.Sc.**

**COURSE OUTCOMES:**

COURSE OUTCOME	DESCRIPTION
<b>CO 1</b>	Students will be introduced to theory and instrumentation of HPLC and GC. They should be able to analyze and interpret simple chromatograms. LC-MS and GC-MS as hyphenated techniques will be introduced.
<b>CO 2</b>	Students should understand advantages and limitations of biochemical techniques like SDS-PAGE, native PAGE, 2D-gel electrophoresis etc. and choose suitable technique as per the biochemical properties of analyte and objective of analysis. They should familiarize with the concept of microarrays and biochips as advanced methods of diagnostics.

Paper Code	Semester VI	Lectures
<b>RUSBAS603</b>	<b>Chemical Sciences V</b>	<b>45</b>
<b>603.1 Liquid chromatography</b>		<b>15</b>
Liquid Chromatography and its development to HPLC and its applications HPLC Instrumentation, Pumps, solvent delivery system, isocratic and gradient programming modes, Sample introduction system, Columns, Detectors. Reversed phase and normal phase chromatography		
<b>603.2 Gas chromatography</b>		<b>15</b>
Gas Chromatography, Gas Solid and Gas liquid Chromatography and its applications Gas Chromatography Instrumentation, Carrier gas supply, Injectors, Columns, Packed and capillary columns, Column oven and temperature programming, different detectors.		

<b>603.3 Mass spectrometry &amp; Hyphenated techniques</b>	<b>15</b>
<p>Introduction to mass spectroscopy: Concept of mass to charge ratio, study of ionization techniques (electron ionization, chemical ionization, electrospray ionization, atmospheric pressure ionization techniques, thermospray ionization), Components of mass spectrograph.</p> <p><b>Hyphenation:</b> Need of hyphenation, Interfacing devices</p> <p>Applications of Liquid Chromatography-Mass Spectrometry and Gas chromatography-Mass spectrometry</p>

Venn</li> <li>• Principles and Techniques of Biochemistry and Molecular Biology by Wilson and Walker</li> <li>• Biochemical methods ; S. Sadasivam, A. Manickam</li> </ul>
---------------------	--

**Course Code: RUSBAS604**  
**Course Title: Chemical Sciences VI**  
**Academic Year 2022-23**  
**T.Y.B.Sc.**

**COURSE OUTCOMES:**

COURSE OUTCOME	DESCRIPTION
CO 1	Students will be introduced to basic concepts of drug development and action and understand the importance of a bioanalyst in pharmaceutical industry.
CO 2	Students should realize the problems involved in analyzing trace elements and complex matrices and learn to choose the suitable bioanalytical method for their analysis.
CO 3	Students should apply techniques learned in bioanalysis for characterization of nutritional value of a food sample.

Paper Code	Semester VI	Lectures
RUSBAS604	Chemical Sciences VI	45
<b>604.1 Drug development and Drug Action</b>		<b>15</b>
Definition of the following medicinal terms: Pharmacon, Pharmacophore, Prodrug, Half-life efficiency, LD50, ED50, Therapeutic Index. Brief idea of the following terms: Receptors, Drug-receptor interaction, Drug Potency, Bioavailability, Drug toxicity, Drug addiction, Spurious Drugs, Misbranded Drugs, Adulterated Drugs, Pharmacopoeia. Routes of drug administration with advantages and disadvantages Formulations, Different dosage forms (emphasis on sustained release formulations) Introduction to Drug Discovery, Design and Development, Discovery of a Lead compound: Screening, drug metabolism studies and clinical observation Drug development from Natural Sources: Anti-infective agents, Anti-cancer agents, CNS agents, Development of drug: Pharmacophore identification, modification of structure or functional group. Different types of chemical transformation of drugs with specific examples. Structure and therapeutic use of Diclofenac sodium (DFS), Aceclofenac, Paracetamol, Phenytoin, Aspirin, Atenolol, Levodopa, Ciprofloxacin, Metronidazole, Dapsone, Ethambutol		

<p><b>604.2 Micro analysis and Surface analysis</b></p>	<p><b>15</b></p>
<p><b>Microanalysis :</b>                  Problems associated with trace analysis, Special extraction procedures for separating analyte/s from the complex matrix, Extraction of organic/inorganic analyte from organic/inorganic matrix.                  Special techniques and care to be taken during micro analysis</p> <p><b>Surface analysis:</b>                  Surface chemistry, Phenomenon of adsorption, Adsorption isotherms                  Surface area by BET method, Pore size distribution, Particle size analysis                  Catalysis, Heterogeneous and homogenous catalysis</p>	
<p><b>604.3 General Metabolism and Nutrition</b></p>	<p><b>15</b></p>
<p>Overview of mineral metabolism and abnormalities of mineral metabolism with respect to calcium, iron, iodine, fluoride, manganese, selenium</p> <p>Energy metabolism and nutrition: Concepts of calorific value, Respiratory quotient, BMR, RDA, Nutritional indices, proximate principles of diet, protein energy malnutrition, obesity, BMI, diseases related to obesity, glycemic index.</p> <p>Free radicals and anti-oxidants: reactive oxygen species- generation and damage, free radical scavenger systems, inflammation, respiratory, skin and age related diseases, atherosclerosis, lipid per oxidation, preventive and chain breaking anti-oxidants</p>	

**RUSBASP603 PRACTICALS**

**Separation of Organic mixtures:-**

1. Volatile liquid + Non-volatile liquid ( Liquid + Liquid ) by fractional distillation method
2. Volatile liquid + Water insoluble solid (Liquid + Solid) by distillation method.

**Separation Techniques: -**

1. Paper chromatography for Separation of Plant Pigments (Spinach)/ Separation of Amino acids
2. Thin Layer Chromatography of Alkaloids
3. Column Chromatography of Separation of mixture of dyes/Separation of Plant Pigments (Spinach)
4. Ion Exchange Chromatography of Estimation of sodium using cation exchanger/Estimation of Mg using anion exchange resin column
5. **High Performance Thin Layer Chromatography** - Menthol and Paracetamol
6. **High Performance Liquid Chromatography** - Separation of modern drug (Diclofenac sodium) from their combination formulation.
7. **Gas Chromatography** - Separation of solvent mixtures (Toluene and n-Hexane)

**Course Code: RUSBAS605**  
**Course Title: Computational Sciences V**  
**Academic Year 2022-23**  
**T.Y.B.Sc.**

**COURSE OUTCOMES:**

<b>COURSE OUTCOME</b>	<b>DESCRIPTION</b>
<b>CO 1</b>	Students will comprehend the programming logic for protein structure prediction, Cheminformatics and drug design.
<b>CO 2</b>	Students should effectively use bioinformatics tools like Modeller, Marvin Sketch and iGem Dock for basic structural characterization.

<b>Paper Code</b>	<b>Semester VI</b>	<b>Lectures</b>
<b>RUSBAS605</b>	<b>Computational Sciences V</b>	<b>30</b>
<b>605.1 Protein structure prediction</b>		<b>10</b>
<ol style="list-style-type: none"> <li>1. Protein structure basics</li> <li>2. Computational prediction methods</li> <li>3. Homology modeling</li> <li>4. Protein threading</li> <li>5. Fold recognition</li> <li>6. Tools used for prediction</li> </ol>		
<b>605.2 Cheminformatics</b>		<b>10</b>
<ol style="list-style-type: none"> <li>1. Cheminformatics Introduction</li> <li>2. Chemical structure storage formats</li> <li>3. Cheminformatics tools</li> <li>4. Applications</li> </ol>		
<b>605.3 Computational Drug designing</b>		<b>10</b>
<ol style="list-style-type: none"> <li>1. Introduction to drugs</li> <li>2. Steps in drug discovery &amp; development</li> <li>3. Computational Drug designing</li> <li>4. Structure based drug designing</li> <li>5. Virtual Screening</li> <li>6. Novel drug Targets</li> </ol>		

<b>RUSBASP604</b>	<b>PRACTICALS</b>
-------------------	-------------------

1. Homology modelling study using Modeller
  - a. Download and Installation
  - b. Basic Modelling
  - c. Advanced Modelling
2. Automated modelling using Swiss Model
3. Validation of predicted structures
  - a. ProSA
  - b. Verify 3D
  - c. SAVES
4. Chemical structure designing- Marvin Sketch/ Marvin View
5. Virtual Screening- iGemDock
