Action Taken Report (Year: 2023-24)

The feedback obtained from various stakeholders was discussed and analyzed in the department meetings and valuable suggestions were put forward in Bos meetings and those which are passed in BoS meetings are incorporated in the syllabus. BoS members who are Alumni continuously provide feedback during BoS meetings.

Students' Feedback

Action recommended	Action taken
1.To include objective questions in the evaluation process.	During continuous evaluation, the quantum of MCQs has been increased.
2.To increase number of practicals	With the advent of NEP 2020, the VSC component has converted entirely practical oriented, thus practical component is increased.
3.To organize industry visit for FYBSc and SYBSc	A small scale industry visits will be arranged from this academic year.

Peer Feedback

Action recommended	Action taken
1.To conduct industry oriented lectures	Eminent industry professional will be contacted for guest lectures, as visiting faculty and during alumni interactions as well.
2.To give sufficient hands on exposure to research work	With the advent of NEP 2020, the Field project and Research projects have become an integral part of the curriculum, thereby enhancing the exposure to research component.

Teachers' Feedback

Action recommended	Action taken
1.To increase the duration of practical components as the practicals for UG and PG classes cannot be completed in stipulated two hours.	The suggestion was well forwarded to the academic council and even the teachers were informed that those were in accordance with the New Education policy adopted by the institute.

Alumni Feedback

Action recommended	Action taken
To make the UG syllabus similar to that in entrance exams like IIT JAM	The overlapping topics are discussed and problem solving is carried out during the regular lectures.
To integrate spectroscopic techniques and computational tools to enhance student understanding of organic structures and reaction mechanisms	The department has established a separate and dedicated unit for Computational Chemistry, which facilitates the students to undertake various projects.
Make internship compulsory as it helps students understand what the industry environment is about	The students used to attend internship during their vacations. But, with the mandate of NEP 2020, the UG as well as PG students are required to undertake internship as well as On Job Training.
To introduce spectroscopic analysis exercises to reinforce the interpretation of NMR, IR, and mass spectra in structure elucidation	The lectures for spectral interpretation will be made open to all the other branches of science.

Head, Department of Chemistry
