AC/I(21-22).2(II).RPS9

# S. P. Mandali's

# Ramnarain Ruia Autonomous College

## Syllabus for MSc Part I

## **Program: MSc**

## **Program Code: Microbiology**

(Choice Based Credit System for academic year 2022–2023)

## **PROGRAM OUTCOMES**

In the post graduate courses, S.P.Mandali's Ramnarain Ruia Autonomous College is committed to impart conceptual and procedural knowledge in specific subject areas that would build diverse creative abilities in the learner. The College also thrives to make its Science post graduates research/ job ready as well as adaptable to revolutionary changes happening in this era of Industry 4.0.

РО	PO Description
	A student completing Master's Degree in Science program
	will be able to:
PO 1	Demonstrate in depth understanding in the relevant science
	discipline. Recall, explain, extrapolate and organize conceptual
	scientific knowledge for execution and application and also to
	evaluate its relevance.
PO 2	Critically evaluate, analyze and comprehend a scientific problem.
	Think creatively, experiment and generate a solution
	independently, check and validate it and modify if necessary.
PO 3	Access, evaluate, understand and compare digital information
	from various sources and apply it for scientific knowledge
	acquisition as well as scientific data analysis and presentation.
PO 4	Articulate scientific ideas, put forth a hypothesis, design and
	execute testing tools and draw relevant inferences. Communicate
	the research work in appropriate scientific language.
PO 5	Demonstrate initiative, competence and tenacity at the
	workplace. Successfully plan and execute tasks independently as
	well as with team members. Effectively communicate and
$\mathcal{N}$	present complex information accurately and appropriately to
K.	different groups.
PO 6	Use an objective, unbiased and non-manipulative approach in
	collection and interpretation of scientific data and avoid
	plagiarism and violation of Intellectual Property Rights.
	Appreciate and be sensitive to environmental and sustainability
	issues and understand its scientific significance and global
	relevance.

design scientific solutions to problems. Exemplify projectuse management skills and lead a team for planninexecution of a task.PO 8Understand cross disciplinary relevance of sodevelopments and relearn and reskill so as to adtechnological advancements.	ng and

## **PROGRAM SPECIFIC OUTCOMES**

PSO	Description
	A student completing Master's Degree in Science program in the
	subject of Microbiology will be able to:
PSO 1	Recall the basic concepts of gene expression and regulation, exemplify
	cytoplasmic inheritance and transposons. Analyse the genetics
	underlying cancer and cell cycle. Solve problems based on allelic and genotypic frequencies
PSO 2	Apply the principles of thermodynamics to understand stability of
F 30 2	biological molecules, execute experiments for their detection and
	estimation in samples. Summarize the metabolism of one and two
	carbon compounds by microorganisms
PSO 3	Attribute pathogenesis of diseases to virulence mechanisms, outline the
	pathogenesis, transmission and treatment of emerging bacterial and
	viral infections. Recognize the role of microbiome in the overall
	physiology of humans.
PSO 4	Acquire skills to work in a clinical laboratory. Execute antibiotic
	susceptibility assays and evaluate efficacy in context of antibiotic
	resistance. Also, implement diagnostic tests for infectious diseases.
	Recall aspects in epidemiological study designs and public health
	surveillance and detect agents that could be associated with
	bioterrorism.
PSO 5	Formulate a hypothesis, design a research project, execute the
	experiments including appropriate calibrations and controls, implement
	appropriate methods for data collection and analyse data with
$\mathcal{V}_{\mathcal{A}}$	appropriate statistical tools.
PSO 6	Recall the structure and functions of cell membrane and cytoskeleton
	as well as the concept of protein trafficking and transport. Compare
	various transport mechanisms, and analyse the significance of cell to
	cell communication. Explain the process of development and
	organogenesis in higher animals and correlate it to genes with specific
	reference to Drosophila.

PSO 7	Execute extraction, purification and analysis of various biomolecules
	Compare the mechanisms of enzyme catalysis of different classes of
	enzymes and solve problems on enzyme kinetics. Recall different ce
	signalling mechanisms. Outline the biochemistry of degradation of
	various xenobiotics by microorganisms
PSO 8	Recall methods used to study microbial ecology and execute analys
	of samples from varied environments. Extrapolate potential
	extremophilic proteins to industrial applications, attribute problems lik
	biofouling and biocorrosion to microbial activity. Recall the role
	microbes in soil and demonstrate their role in plant growth. Outline
	appreciate and apply the principles of solid and hazardous was
	management and appreciate various regulations enacted with respe
	to biosafety.
PSO 9	Access appropriate biological databases and apply variou
	bioinformatics tools for varied analysis, recall concepts of synthet
	biology and systems biology. Extrapolate understanding
	contemporary tools in Molecular Biotechnology for DNA sequencing
	mutagenesis and protein expression studies. Execute experiments for
	preparation of nanoparticles and their analysis
PSO 10	Understand and evaluate the significance of viral genetics
	representative bacterial viruses and apply it in rDNA technology. Reca
	and extrapolate the types of animal and plant viruses, describe the
	mechanisms of infections, control and treatment. Explain and give a
	overview of emerging & re-emerging viral infections responsible fe
	causing pandemics. Outline the mechanism of tumorigenesis t
	oncogenic viruses.
PSO 11	Recall detailed mechanisms of innate and adaptive immunity, and
K.	emphasize the molecular interactions that help distinction of self from
	non self in immune mechanisms. Outline the mechanisms of immune
	tolerance and exemplify reasons for autoimmune diseases as well as
	cancer. Apply principles of immunoassays for execution of diagnosis of
	disorders and diseases. Summarize and illustrate concepts in
	immunotherapy. Extrapolate basics of vaccine development to comba
	emerging infections

PSO 12	Understand and implement different concepts in microbial approaches to quality control and management in industries. Check food and water samples for microbiological quality as per prescribed standards and maintain records. Recall concepts and monitor processes in food industry, bottled water manufacturing units and monitor processes and products of pharmaceutical industry with emphasis on BIS regulations, regulatory frameworks, GMP and HACCP, GLP, ISO standards and validation.
PSO 13	Recall and explain the principle and working of techniques like spectroscopy, chromatography, hyphenated techniques, PCR based assays, microarrays, electrophoresis, X ray diffraction and SPR and compare all the different types included under each technique. Understand and extrapolate these concepts to analyse biological samples for biomolecular composition and/or structure.
PSO 14	Understand, explain and Apply concepts in bioinformatics, proteomics, high throughput screening and pharmacogenomics for discovering new drugs
PSO 15	Recall and apply various concepts in modern Biotechnology like gene therapy, stem cell technology, 16SrRNA sequencing in fields like diagnostics, therapeutics and genetic counselling. Summarize and evaluate the biotechnological potential of fungi and algae for production of commercial products like pharmaceutics, pigments, enzymes, biofuels etc. and in processes like bioremediation and wastewater treatment. Summarize and interpret the laws for IPR, biodiversity conservation and recall the perspectives of bioethics. Implement patent searches and outline prerequisites and steps in patentability.
PSO 16	Categorize biofuels and outline fermentation technologies for their manufacture. Exemplify enzymes with industrial potential and recall and explore technologies like immobilization for their application in industrial products. Explain techniques in protein engineering for increasing activity and specificity.

PSO 17	Outline work plans and execute tasks independently and to
	completion. Coordinate and cooperate with team members for
	execution of experiments. Maintain records, make reports and interpret
	them for making summaries. Communicate information accurately and
	effectively. Follow ethical practices at workplace, take initiative, exhibit
	competency and imbibe other professional skills.
PSO 18	Apply theoretical concepts effectively and think innovatively to

**PSO 18** Apply theoretical concepts effectively and think innovatively to translate ideas to research projects and projects to products. Understand the significance of microbiology as a science that has transdisciplinary relevance and immense potential to improve quality of life for all humankind.

## Course Code: RPSMIC 101 (Core Course) Course Title: Microbial Genetics

### Academic year 2022-23

### COURSE OUTCOMES:

COURSE OUTCOME	DESCRIPTION
CO 1	Recall the basic genetic mechanisms like transcription and translation mechanisms, post translational modifications, levels of gene expression
CO 2	Compare and contrast between prokaryotic and eukaryotic transcription and demonstrate an in depth understanding of gene regulation
CO 3	Implement the knowledge about oncogenes and cancer genetics in research
CO 4	Structure the medical and evolutionary relation of transposition
CO 5	Critique the best model organism for genetic studies
CO 6	Outline the factors leading to changes in genetic structure in a population
CO 7	To apply Hardy-Weinberg's Law and evaluate problems based on genotypic and allelic frequencies
CO 8	Outlining the significance of cytoplasmic inheritance, giving emphasis to the evolutionary relationship of inheritance

Aller.

### **DETAILED SYLLABUS**

		iv. Regulation through RNA interference	
	1.3	Chromosomal Rearrangements and effects on gene	01
		expression	<b>U</b> I
		a) Amplification and deletion of genes	
		b) Inversions that alter gene expression	
		c) Phase variation in <i>Salmonella</i>	
11		Extensions and deviations from Mendelian	15
		Genetics	
	2.1	Mitochondrial Inheritance	04
		a) Mitochondrial genome structure	- N
		b) Ancestral and derived mitochondrial genome	
		c) Mitochondrial DNA of Human, yeast and	
		flowering plants	
		d) Endosymbiotic theory	
		e) General features of replication, transcription and	
		translation of mitochondrial DNA	
		f) Codon usage in Mitochondria	
		g) Damage to Mitochondrial DNA and aging.	
		h) Evolution of mitochondrial DNA	
		i) Mt DNA analysis for study of evolutionary	
		relationships	
	2.2	Chloroplast DNA (cp DNA)	03
		a) Gene structure and organization	
		b) General features of replication, transcription and	
		translation of cp DNA	
		c) Comparison of nuclear, eukaryotic, eubacterial	
	0.0	mitochondrial and chloroplast DNA cp DNA maps	03
	2.3	Examples of extranuclear inheritance a) Leaf Variegation	03
		a) Leaf Variegation b) Poky mutant of Neurospora	
		c) Yeast petite mutant,	
		d) Human genetic diseases	
	2.4	Horizontal Gene Transfer	02
	2.4	Revision of	02
		a) Transformation in bacteria	
		b) Conjugation	
		c) Transduction	
$\overline{\mathcal{H}}$	2.5	Epigenetics (Nature v/s Nurture)	03
OV		a) The concept of Epigenome	
$\mathcal{O}$		b) Molecular Mechanisms of epigenetic Changes	
		c) Cause of epigenetic effects- Alterations in	
		Chromatin Structure	
		d) Examples of epigenetic effects	
		Transposable genetic elements and population	15
		genetics	
	3.1	Transposable genetic elements	08
		a) Revision of prokaryotic transposable elements	
		b) Transposable Elements in Eukaryotes	
		-	

		i. Ac and Ds Elements in Maize	
		ii. P Elements and Hybrid Dysgenesis in	
		Drosophila	
		iii. Retro-transposons Retrovirus like Elements	
		Retroposons	
		iv. Transposable elements in Humans	
		c) The Genetic and Evolutionary Significance of	
		Transposable Elements	
		d) Transposons and Genome Organization	
		Transposons and Mutation	
		e) Transpositions that alter gene Expression	
		i. Antigenic variation in Trypansomes	
		ii. Mating type switching in yeast	07
	3.2	Population genetics	07
		a) Population and gene pool	
		i. Genotypic and Allelic frequencies	
		ii. Calculation of Genotypic frequencies and	
		Allelic frequencies for autosomal and X linked	
		loci iii. Problems, calculation of allelic and genetypic	
		iii. Problems –calculation of allelic and genotypic	
		frequencies iv. Hardy-Weinberg Law, genotypic frequencies	
		at HWE, Implications of the H-W Law	
		v. H-W proportions for multiple alleles,	
		vi. X-linked alleles	
		vii. Testing for H-W proportions and problems	
		viii. Genetic ill effects of in-breeding	
		b) Changes in the genetic structure of populations:	
		i. Mutation	
		ii. Migration and gene flow	
		iii. Genetic drift	
		iv. Natural selection and problems based on the	
	1	natural forces	
IV		Model organisms and Genetic basis of cancer	15
	4.1	Model organisms	07
		a) Characteristics of an ideal model organism	
		b) Elaborating each model organism	
		i. <i>E. coli</i>	
012		ii. Yeast	
$\mathcal{N}$		iii. <i>C. elegans</i>	
		iv. <i>A. thaliana</i>	
		v. Mus musculus	_
	4.2	Genetic basis of cancer	08
		a) Forms of Cancer, cancer and the Cell Cycle	
		b) Genetics Basis for Cancer	
		c) Oncogenes	
		d) Tumor-Inducing Retroviruses and Viral	
		Oncogenes	
		e) Cellular Homologs of Viral Oncogenes: The	

	Proto-Oncogenes Mutant Cellular Oncogenes and Cancer	
f)	Chromosome Rearrangement and Cancer	
g)	Tumor Suppressor Genes	
h)	Inherited Cancers and Knudson's Two-Hit	
	Hypothesis Cellular Roles of Tumor Suppressor	
	Proteins Genetic Pathways to Cancer

#### PRACTICALS: RPSMIC 101 (Core Course) (60 CONTACT HRS)

- a. β galactosidase assay
- b. Separation of DNA using Agarose Gel Electrophoresis (AGE)
- c. Isolation of genomic DNA from yeast
- d. Problems on population genetics
- e. Transformation of yeast
- f. Artificial transformation of bacteria
- g. Bacterial conjugation
- h. Study of transduction

## Course Code: RPSMIC 102 (Core Course) Course Title: Microbial Biochemistry-I

## Academic year 2022-23

## COURSE OUTCOMES:

COURSE OUTCOME	DESCRIPTION
CO 1	Recall the basics of biochemical calculations like SI units and
	expression of concentration
CO 2	Remember the basics of amino acids and peptides and understand
	further details about secondary structure of polypeptide chain.
CO 3	Differentiate between various polysaccharides like glycoproteins
	and proteoglycans
CO 4	Explain the method of transport of four major biomolecules into the
	cell
CO 5	Execute various chemical methods to characterize the
	biomolecules
CO 6	Understand chemical properties of water to understand aqueous
	biochemistry
CO 7	Understand the biochemical pathways for metabolism of one and
	two carbon compounds

TCA         ii. Glyoxylate cycle         iii. Modified citric acid cycle         iv. Carbon monoxide dehydrogenase pathway and disproportionation to methane	07

	1		
		i. Dicarboxylic acid cycle	
		ii. Glycerate pathway	
		iii. Beta hydroxyaspartate pathway	
		i. Oxalate- as carbon and energy source	
IV		Transport of Biomolecules	15
	4.1	Transport of sugars	04
		a) Transport of D-Glucose and D-Fructose into <i>E. coli</i> cell.	
		<ul> <li>b) Glucose transporters of erythrocytes, various glucose transporters present in humans (GLUT1- GLUT12)</li> </ul>	
	4.2	Transport of Fatty acid	04
		a) Mobilization of triacylglycerols stored in adipose	
		a) modifization of theory giver of theory and the	
		tissue	
	4.3	tissue c) Fatty acid entry into mitochondria via the acyl-	07
	4.3	tissue c) Fatty acid entry into mitochondria via the acyl- carnitine/carnitine transporter	07
	4.3	tissue c) Fatty acid entry into mitochondria via the acyl- carnitine/carnitine transporter <b>Transport of proteins</b>	07
	4.3	tissue c) Fatty acid entry into mitochondria via the acyl- carnitine/carnitine transporter <b>Transport of proteins</b> a) Protein transport	07
	4.3	tissue c) Fatty acid entry into mitochondria via the acyl- carnitine/carnitine transporter <b>Transport of proteins</b> a) Protein transport a. Sec System	07
	4.3	tissue c) Fatty acid entry into mitochondria via the acyl- carnitine/carnitine transporter <b>Transport of proteins</b> a) Protein transport a. Sec System b. The Translocation of Membrane-Bound	07

#### PRACTICALS: RPSMIC 102 (Core Course) (60 CONTACT HRS)

- a) Preparation of buffers
- b) Determination of pK and PI value for an amino acid
- c) Extraction of total lipids
- d) Identification of fatty acids and other lipids by TLC
- e) Determination of degree of unsaturation of fats and oils
- f) Estimation of total sugars by phenol-sulphuric acid method
- g) Determination of molar absorption coefficient(ε)of I-tyrosine
- h) Determination of the isoelectric point of the given protein
- i) Estimation of polyphenols /tannins by Folin-Denis method
- j) Enrichment, isolation and identification of Methylobacterium
- k) Diffusion studies of molecules across RBCs

## Course Code: RPSMIC 103 (Core Course)

## Course Title: Medical Microbiology and Human Microbiome Academic year 2022-23

### **COURSE OUTCOMES:**

COURSE OUTCOME	DESCRIPTION
CO 1	Elaborate on pathogenesis, mode of transmission, epidemiology
	and therefore modes of prophylaxis of some current and
	emerging diseases
CO 2	Understand nature of regulation of expression of pathogenicity,
	evasion of host defense
CO 3	Recognise and appreciate the importance of biofilms in
	different environments
CO 4	Identify and classify the nature and methods of eradication of
	biofilms, especially those on implants and medical devices
CO 5	Analysing and hypothesizing the effects of Human microbiome on
	different aspects of human physiology

## DETAILED SYLLABUS

Course	Sub-	Course/ Unit Title	Credits/
Code	Unit		Lectures
RPSMIC		MEDICAL MICROBIOLOGY AND HUMAN	04/ 60
103		MICROBIOME	
(Core			
Course)			
<u> </u>		Study of Infections – I	15
•		Detailed Study of following infections including Etiology,	
		Transmission, Pathogenesis, Clinical Manifestations,	$\langle \cdot \rangle$
		Lab. diagnosis, Prophylaxis, and Treatment:	
		MOTT (much actoric other than TD) MDD and VDD TD	
		MOTT (mycobacteria other than TB), MDR and XDR TB, Legionellosis, Emerging infections like- Rickettsial	
		infections and C. <i>auris</i> , Conditions caused by	
		Helicobacter pylori, VRE (Vancomycin Resistant	
		enterococci), Listeriosis, Leptospirosis	
		Study of Infections- II	15
••		Detailed Study of following infections including Etiology,	10
		Transmission, Pathogenesis, Clinical Manifestations,	
		Lab. diagnosis, Prophylaxis, and Treatment:	
		Chikungunya, Dengue, Swine flu and Hepatitis - All	
		types, Viral meningitis & encephalitis	
		Virulence regulation and strategies to evade	15
		defense	
	3.1	Revision of Virulence mechanisms in pathogens	02
	3.2	Mechanisms of virulence regulation	04
		a) Types of regulation	
		b) Quorum Sensing	
	3.3	Measuring Virulence	03
	3.4	Bacterial strategies for evading or surviving host defense systems	06
	$\sim$	a) Biofilms- Structure, development, biofilms on	
		implants and prosthetic devices, Biofilm	
		eradication	
K.		b) Colonization of host surfaces	
		c) Evading host responses	
IV		Study of Human Microbiome	15
	4.1	Human Gut Microbiome	05
		a) Stomach, small and large intestinal microbiome	
		b) Function of the Human Gut Microbiota	
		c) Gut Microbiota in health and disease	
		d) Gut-brain axis	00
	4.2	Human Skin Microbiome         a) Diversity of skin microbiome	02

	<ul><li>b) Function of skin microbiome</li><li>c) Skin Microbiome in diseases</li></ul>	
4.3	Human Oral Microbiome	04
	<ul><li>a) Diversity of oral microbiome</li><li>b) Oral microbiome &amp; health</li></ul>	
4.4	Human Urogenital Microbiome	04
	<ul> <li>a) Male and female genital microbiome</li> <li>b) Diversity of urogenital microbiome</li> <li>c) Urogenital microbiome &amp; health</li> </ul>

#### PRACTICALS: : RPSMIC 103 (Core Course) (60 CONTACT HRS)

- a) Diagnosis for HIV Trispot/ ELISA for AIDS (Demonstration)
- b) Mono Spot Test for diagnosis of Chikungunya (Demonstration expt.)
- c) Diagnosis of leptospirosis Kit method (Demonstration)
- d) Diagnosis for *Helicobacter pylori* HPSA (Helicobacter pylori) (Demonstration expt.) (kit method)
- e) Study of Quorum Sensing in *C.violaecium*
- f) Study of Quorum sensing inhibitors
- g) Detection of Biofilm formation on different surfaces
- h) Determination of Minimum Biofilm Inhibition Concentration of an antibiotic
- i) Study of biofilms in flow systems

## Modality of Assessment for Core Courses:

#### I) Theory Examination Pattern:

#### A) Internal Assessment- 40%- 40 Marks (Except for AECC)

Sr No	Evaluation type	Marks
1	One Review writing/ Review paper presentation/Research paper presentation and Assignment / Long Answer/ Case Study or any other	20
2	Class test	20
	Total	40

### B) External Examination- 60%- 60 Marks per paper (Except for AECC)

- 1. Duration- These examinations shall be of two hours and thirty minutes.
- 2. Theory question paper pattern
  - a. There shall be **five** questions each of **12** marks. On each unit there shall be one question and the fifth question will be based on all the three units.
  - b. All questions shall be compulsory with internal choice within the questions.

Paper pattern:

Question	Options	Marks	Questions based on
Q.1)	Any 2 out of 3	12	Unit 1
Q.2)	Any 2 out of 3	12	Unit 2
Q.3)	Any 2 out of 3	12	Unit 3
Q.4)	Any 2 out of 3	12	Unit 4
Q.5) a)	Any 4 out of 5	04	All four units
Q.5) b)	Any 4 out of 5	04	All four units
Q.5) c)	Any 2 out of 3	04	All four units

#### **II) Practical Examination Pattern**

	Core 1	Core 2	Core 3
Viva	05	05	05
Quiz	05	05	05
Laboratory work	40	40	40
Total	50	50	50

#### Journal

The students are required to present a duly certified journal for appearing at the practical examination, failing which they will not be allowed to appear for the examination. In case of loss of Journal and/ or Report, a Lost Certificate should be obtained from Head/ Co-ordinator / Incharge of the department; failing which the student will not be allowed to appear for the practical examination.

## DSE (Discipline Specific Elective) Students have to select any one of the following courses

## Course Code: RPSMIC 104

## **Course Title: Clinical Microbiology and Epidemiology**

## Academic year 2022-23

### **COURSE OUTCOMES:**

COURSE OUTCOME	DESCRIPTION
CO 1	Apply appropriate methodologies to tackle the threat of
	antibiotic resistance
CO 2	Perform and analyze all kinds of clinical microbiological tests associated with antibiotic susceptibility testing
CO 3	Demonstrate a basic understanding of epidemiological strategies,
	study designs and evaluate the data for its statistical relevance.
CO 4	Discuss and understand the strategies to detect & monitor biological agents used for bioterrorism & exemplify the significance of biosecurity.

## DETAILED SYLLABUS

Course	Unit	Course/ Unit Title	Credits/
Code			Lectures
RPSMIC		CLINICAL MICROBIOLOGY AND	04/60
104		EPIDEMIOLOGY	
(Discipline			
Specific			
Elective)			
		Clinical Microbiology- General principles	15
1	1.1	General Principles of Clinical Microbiology	15
		a) Laboratory Safety and Preventing the Spread	
		of Disease	
		b) Design of the Clinical Microbiology	
		Laboratory c) Quality in the Clinical Microbiology Laboratory	
		d) Legal and Ethical Issues	
	1.2	Clinical microbiology- Processes and Recent	10
		trends	
		a) Phases of the diagnostic cycle	
		b) Overview of Specimen Collection and Processing	
		c) Specimen management and workup-	
		Overview of classical and modern bacterial	
		Identification Methods and Strategies d) Decontamination, Disinfection, and	
		Sterilization during surgical procedures	
		e) Automation and HTS in diagnosis	
		f) Point of care diagnostics	45
II		Clinical Microbiology- Antibiotic resistance and Antibiotic susceptibility testing	15
	2.1	Antibiotic resistance in microbes	07
	2.1	a) Antimicrobial resistance- General principles	07
	D.Y.C	b) Mechanisms of antibiotic resistance in	
1,		bacteria and fungi - overview	
$\mathcal{A}_{\Lambda}$		<ul><li>c) Transfer of antibiotic resistance</li><li>d) Maintaining antibiotic resistance through</li></ul>	
		Selective Pressure	
$VI_A$ .		e) Methods for detection of resistance	
		f) Antimicrobial stewardship, surveillance of antimicrobial consumption, and its	
		consequences	
	2.2	Antibiotic susceptibility testing	08
		a) General considerations- selection,	
		Indications, b) Pharmacokinetic and pharmacodynamics	
		Principles, Clinical relevance of antibiotic	
		sensitivity tests, Serum killing curves	
		c) Susceptibility Test Methods: Dilution and Disk Diffusion Methods- standardization, QC,	
		Procedures and interpretation	

		<ul> <li>d) Antimicrobial Susceptibility Testing Systems</li> <li>e) Special methods- Bactericidal tests, Testing antibiotic combinations</li> </ul>	
		Epidemiology I	15
	3.1	Introduction to Epidemiology	07
		<ul> <li>a) Historical aspects-definition</li> <li>b) Descriptive Epidemiology-aims and uses</li> <li>c) Recent Applications of Epidemiology</li> <li>d) Introduction</li> <li>e) Observational Versus Experimental approaches in Epidemiology</li> </ul>	
		<ul> <li>f) Overview of study designs used in Epidemiology</li> <li>g) Ecologic Studies</li> <li>h) Cross-Sectional studies</li> <li>i) Case-Control studies</li> </ul>	
	3.2	Public health surveillance	04
		<ul> <li>a) Purpose and characteristics</li> <li>b) Identifying health problems for surveillance</li> <li>c) Collecting data for surveillance</li> <li>d) Analyzing and interpreting data</li> <li>e) Disseminating data and interpretation</li> <li>f) Evaluating and improving surveillance</li> </ul>	
	3.3	Bioterrorism	03

#### PRACTICALS: RPSMIC 104 (Discipline Specific Elective) (60 CONTACT HRS)

- a) QC of laboratory media
- b) QC of laboratory reagents
- c) Use of chromogenic media for detection of antibiotic resistant bacteria
- d) Detection of Beta lactamase producing S.aureus using nitrocefin disc's
- e) Antimicrobial susceptibility testing- disc method according to CLSI guidelines
- f) QA of Antibiotic Susceptibility Test- disc method
- g) Antibiotic Susceptibility Test microdilution methods according to CLSI guidelines
- h) Checkerboard assay
- i) E-test
- j) Octa-disc method for AST
- k) Case Studies of epidemiological strategies
- I) Data analysis of epidemiological surveys
- m) Group project on collecting data for surveillance

## Modality of Assessment for RPSMIC 104 (Discipline Specific Elective) Course Title: Clinical Microbiology and Epidemiology

### I) Theory Examination Pattern:

#### A) Internal Assessment- 40%- 40 Marks

Sr No	Evaluation type	Marks
1	One Review writing/ Review paper presentation/Research paper presentation and Assignment / Long Answer/ Case Study or any other	20
2	Class test	20
	Total	40

#### B) External Examination- 60%- 60 Marks per paper

- 1. Duration- These examinations shall be of two hours and thirty minutes.
- 2. Theory question paper pattern-
- a. There shall be **five** questions each of **12** marks. On each unit there shall be one question and the fifth question will be based on all the three units.
- b. All questions shall be compulsory with internal choice within the questions.

Paper pattern:

Question	Options	Marks	Questions based on
Q.1)	Any 2 out of 3	12	Unit 1
Q.2)	Any 2 out of 3	12	Unit 2
Q.3)	Any 2 out of 3	12	Unit 3
Q.4)	Any 2 out of 3	12	Unit 4
Q.5) a)	Any 4 out of 5	04	All four units
Q.5) b)	Any 4 out of 5	04	All four units
Q.5) c)	Any 2 out of 3	04	All four units

#### **II) Practical Examination Pattern**

	DSE 1
Viva	-
Quiz	25
Laboratory work	25
Total	50

#### Journal

The students are required to present a duly certified journal for appearing at the practical examination, failing which they will not be allowed to appear for the examination. In case of loss of Journal and/ or Report, a Lost Certificate should be obtained from Head/ Co-ordinator / Incharge of the department; failing which the student will not be allowed to appear for the practical examination.

## Course Code: RPSBCH 104 (Discipline Specific Elective)

## **Course Title: Plant Biochemistry**

## Academic year 2022-23

#### **COURSE OUTCOMES:**

### After completion of the course, a student will be able to achieve these outcomes

COURSE OUTCOME	DESCRIPTION
CO 1	Study the structural details of the plant cell
CO 2	Illustrate the chemistry of different plant pigments in order to explore their isolation, characterization and applications in various fields
CO 3	Explain and understand the biochemistry of photosynthetic process and its relation to man and its environment.
CO 4	Understand the mechanism of Nitrogen fixation and its importance in agricultural production and environment
CO 5	Acquire knowledge about the importance of secondary metabolites and its industrial applications.
CO 6	Identify the class and functions of secondary metabolites and appreciate their role in physiology of plants
CO 7	Know the significance of plant growth regulators in the development of plants
CO8	Understand the basics of plant tissue culture as it is an important tool for both basic and applied aspects of plant-based research
CO9	Become competent to explain relation between Photosynthesis, growth hormones and Plant growth
CO10	Develop skills and knowledge to conduct basic research work in the field of Plant Biochemistry

## DETAILED SYLLABUS

Course	Unit	Course/ Unit Title	Credits/
Code			Lectures
RPSBCH		PLANT BIOCHEMISTRY	04/60
104			
(Discipline			
Specific			
Elective)			
	I	Overview of Plant cell structure, plant	15
		pigments & plant metabolism	
	1.1	Plant cell wall (structure), Overview of Leaf structure	3
		a) Upper epidermis	
		b) palisade mesophyll	
		c) spongy mesophyll	
		<ul><li>d) lower epidermis</li><li>e) Guard cells and stomata</li></ul>	
	1.2	Specialized plant cells	3
		a) Parenchyma, Sclerenchyma, Collenchyma,	<b>U</b>
		Xylem and phloem, Bulliform cells	
		b) Concept of apoplast, apoplastic and	
		symplastic pathways	
	1.3	Plant pigments	3
		a) Primary pigment - Chlorophyll (Types and	
		function)	
		b) Role of accessory pigments and their	
		biological significance	
		c) Carotenoids, Xanthophylls, Betalains,	
		Anthocyanins and other flavonoids	
	1.4	Plant Micronutrients	1
	1.5	Nitrogen metabolism	5
		a) Sources of Nitrogen, different forms of	
		nitrogen in plants	
$\mathcal{U}_{\Lambda}$		<ul> <li>b) Conversion of nitrate to nitrite &amp; finally to ammonia, biological nitrogen fixation in plants</li> </ul>	
		c) Sulphur metabolism, Phosphorous	
		metabolism	
	II	Photosynthesis, Photorespiration and plant	15
		movements	
	2.1	Photosynthesis	1
	2.2	a) Light reactions: Light harvesting complexes,	2
		Absorption of light, Photophoshorylation:	
		Cyclic and Non-cyclic (Z scheme)	
		b) Dark reactions: Calvin cycle, regulation of	
		Calvin cycle, C4 cycle and CAM pathway,	5
		Synthesis of glucose, starch, sucrose	

	c) Photorespiration, Photoperiodism and	
	photoinhibition	4
	d) Physiology of plant movements	
	i. Physical movements – Xerochasy,	3
	Hydrochasy	
	ii. Vital movements – Protoplasmic	
	streaming, paratonic movements	
	iii. Tactic movements – Chemotaxis,	
	Phototaxis, Thermotaxis	
	iv. Tropic movements – Chemo / geo /	
	hydro / photo / thigmo tropism	
	v. Nastic movements – Seismonasty,	
	Nyctynasty, Photonasty, Chemonasty,	
	Thermonasty	
III	Regulation of plant growth, secondary	15
	metabolites and Sexual reproduction in	
	plants	
3.1	Plant Growth Substances	2
	Structure and Function of Auxins, Gibberellins,	
	Cytokinins, Ethylene and Abscisic Acid	
3.2	Secondary metabolites of plants	4
	Nitrogen containing compounds (Alkaloids),	
	Terpenes & Phenolic compounds – Shikimic acid	
	pathway, Mevalonic acid pathway, MEP Pathway	
3.3	Reproduction in plants	7
	a) Asexual reproduction in gymnosperms.	
	b) Life Cycle of Gymnosperms	
	c) Sexual Reproduction in angiosperms:	
	Structure of plant gametes. Life cycle of	
	angiosperm	
	d) Double fertilization in plants	
	e) Post fertilization events in plants	
3.4	Plant Tissue Culture: Principles & techniques of PTC	2
VI	Phytoremediation	15
4.1	Concept of Phytoremediation: Process and	4
	mechanism contaminant removal,	
	General contaminants of air, water and soil	
4.2	Mechanisms of Phytoremediation	5
	a) Phytoextraction, phytostabilization,	
	phytotransformation, phytostimulation,	
	phytovolatalization and Rhizofiltration	
	b) Enzymes involved in phytoremediation	
4.3	Control of environmental pollution by	6
	Phytoremediation	
	a) Criteria for selection of plants	
	b) Phytoremediation of air, water and soil	
	pollutants and their Case studies

- h) Biochemical methods S Sadashivam and A Manickam New Age International publishers.

#### PRACTICALS: RPSBCH 104 (Discipline Specific Elective) (60 CONTACT HRS)

- a) Study of medicinal plants for human health and their health benefits
- b) Extraction of essential oils from plants
- c) Phytochemical analysis Qualitative test
- d) Quantitative estimation of Total Phenolic content
- e) Study of effect of Eutrophication on water quality
- f) Preparation of growth media using plant waste
- g) Total carbohydrate content by Anthrone method
- h) Estimation of Vitamin C Content in plant by dye method.
- i) Effect of phytohormones on plant growth

## Modality of Assessment for RPSBCH 104 (Discipline Specific Elective)

## **Course Title: Plant Biochemistry**

#### **Theory Examination Pattern:**

A) Internal Assessment- 40%- 40 Marks

#### B) External Examination- 60%- 60 Marks

1. Duration - These examinations shall be of 02 1/2 HOURS duration.

### Paper Pattern:

Question	Options	Marks	Questions based on
Q.1.A)	Any 1 out of 2	8	Unit 1
Q.1.B)	Compulsory	7	
Q.2.A)	Any 1 out of 2	8	Unit 2
Q.2.B)	Compulsory	7	
Q.3.A)	Any 1 out of 2	8	Unit 3
Q.3.B)	Compulsory	7	
Q.4.A)	Any 1 out of 2	8	Unit 4
Q.4.B)	Compulsory	7	
	Total	60	

#### **II)Practical Examination Pattern:**

A) Internal Examination: 40%- 40 Marks

Particulars	Practical I, II, III & IV
Journal	05
Experimental tasks	15
Total	20

#### B) External Examination: 60%- 60 Marks

Semester End Practical Examination:

Particulars	Practical I, II, III & IV
Laboratory work	25
Viva	5
Total	30

# **RPSBTK 104 (Discipline Specific Elective)**

### **Course Title: Clinical Data Management**

### Academic year 2022-23

### COURSE OUTCOMES:

COURSE OUTCOME	DESCRIPTION
CO 1	Discuss the ethical issues in human subjects research
CO 2	Imagine and understand the different phases of clinical trials
CO 3	Analyse the roles and responsibilities of the investigator and the institution
CO 4	Examine various regulatory issues related to clinical studies
CO 5	Recall the companies and organizations associated in this field
CO 6	Develop interest on medical writing and design a clinical study report

Course	Unit	Course/ Unit Title	Credits/
Code			Lectures
RPSBTK		CLINICAL DATA MANAGEMENT	04/60
104			
(Discipline			
Specific			
Elective)			cX.
	I	Drug discovery and Preclinical toxicology	15
		Pre-Clinical toxicology: General Principals, Systemic toxicology, (Single dose and repeat dosetoxicity studies), Carcinogenicity, Mutagenicity,Teratogenicity, Reproductive toxicity, Local toxicity, Genotoxicity, animal toxicity requirements	
	II	Introduction to Clinical trials	15
		Introduction to clinical trials, Historical guidelines in clinical research (Nuremberg code, Declaration of Helsinki and Belmonte report), ICH-GCP guidelines (E6-R1), Phases of clinical trials.	
	III	Clinical study design	15
		Clinical study methodology and regulations: Principles, types (single blinding, double blinding, open access, randomized trials and their examples), Design of protocol, CRF, e-CRF, IB, ICF and preparation of trial reports, Regulations involved (ICMR guidelines) and ethics.	
	IV	Medical Writing	15
		Medical Writing: Literature search and medical articles, contract writing, publication, abstracts, bibliography clinical study reports, principles and softwares in CDM

#### PRACTICALS: RPSBTK 104 (Discipline Specific Elective) (60 CONTACT HRS)

- a) Action query based on various scenarios: vendor data query,eCRF data query, date Mis-Match query in ERCF on AE form and study conclusion form.
- b) design and Raise a query as per given scenario: data missing query,out of sequence data on AE/commed form.missing labs query on visits already performed etc.
- c) Designing eCRF form based on given protocol (only particular sections of protocol will be given)
- d) Designing of eCRF completion guidelines based on given protocol.
- e) Perform Screening process of various drug molecules before performing preclinical toxicity study.
- Perform preclinical toxicity study on cell lines and microorganisms using drugs screened in exp no.5
- g) Various ways to resolve vendor issues.

### Semester II

# Course Code: RPSMIC 201 (Core Course) Course Title: Cell Biology

# Academic year 2022-23

### COURSE OUTCOMES:

COURSE OUTCOME	DESCRIPTION
CO 1	Interpret the structure and analyze the function of cell membrane &
	Cytoskeleton.
CO 2	Discuss the concept of compartmentalization of cell and understand
	the process of membrane transport and protein trafficking.
CO 3	Interpret the phases of Cell cycle & discuss the apoptotic
	mechanisms.
CO 4	Exemplify cell communication strategies in plants & animals.
CO 5	Recall the basics of developmental biology and deconstruct the
	process of meiosis, embryonic cleavage, gastrulation &
	morphogenesis
CO 6	Justify the genetic basis of development in model organisms
CO 7	Analyze the entire genetically predisposed process of development
	in Drosophila.
<b>CO</b> 8	Even to 9 implement the techniques used to study as letterstary 9
CO 8	Execute & implement the techniques used to study cell structure &
$  _{\partial A}$	its components.

#### PRACTICALS: RPSMIC 201 (Core Course) (60 CONTACT HRS)

- a) Study of cell cytology using Phase contrast Microscopy-Demonstration
- b) Study of Cell structure using Confocal Microscopy- Demonstration
- c) Study of Cell structure using Fluorescence Microscopy- Demonstration
- d) Isolation of Chloroplasts.
- e) Isolation of Mitochondria from the cell.
- f) Study of cell viability
- g) Study of Mitosis.
- h) Study of Meiosis
- i) Estimation of NO (Nitric Oxide) produced by Macrophages.
- j) Study of Cell membrane integrity using up take of neutral red.
- k) Observing animal cells under a light microscope (Cheek epithelial cells)
- I) Preparation of liver tissue samples for histochemical analysis
- m) Observing microtubules by immunofluorescent labelling
- n) Separation of blood cells by density gradient centrifugation
- o) Measurement of chlorophyll concentration to analyse plant response to light availability
- p) Effect on plant growth in presence and absence of ethephon
- q) Demonstration of maintaining and cultivating Animal cell lines

# Course Code: RPSMIC 202 (Core Course) Course Title: Microbial Biochemistry-II

### Academic year 2022-23

### **COURSE OUTCOMES:**

COURSE OUTCOME	DESCRIPTION
CO 1	Recall the basics of biochemical techniques for extraction and purification of biomolecules
CO 2	Compare models of regulation of enzyme activity at protein level
CO 3	Understand the details of mechanism of enzyme activity for the representative enzyme from each class
CO 4	Attribute various mechanisms to the response to various environmental stimuli
CO 5	Analyse the mechanism of biodegradation of various xenobiotics by microorganisms
CO 6	Check various properties of amylase enzyme in the laboratory

#### PRACTICALS: RPSMIC 202 (Core Course) (60 CONTACT HRS)

- a) Isolation of Amylase from Aspergillus spp and its Purification strategy
- b) Purification of an extracellular enzyme (βamylase) by salting out and dialysis
- c) Extraction of enzyme (βamylase) by precipitation with Acetone
- d) Enzyme kinetics: effect of enzyme concentration, substrate concentration, pH, temperature and inhibitors on enzyme activity,
- e) Demonstration of proteolytic activity
- f) Determination of glucose isomerase present intracellularly in Bacillus sp.
- g) Adaptation of *E. coli* to anaerobiosis
- h) Chemotaxis of *Pseudomonas*
- i) Effect of temperature and water activity on swarming of *Proteus*
- j) Microbial degradation of polycyclic aromatic hydrocarbons (PAHs) enrichment, isolation and screening of bacteria
- k) Aqueous two-phase partitioning
- I) Separation of proteins using Polyacrylamide Gel Electrophoresis (PAGE)

# Course Code: RPSMIC 203 (Core Course) Course Title: Environmental Microbiology

### Academic year 2022-23

### COURSE OUTCOMES:

COURSE OUTCOME	DESCRIPTION
CO 1	Recollect basic concepts of microbial ecology
CO 2	Design, execute and implement a protocol for sample collection from a natural environment and its microbiological analysis
CO 3	Discriminate and select the best genomic technique for microbial studies of different environmental samples
CO 4	Demonstrate an in depth understanding of microbial ecology of soil and marine environments
CO 5	Apply the understanding on industrial applications of extremophiles to explore and innovate for newer products
CO 6	Summarize the significance of microbes in elemental cycles
CO 7	Interpret the role of rhizosphere bacteria in plant growth and implement techniques for exploring them for commercial applications
CO 8	Explain and appreciate various regulations enacted with respect to biosafety and hazardous waste management

. WM1 -

#### PRACTICALS: RPSMIC 203 (Core Course) (60 CONTACT HRS)

- a) Enrichment & isolation of thermophiles from hot springs/compost heaps & extraction of thermophilic enzymes & determination of their specific activity.
- b) Physical analysis of soil
  - i. Particle size analysis
  - ii. Water retention capacity
  - iii. Bulk density and tap density
- c) Chemical analysis of soil
  - i. Phosphorus
  - ii. Chloride
  - iii. Organic matter
  - iv. Calcium carbonate content
- d) Microbial analysis of soil

- i. Microbial load
- ii. Presence of cellulose, lignin & xylan degraders
- iii. Detection of siderophore producing bacteria
- iv. Isolation of Plant Growth Promoting bacteria from Rhizosphere (IAA producers)

Munnum Munnumus

- v. Dehydrogenase Activity of Soils
- e) Visit to CETP

## Modality of Assessment for Core Papers (Core 1,2 and 3):

#### I) Theory Examination Pattern:

#### A) Internal Assessment- 40%- 40 Marks

Sr No	Evaluation type	Marks
1	One Review writing/ Review paper presentation/Research paper presentation and Assignment / Long Answer/ Case Study or any other	20
2	Class test	20
	Total	40

#### B) External Examination- 60%- 60 Marks per paper

- 1. Duration- These examinations shall be of two hours and thirty minutes.
- 2. Theory question paper pattern-
- a. There shall be **five** questions each of **12** marks. On each unit there shall be one question and the fifth question will be based on all the three units.
- b. All questions shall be compulsory with internal choice within the questions.

Paper pattern:

Question	Options	Marks	Questions based on
Q.1)	Any 2 out of 3	12	Unit 1
Q.2)	Any 2 out of 3	12	Unit 2
Q.3)	Any 2 out of 3	12	Unit 3
Q.4)	Any 2 out of 3	12	Unit 4
Q.5) a)	Any 4 out of 5	04	All four units
Q.5) b)	Any 4 out of 5	04	All four units
Q.5) c)	Any 2 out of 3	04	All four units

#### **II)** Practical Examination Pattern

	Core 1	Core 2	Core 3
Viva	05	05	05
Quiz	05	05	05
Laboratory work	40	40	40
Total	50	50	50

#### Journal

The students are required to present a duly certified journal for appearing at the practical examination, failing which they will not be allowed to appear for the examination. In case of loss of Journal and/ or Report, a Lost Certificate should be obtained from Head/ Co-ordinator / Incharge of the department; failing which the student will not be allowed to appear for the practical examination.

## (Discipline Specific Elective)

# Students have to select any one of the following courses

## Course Code: RPSMIC 204

### **Course Title: Microbial Approaches to Quality Management**

### Academic year 2022-23

### COURSE OUTCOMES:

2 AMAR

COURSE OUTCOME	DESCRIPTION
CO 1	Execute collection, processing and microbiological analysis of food, water, pharmaceutical and cosmetic samples
CO 2	Implement monitoring protocols for the quality of food and water using principles of HACCP
CO 3	Apply basic knowledge of microbial analysis and standards to evaluate current techniques and improvise technology in industries like food, bottled water, cosmetic and pharmaceutical manufacturing units
CO 4	Recall the principles and terminologies used in pharmaceutical industry
CO 5	Design experiments on bioburden determination
CO 6	Execute microbial and sterility testing of pharmaceutical products
CO 7	Monitor the factors which affect the quality of a pharmaceutical product
CO 8	Outline the process of validation and audit validation
CO 9	Design effective antimicrobial preservation methods for cosmetic products

#### PRACTICAL: RPSMIC 204 (Discipline Specific Elective) (60 CONTACT HRS)

- a) Sterility testing and reporting (as per Pharmacopoeia)
- b) Preparation of cosmetic product and its stability study
- *c)* Microbial load in cosmetic product as per IS 14648:2011 w.r.t heterotrophic counts, presence of *Pseudomonas spp, Staphylococcus spp, P.acne*
- d) Efficacy testing of preservatives like parabens as per ISO 11930
- e) Performance of an audit of a test with proper documentation
- f) Bioburden determination of manufacturing unit
- g) Determination of efficacy of sterilization methods.
- h) Demonstration of endotoxin/pyrogen testing
- i) Microbiological load in carrot and apple juice, salad, mayonnaise
- j) Quality Assessment and Analysis of Raw and Pasteurized milk
- k) To detect coliform and faecal coliform bacteria in water by the membrane filtration method
- I) Study of efficiency of water purifiers and comparative assessment
- m) MIC of food preservative
- n) Determination of Thermal Death Point (TDP) and Thermal Death Time (TDT)
- o) Potability testing of drinking Water.
- p) Film medium for detection of coliforms in water and food
- q) Dip slide technique for detection of organisms from food and water samples

# Course Code: RPSBCH 204 (Discipline Specific Elective) Course Title: Nutraceutical and Functional Foods

## Academic year 2022-23

### COURSE OUTCOMES:

#### After completion of the course, a student will be able to

COURSE OUTCOME	DESCRIPTION
CO 1	Understand the Basics of Nutraceuticals as Science
CO 2	Comprehend the Properties, structure and functions of various Nutraceuticals
CO 3	Demonstrate the use of Nutraceuticals as remedies
CO 4	Develop Novel Food and food Ingredients: Polysaccharides, low caloric sweeteners
CO 5	Illustrate the effect of Anti-nutritional factors and Limitations of Nutraceuticals & Functional foods

Course	Unit	Course/ Unit Title	Credits/
Code			Lectures
RPSBCH		NUTRACEUTICALS AND FUNCTIONAL	04/60
204		FOODS	
(Discipline			
Specific			K
Elective)			
	I	Nutraceutical Science	15
	1.1	Introduction to Nutraceuticals as Science	1
	1.2	Classification, scope & future prospects of the Nutraceutical Science	3
	1.3	Sources of Nutraceuticals	3
		Plant sources, Animal sources, Microbial sources and	
	1.4	Minerals Applied aspects of the Nutraceutical Science.	1
	1.5	Relation of Nutraceutical Science with other Sciences	4
		Medicine, Human physiology, genetics, food technology, chemistry and nutrition	
	1.6	Analysis of nutraceuticals- Techniques	3
		(Spectroscopic, Voltammetric, Chromatographic) Bioceuticals	15
			15
	2.1	Properties, structure and functions of various Nutraceuticals	
	NP	<ul> <li>a) Glucosamine, Octacosanol, Lycopene, Carnitine, Melatonin and Ornithine alpha ketoglutarate</li> <li>b) Use of proanthocyanidins, grape products, flaxseed oil, minor millets as Nutraceuticals.</li> </ul>	3
	2.2	Development of Novel Food and food Ingredients:	6
Uh,		Naturally produced flavour modifiers, Single Cell Proteins, Marine Algae as food supplements	
Ki.	2.3	Food supplements and food ingredients as by products – Fishery, poultry/animal husbandry and agriculture/dairy industries.	3
	III	Food remedies	15
	3.1	Food as a remedy	
		a) Nutraceuticals bridging the gap between food	3
		and drugs b) Nutraceuticals in treatment for cognitive decline	2

	<ul> <li>c) Nutraceutical remedies for common disorders like Arthritis, Bronchitis, circulatory problems, hypoglycemia, Nephrological disorders, Liver disorders, Osteoporosis, Psoriasis and Ulcers</li> </ul>	4
3.2	Brief idea about some Nutraceutical rich supplements	6
	<ul> <li>a) Bee pollen, Caffeine, Green tea, Lecithin, Mushroom Extract</li> <li>b) Chlorophyll, Kelp and Spirulina</li> </ul>	
IV	Anti-nutritional Factors & Limitations of	15
	Nutraceuticals	CX.
4.1	Anti-nutritional factors present in foods	2
	Types of inhibitors present in various foods and how they can be inactivated	
4.2	General idea about role of Probiotics and Prebiotics as nutraceuticals. Recent advances in techniques & feeding of substrates	4
4.3	Assessment of nutritional status and Recommended Daily allowances	2
4.4	Non Nutrient Effect of Specific Nutrients : Proteins and Peptides and Nucleotides, Trans fats, Vitamins, Minerals	4
4.5	Issues on functional foods and nutraceuticals in animals	3

HUMBRINARI

### Course Code: RPSBTK 204 (Discipline Specific Elective) Course Title: Nanotechnology

### Academic year 2022-23

### COURSE OUTCOMES:

COURSE OUTCOME	DESCRIPTION
CO 1	Discuss the basics of nanotechnology, tools used for characterising nanomaterials and specific applications of nanotechnology.
CO 2	Examine the nanorobotics devices of nature.
CO 3	Analyse and interpret the latest developments in nanotechnology in the field of medical sciences.
CO 4	Explain drug delivery systems using nanotechnology.
CO 5	Apply nanomaterials in food, cosmetics, agriculture, environment management.
CO 6	Assess and appreciate the thrust in the domain and encourage it to take ahead in research.

		DETAILED STLLADUS	
Course	Unit	Course/ Unit Title	Credits/
Code			Lectures
RPSBTK 204 (Discipline		NANOTECHNOLOGY	04/60
Specific			
Elective)			KOY.
	I	Nutraceutical Science Introduction to	15
		nanotechnology - principles and applications	
		Introduction, synthesis of nanomaterials, biological methods, use of microbial systems & plant extracts, use of proteins & templates like DNA. Characterization of nanomaterials, analysis techniques, properties of nanomechanical, optical, magnetic properties, electrical conductivity, thermal conductivity	7
	I	Carbon nanotubes, Nanorobotics devices of	15
		nature: ATP synthase, the kinen, myosin,	
		dynein, flagella modulated motion	
	- 111	Nanomedicine	15
		Nanomedicine : biopharmaceuticals ,implantable materials,implantable chemicals,surgicals aids,diagnostic tools ,nanosensors and nanoscanning,nano enabled drug delivery system,nanorobotics in medicine	
	IV	Applications of nanotechnology	15
7,	$\mathcal{S}_{1}$	Application of nanomaterials in food, cosmetics, agriculture, environment management

   Dr. Parag Diwan and Ashish Bhardwaj Pentagon Press New Delhi.
- b) Nano forms of carbon and its applications (2007) Prof. Maheshwar Sharon and Dr. Madhuri Sharon Manad Nanotech Pvt.Ltd.
- c) Biotech Nanotechnology lessons from Nature (2004) David Goodsell Wiley-Liss A John Wiley and sons.
- d) Nanotechnology- Basic science and emerging technologies (2005)Willson Kannangava, Smith, Simmons, RaguseOverseasePress.
- e) Textbook of Biotechnology (2005) R. C. Dubey S. Chand and Co.

f) Nanotechnology- Principles and practices S. K. Kulkarni Capital PublishingCo.

### PRACTICAL: RPSBTK 204 (Discipline Specific Elective) (60 CONTACT HRS)

- a) Antibacterial studies of silver nanoparticles by MIC method.
- b) Testing the cell viability of metal oxide nanoparticles using tissue culture technique.
- c) Synthesis of Metal Nanoparticles by Chemical reduction method and their UV-VIS absorption studies.
- d) Synthesis of nanoparticles using bacterial system and their UV-VIS absorption studies.
- e) Synthesis of nanoparticles using plant extract and their UV-VIS absorption studies.
- f) Synthesis of nanoparticles using fungal system and their UV-VIS absorption studies.
- g) Analysis of nanoparticles using UV vis spectrophotometer , TEM ,SEM -data interpretation

### Modality of Assessment for RPSBTK 204 (Discipline Specific Elective) Course Title: Nanotechnology

### I) Theory Examination Pattern:

### A) Internal Assessment- 40%- 40 Marks

Sr No	Evaluation type	Marks
1	One Assignment/ Case Study/ Project based/ Written Assignment /	20
	Presentation	$\mathbb{S}^{\vee}$
2	Class test (Multiple Choice)	20
	Total	40

### B) External Examination- 60%- 60 Marks per paper

- 3. Duration- These examinations shall be of two hours and thirty minutes.
- 4. Theory question paper pattern-
- e. There shall be **five** questions each of **12** marks. On each unit there shall be one question and the fifth question will be based on all the three units.
- f. All questions shall be compulsory with internal choice within the questions.

Paper pattern:

Question	Options	Marks	Questions based on
Q.1.A)	Any 1 out of 2	8	Unit 1
Q.1.B)	Compulsory	7	
Q.2.A)	Any 1 out of 2	8	Unit 2
Q.2.B)	Compulsory	7	
Q.3.A)	Any 1 out of 2	8	Unit 3
Q.3.B)	Compulsory	7	
Q.4.A)	Any 1 out of 2	8	Unit 4
Q.4.B)	Compulsory	7	
	Total	60	

### II) Practical Examination Pattern

### External Examination- 50 Marks Semester End Practical Examination

Particulars	Paper
Laboratory Work	40
Journal	05
Viva	05
Total	50

### **Overall Examination and Marks Distribution Pattern**

Course	Course DSE				
	Internal	External	Total		
Theory	40	60	100		
Practicals	-	50	50		

### Course Code: RPSMIC 205 (Ability Enhancement Course) Course Title: Research Methodology

### Academic year 2022-23

### COURSE OUTCOMES:

COURSE OUTCOME	DESCRIPTION
CO 1	Summarize the basics of research methodology
CO 2	Execute the experiments including appropriate calibrations and controls, with a carefully written record of the outcomes
CO 3	Implement different methods of data collection and process the collected data by conventional and modern methods.
CO 4	Hypothesize a solution to a research problem
CO 5	Design a research project
CO 6	Distinguish between laws, theory, postulates, and research types

Course Code	Unit	Course/ Unit Title	Credits/
			Lectures
<b>RPSMIC 205</b>		RESEARCH METHODOLOGY	2/30
(Ability

Semester II

# MSC II Sem III and Sem IV Syllabus

# S. P. Mandali's

# **Ramnarain Ruia Autonomous College**

# Syllabus for MSc Part II

# Program: MSc

# Program Code: Microbiology (RPSMIC)

(Credit Based Semester and Grading System for academic year 2022–2023)

# Course Code: RPSMIC 301 Course Title: Virology Academic year 2020-21

### COURSE OUTCOMES:

COURSE	DESCRIPTION
OUTCOME	
CO 1	Understand and compare the types of bacterial viruses, their
	structure, mode of replication and their characteristic features
CO 2	Summarize and infer the significance of viral genetics to map the
	genes and decode the ways to construct and use phage vectors
	in rDNA technology
CO 3	Recall the types of plant viruses, their general mechanisms of
	infections, steps in inducing the infection, diagnosis & control of
	plant viral infections
CO 4	Demonstrate an in depth understanding of the types and
	structure of animal viruses, their pathogenesis and attribute it to
	the mode of transmission, diagnosis, control & therapy of different
	animal viral infections
CO 5	Differentiate between the mechanisms of pathogenesis of plant
	and animal viruses
CO 6	Illustrate and exemplify the types and mechanisms of oncolytic
0	viruses and their tumorigenic characteristics.
CO 7	Integrate knowledge on the novel emerging & re-emerging viral
	infections to attribute to pandemics
CO 8	Apply molecular biology techniques& bioinformatics tools to
	diagnose & control viral infections

Course	Sub-	Course/ Unit Title	Credits/
Code/Unit	Unit		Lectures
RPSMIC		VIROLOGY	4/60
301			
I		Viral Genetics & Bacterial Viruses	15
	1.1	Viral genetics	04
		a) Mapping the Bacteriophage genome.	
		b) Phage phenotypes	
		c) Genetic recombination in phages	
		d) Genetic fine structure mapping	
		e) Deletion mapping	
		f) Genes within genes: Bacteriophage ΦX174	
		g) Constructing phage vectors-phage display vectors, suicide vectors, combining phage vectors and transposons	
	1.2	Bacteriophages	02
		General properties of phages, properties of phage infected Bacterial cultures, Specificity of Phage Infection	
	1.3	E.coli Phage T4	02
		Properties of T4 DNA, Genetic organization, the T4 growth cycle, Replication of T4 DNA	
	1.4	E.coli PhageT7 and Lambda	03
		Organization of theT7 genes, Growth Cycle,	
		Regulation of transcription of T7phage.	
	1.5	<i>E.coli</i> Phage (phi) X174, Filamentous DNA	04
		phages, Single stranded RNA phages, Lysogenic	
MI.		cycle.	
		Plant Viruses	15
$\mathcal{L}$	2.1	Plant viruses: General features & infection	04
		process	
		a) Morphology	
		b) Modes of Transmission	
		c) General life cycle	
		d) Symptoms of infection	
	2.2	Virus-plant interactions: steps in induction of disease	04
	2.3	Plant satellite viruses and satellite Nucleic acids	02
	2.4	Citrus Tristeza Virus (CTV): Viral structure, Genome,	03

		Host range, Transmission, Symptoms and Control.	
	2.5	Diagnosis and control of viral infections in plants	02
III		Animal Viruses	15
		Study of Structure, replication, life cycle,	
		pathogenesis, transmission, clinical features- Signs &	
		symptoms, diagnosis and control of following viral	
		infections:	
	3.1	Rabies	02
	3.2	Polio	03
	3.3	Hepatitis	04
	3.4	Pox virus, Vaccinia Virus, Orthopox virus, Variola Virus	03
	3.5	HSV and Varicella Zoster	02
	3.6	Epstein Barr & Cytomegalovirus	01
IV		Oncogenic Viruses & Emerging Viral infections	1
	4.1	a) Molecular mechanisms of virally induced	07
		tumor formation by	
		i. RNA tumor viruses (Retroviruses) ii. DNA tumor viruses	
		b) Oncolytic Viruses	
	4.2	Ebola Virus	02
	4.3	Nipah Virus	02
	4.4	Corona Virus	02
	4.5	Methods to deal with emerging viral infections	02

### PRACTICALS: RPSMIC 3P1 (60 CONTACT HRS)

- a) Enrichment of coliphages & phage assay.
- b) One step growth curve.
- c) Induction of lytic cycle.
- d) Chick embryo inoculation.
- e) Case Studies on emerging viral infections.

# Course Code: RPSMIC 302

### Course Title: Immunology

### Academic year 2020-21

### COURSE OUTCOMES:

COURSE OUTCOME	DESCRIPTION
CO 1	Explain the defense mechanisms in the human body against various infectious agents
CO 2	Recall the key players of innate and adaptive immune response
CO 3	Compare the T cell dependent and T cell independent immune responses
CO 4	Integrate the understanding of immune tolerance to distinguish between autoimmune and Immunity Mediated Inflammatory Disease
CO 5	Distinguish between immune tolerance and immune therapy and extend its application to treatment of Cancer
CO 6	Apply the understanding of immunological techniques for analysis of immune responses
CO 7	Critically evaluate the newer methods of vaccine developments
CO 8	Demonstrate the presence of immune cells in human peripheral blood

Course Code	Unit	Course/ Unit Title	Credits Lecture
RPSMIC 302	2SMIC IMMUNOLOGY		04/60
I		Defense against infectious agents	15
		a) Viral infections	4
		b) Bacterial infections	4
		c) Fungal infections	2
		d) Parasitic and worm infections	32
		e) Emerging and re-emerging infections	2
II		Mechanisms of Innate immunity and Acquired Immunity	15
	2.1	Innate Immunity	7
		a) Inflammation	-
		i) Role of cytokines and chemokines in	
		leucocyte recruitment	
		ii) Inflammatory mediators	
		b) Phagocytosis	
		i) Role of PAMP's	
		ii) Soluble pattern recognition molecules	
		iii) TLR's and CLR's	
		c) Evasion of Innate immune mechanisms	
	2.2	Acquired Immunity	8
		a) Molecular basis of diversity of immunoglobulin	
		molecules	
		i) Mechanism of VDJ recombination	
		ii) Other mechanisms of generation of antibody	
		diversity	
		b) Mechanisms of T dependent responses	
		i) Antigen presentation by B cells	
		ii) Formation of germinal centres	
		iii) Somatic hypermutations and class switching	
$\langle \rho \rangle$	X	c) Mechanisms of T independent responses	
		<ol> <li>Types of T independent antigens</li> </ol>	
111		ii) B-1 B cells and Marginal zone B cells	
N		Immune tolerance and Autoimmunity	15
	3.1	Establishment of immune tolerance	6
		a) Central Tolerance, Peripheral Tolerance,	
		Regulatory T cells	
		b) B cell tolerance	
	3.2	Autoimmunity and Immune Linked Inflammatory diseases	7
		a) Autoimmunity	
		i. Spectrum of autoimmune diseases	
		ii. Genetic factors for autoimmunity	
		iii. Induction of autoimmunity	

	4.3	a) Newer approaches to vaccine development	3
		<ul><li>b) Using cytokines and Mab's for Immunotherapy</li><li>c) Plantibodies</li></ul>	
		a) Cancer Immunotherapy	
	4.2	Immunotherapy	4
		antibody-producing mice	
		antibodies- Humanization of mAbs and Human	
		<ul><li>iii. Immunohistochemistry</li><li>b) Methodologies for developing therapeutic</li></ul>	
		ii. Fluorescence-activated cell sorting (FACS)	
		i. Flow Cytometry	
		a) Cellular Techniques	
	4.1	Techniques in Immunology	8
		Vaccines	
IV		Techniques in Immunology, Immunotherapy and	15
		b) Anti-Tumor Immune responses	
		a) Tumor antigens	_
	3.3	Cancer Immunology	2
		v. Treatment of IMID	
		iv. Epidemiology of IMID	
		ii. Inflammation & IMID iii. Genetic basis of IMID	
		i. Definition and examples	
		b) Immune linked inflammatory diseases (IMID)	
		iv. Treatment of autoimmune diseases

### PRACTICALS RPSMIC 3P2 (60 Contact Hrs)

- a) Phagocytosis & Phagocytic index
- b) Collection of human blood & separation of mononuclear cells by Ficoll Hypaque density gradient centrifugation,
- c) Counting of viable cells by trypan blue
- d) Separation of T and B cells
- e) Rocket immunoelectrophoresis
- f) SRID
- g) Demonstration of Flow cytometry
- h) Assignment on modern vaccines

### Course Code: RPSMIC 303

### **Course Title: Food and water Microbiology**

### Academic year 2020-21

### COURSE OUTCOMES:

COURSE OUTCOME	DESCRIPTION
CO 1	Outline the process of production of different fermented foods
CO 2	Construct a cause and effect model system for effective preservation of foods
CO 3	Understand microbiology of modern foods like probiotics, nutraceuticals and dehydrated foods
CO 4	Execute collection, processing and microbiological analysis of food and water samples
CO 5	Implement monitoring protocols for the quality of food and water using principles of HACCP
CO 6	Apply basic knowledge of fermented foods, food preservation, microbial analysis and standards to evaluate current techniques and improvise technology in food manufacturing or bottled water manufacturing units

NHUL ...

### PRACTICALS: RPSMIC3P3 (60 CONTACT HRS)

- a) Microbiological study of fermented foods (Idli batter)
- b) Microbiological load in carrot and apple juice, salad, mayonnaise
- c) Quality Assessment and Analysis of Raw and Pasteurized milk
- d) Film medium for detection of coliforms in water and food
- e) To detect coliform and faecal coliform bacteria in water by the membrane filtration method
- f) Study of efficiency of water purifiers and comparative assessment

### Course Code: RPSMIC 304

# Course Title: Tools and Techniques: Biomolecular analysis Academic year 2020-21

### COURSE OUTCOMES:

COURSE OUTCOME	DESCRIPTION				
CO 1	Understand the principles of various spectroscopic methods				
CO 2	Attribute various applications in biological sciences to the appropriate chromatographic technique				
CO 3	Summarize principle and applications of variants of PCR technique				
CO 4	Recall the basics of electrophoresis technique and apply it to study recent advances of the technique				
CO 5	Explain the use of microscopic and diffraction techniques to study nanostructures				
CO 6	Summarize methods other than microscopy and diffraction to study nanomaterials				
CO 7	Implement the knowledge of various techniques to carryout research project				

Course Code/ Unit	Unit	Course/ Unit Title	Credits/ Lectures	
RPSMIC		TOOLS AND TECHNIQUES:	4/60	
304		<b>BIOMOLECULAR ANALYSIS</b>		
I		Spectroscopic Techniques	15	
		Principle and applications of:		
	1.1	UV-visible spectroscopy	02	
	1.2	IR spectroscopy	02	
	1.3	Atomic Absorption Spectroscopy	02	
	1.4	Raman Spectroscopy	02	
	1.5	Mass spectroscopy	05	
	1.6	Circular Dichroism Spectroscopy	02	
11		Chromatographic Techniques	15	
	2.1	Gas Chromatography	05	
		a) Principle		
		b) Instrumentation		
		c) Operation		
		d) Calibration		
		e) Accuracy		
		f) Applications		
	2.2	High Performance Liquid Chromatography	05	
		a) Principles		
		b) Instrumentation		
		c) Operation		
		d) Calibration,		
		e) Accuracy		
		f) Applications		
	2.3	High Performance Thin Layer Chromatography	02	
		a) Theory of TLC		
		<ul> <li>b) HPTLC: Development, data and results</li> </ul>		
		c) Applications		
$\mathcal{N}$	2.4	Hyphenated techniques	03	
		a) Principle		
2		b) LC-MS		
		c) GC-MS		
111		Molecular Biology Techniques	15	
	3.1	Variations/ Modifications of PCR	05	
		a) Hot- Start PCR,		
		b) Multiplex PCR,		
		c) Nested PCR,		
		d) RT-PCR,		
		e) Broad Range PCR,		
		f) Arbitrarily primed PCR,		

		g) Quantitative PCR,	
		h) Real time PCR	
		i) Touchdown PCR	
		j) Colony PCR	
		k) Digital PCR –Droplet	
		I) Loop mediated isothermal amplification	
	3.2	Hybridization array technology	05
		a) Applications of microarrays in microbiology,	
		b) Microarray platform technologies	
		(oligonucleotide microarrays, cDNA	
		microarrays)	
	3.3	Electrophoresis	05
		a) 2D- Gel Electrophoresis	$\mathbf{V}$
		b) Capillary Electrophoresis	
IV		Microscopy and Nanotechnological	15

### PRACTICALS: RPSMIC3P4 (60 CONTACT HRS)

- a) Research project and Dissertation
- b) Research poster presentation

### Modality of Assessment:

### I) Theory Examination Pattern:

### A) Internal Assessment- 40%- 40 Marks

Sr No	Evaluation type	
1	One Review writing/ Review paper presentation/Research paper	40
	presentation and Assignment / Long Answer/ Case Study or any other	

### B) External Examination- 60%- 60 Marks per paper

- 1. Duration- These examinations shall be of two hours and thirty minutes.
- 2. Theory question paper pattern
  - a. There shall be **five** questions each of **12** marks. On each unit there shall be one question and the fifth question will be based on all the three units.
  - b. All questions shall be compulsory with internal choice within the questions.

Paper pattern:

Question	Options	Marks	Questions based on
Q.1)	Any 2 out of 3	12	Unit 1
Q.2)	Any 2 out of 3	12	Unit 2
Q.3)	Any 2 out of 3	12	Unit 3
Q.4)	Any 2 out of 3	12	Unit 4
Q.5) a)	Any 4 out of 6	04	All four units
Q.5) b)	Any 4 out of 6	04	All four units
Q.5) c)	Any 2 out of 3	04	All four units

	Paper I	Paper II	Paper III	Paper IV
Journal	05	05	05	-
Viva	05	05	05	-
Quiz	05	05	05	-
Laboratory work	35	35	35	
Thesis Writing	-	-	-	30
Research Poster Presentation	-	-	-	20
Total	50	50	50	50

### **II) Practical Examination Pattern**

### Journal

- 1. The students are required to present a duly certified journal for appearing at the practical examination, failing which they will not be allowed to appear for the examination.
- In case of loss of Journal and/ or Report, a Lost Certificate should be obtained from Head/ Coordinator / Incharge of the department; failing which the student will not be allowed to appear for the practical examination.

### Research project work

Candidates are required to present duly certified dissertation report based on the topic of research along with the laboratory notebook containing raw data and make the poster presentation of the research work for evaluation by the examiner.

### **Overall Examination and Marks Distribution Pattern**

Course 301 302 303 304 External External External External Internal Internal Internal Internal Grand total Total Total Total Total 40 400 Theory 60 100 40 60 100 40 60 100 40 60 100 Practicals 50 50 50 50 50 50 50 50 200 -

Semester III

### Course Code: RPSMIC 401 Course Title: Pharmaceutical Microbiology

### Academic year 2020-21

### COURSE OUTCOMES:

COURSE OUTCOME	DESCRIPTION
CO 1	Recall the principles and terminologies used in pharmaceutical industry
CO 2	Design experiments on bioburden determination
CO 3	Execute microbial and sterility testing of pharmaceutical products
CO 4	Monitor the factors which affect the quality of a pharmaceutical product
CO 5	Outline the process of validation and audit validation
CO 6	Apply various softwares used for studying 3D structures of drug and target molecule for drug discovery
CO 7	Critique suitable candidates as potential drugs based on theoretical knowledge
CO 8	Design effective antimicrobial preservation methods for cosmetic products

MARANR

Course	Unit	Course/ Unit Title	Credits/

### PRACTICAL: RPSMIC4P1 (60 CONTACT HRS)

- r) Sterility testing and reporting (as per Pharmacopia)
- s) Preparation of cosmetic product and its stability study
- t) Microbial load in cosmetic product as per IS 14648:2011 w.r.t heterotrophic counts, presence of *Pseudomonas spp, Staphylococci spp, P.acne*
- u) Efficacy testing of preservatives like parabens as per ISO 11930
- v) Performance of an audit of a test with proper documentation

# Course Code: RPSMIC402 Course Title: Advances in Biotechnology Academic year 2020-21

### COURSE OUTCOMES:

COURSE OUTCOME	DESCRIPTION
CO 1	Summarize the prenatal diagnostic techniques used for diagnosing
	genetic disorders.
CO 2	Justify the significance of gene therapy & understand antisense
	technology used for treatment of genetic disorders.
CO 3	Explain the importance of stem cell technology in regenerative
	medicine.
CO 4	Analyze and compare the advanced techniques & its utility for
	detection of pathogens.
CO 5	Evaluate the commercialization potential of fungal strains &
	understand the current trends in fungal biotechnology.
CO 6	Interpret the potential of microalgae in producing biofuels &
	biofertilizers.
CO 7	Explain IPR, traditional bill law, biodiversity law & ethics in
	biological research.
CO 8	Design & execute experiments to harness the commercial potential
$\mathcal{O}_{\mathcal{V}}$	of fungal & algal strains, also to write, read and understand the
6K.	patent claims.

Course Code	Unit	Course/ Unit Title	Credits/ Lectures
RPSMIC 402		ADVANCES IN BIOTECHNOLOGY	04/60
I		Medical Biotechnology	15
	1.1	Diagnostics & therapeutic approach for Genetic disorders	07
		a. Pre- natal diagnosis- Sample collection,	01
		processing, Advantages, disadvantages	
		b. Karyotyping, FISH & PCR	02
		c. Gene Therapy: Vectors, Gene targeting & Tissue	
		Specific Expression	02
		d. Antisense Technology	01
		e. Introduction to Genetic Counselling	01
	1.2	Modern Diagnostic approach for pathogens	05
		a. Optical Tweezer	
		b. 16S rRNA Sequencing	
		c. Spectrometry	
		d. VITEK	
		e. API 20	
		f. FAME	
	4.0	g. BIOLOG	
	1.3	Stem Cell Technology	03
		a. Introduction to Stem cells & types	
		b. Regenerative medicine	
		c. Genomic Reprogramming of cells	
		d. Stem cells in Neurodegenerative disorders	
		e. Stem cells in physiological dysfunctions Eg:	
		Diabetes	
I		Exploring microbes for commercial products (Fungal Biotechnology)	15
	2.1	Introduction Fungal world	02
	2.1	a. An overview of Fungi and fungal activities	νz
		b. Fungal growth and Fungal nutrition	
		c. Mycology: A Neglected Megascience	
	2.2	Genetics of Fungus	02
	<u></u>	a. Fungal Genetics	V2
		b. Fungal Genomics	
	2.3	Fungal Pigments	03
	2.0	a. Genetic basis of pigment production	
		b. Factors affecting pigment production	
		c. Fermentation for pigment synthesis	
		d. Mycotoxins and their replacement	
		e. Relevance of pigments in various fields	

	2.4	Applications of Fungal Biotechnology	04
		a. Metabolic capacities of fungi for bioremediation	
		b. Fungal biomolecules and their Implications	
		c. Fungal Biocatalysts in the textile industry and	
		waste water treatment	
	2.5	Current trends in Fungal Biotechnology	04
		a. Myconanotechnology	
		b. Fungal Antitumor agents	
		c. Production of recombinant Peptides like	
		Peptaibiotics and peptaibols	
III		Exploring microbes for commercial products	15
		(Algal Biotechnology)	
	3.1	The microalgal cell	03
		a. Introduction	
		b. Structural and Morphological features of	
		Microalgae	
		c. Ultrastructure and cell division	
		d. Cell growth and development	
		e. Microalgal systematics	
	3.2	Basic culturing Techniques	03
	0.2	a. Isolation of Microalgae	
		b. Screening of Microalgae for bioactive molecules	
		c. Measurement of Growth Parameters	
		d. Modes of culture	
	3.3	Mass Production of Microalgae: Photobioreactors	03
	3.3	a. Definition of photobioreactors	03
		b. Classification of photobioreactors	
		c. Types of bioreactors	
		d. Tubular photobioreactors	
		e. Flat photobioreactors	
		f. Vertical cylinders and sleeves	
		g. Axenic photobioreactors	
		h. Scale up of photobioreactors	
	3.4	Applications of Algal Biotechnology	03
		a. Microalgae as platforms for Recombinant proteins	
	~	b. Algae as a source of Biofuel	
11		c. Algae as biofertilizer for rice	
N/	3.5	Current trends in Algal Biotechnology	03
XY.		a. Targeted Genetic Modification of Cyanobacteria	
		b. Phylogenomics in Algal research	
IV		IPR and Bioethics Traditional Knowledge &	15
		Biodiversity conservation.	
	4.1	Types of IPR & the Need of IPR in Biotechnology	02
		a. What is IPR?	
		b. Types of IPR: Patents, Trade Marks & Service	
		Marks, Design Registration, Trade Secrets,	
		Geographical indications, Protection of New	

	- Nacal 9 Incidentications, Taskaslam, Transford	
	c. Need & Implications: Technology Transfer, Commercialization, Economic and policy	
	Commercialization, Economic and policy implications	
	d. Global Harmonization: TRIPS Agreement	
4.2	Pre-requisites for patentability, the process & its	03
4.2	Implications	03
	a. Criteria to be fulfilled for Patentability - new/novel,	
	non-obvious/inventive step, useful/capable of	
	industrial application.	
	b. Steps in patentability: Application to the grant of	
	patent	
	c. Implications of IPR in Biotechnology	
4.3	Patentability in Biology: What Can and What Cannot	03
	be patented?	
	a. Indian Scenario of patentability	
	b. Global Scenario of patentability	
	c. Implications in policy making and	
	commercialization due to variables	
4.4	Bioethics: Issues & Perspectives in the discipline of	02
	Microbiology	
	a. Ethics involved while working with	
	Microorganisms	
	b. Bioweapons- an Ethical issue	
	c. Bioethics: An Indian perspective	
4.5	Ethical guidelines for Biomedical research in Human	01
	subjects	
4.6	Safety, ethical, moral implications of Genetic	01
	engineering	
4.7	The protection of Traditional Knowledge Bill, 2016	01
4.8	Biodiversity Law	02
	a. Need for a biodiversity law	
	b. National Guidelines	
	c. International Guidelines

### PRACTICAL: RPSMIC 4P2 (60 CONTACT HRS)

- a) IPR Case studies: An innovative approach to understand IPR & it's Implications.
- b) Case study on Bioethics: An innovative approach to understand bioethics & it's significance.
- c) Study of pigment production & purification from Trichoderma
- d) Isolation and detection of laccase producing fungi
- e) Production, purification and immobilization of fungal amylase.
- f) Culturing microalgae in the lab & studying the effect of growth parameters on its multiplication.
- g) Bioprospecting algae for oils and flavouring compounds
- h) Visit to algal cultivation units

# Course Code: RPSMIC403 Course Title: Emerging areas in Biology II Academic year 2020-21

### COURSE OUTCOMES:

COURSE OUTCOME	DESCRIPTION
CO 1	Demonstrate a basic understanding of epidemiological strategies, study designs and evaluate the data for its statistical relevance.
CO 2	Discuss and understand the strategies to detect & monitor biological agents used for bioterrorism & exemplify the significance of biosecurity.
CO 3	Identify & implement potential solutions for energy needs by evaluating existing & novel biomass to energy technologies
CO 4	Explain and recall the alternative sources for exhaustible fuels in the form of variety of biofuels.
CO 5	Critique the current and emerging trends of enzyme technology & discuss the applications of enzymes.
CO 6	Understand & execute methods for production, purification, characterization & immobilization of enzymes.
CO 7	Discuss & recall the principles & procedure of protein engineering techniques.

### PRACTICALS: RPSMIC3P3 (60 CONTACT HRS):

- a) Case Studies of epidemiological strategies
- b) Internship presentation

### Course Code: RPSMIC 404

### Course Title: Internship

### Academic year 2020-21

### COURSE OUTCOMES:

COURSE OUTCOME	DESCRIPTION
CO 1	Understand how theoretical concepts transpire into application in workplaces like research institutes or industry
CO 2	Comprehend a scientific problem and execute prescribed protocols independently
CO 3	Demonstrate ability to complete tasks on time and record results without fabrication, falsification in prescribed formats
CO 4	Confidently communicate relevant information effectively to supervisors in clear and concise manner, in writing and orally.
CO 5	Capability to work with diverse teams with respect, empathy and understanding
CO 6	Demonstrate competency, integrity and commitment at the workplace

Course Code	Course/ Unit Title	Credits
RPSMIC 404	INTERNSHIP	04
	Internship to research institute/industry	16 weeks
PRACTICAL	S: RPSMIC4P4 (60 CONTACT HRS)	Cliff
nternship rep		S

# PRACTICALS: RPSMIC4P4 (60 CONTACT HRS)

### Modality of Assessment:

### I) Theory Examination Pattern:

### A) Internal Assessment- 40%- 40 Marks

Sr No	Evaluation type					
1	One Review writing/ Review paper presentation/Research paper presentation and Assignment / Long Answer/ Case Study or any other	40				

### B) External Examination- 60%- 60 Marks per paper

- 1. Duration- These examinations shall be of two hours and thirty minutes.
- 2. Theory question paper pattern
  - a. There shall be **five** questions each of **12** marks. On each unit there shall be one question and the fifth question will be based on all the three units.
  - b. All questions shall be compulsory with internal choice within the questions.

Paper pattern:

Options	Marks	Questions based on
Any 2 out of 3	12	Unit 1
Any 2 out of 3	12	Unit 2
Any 2 out of 3	12	Unit 3
Any 2 out of 3	12	Unit 4
Any 4 out of 6	04	All four units
Any 4 out of 6	04	All four units
Any 2 out of 3	04	All four units
	Any 2 out of 3Any 4 out of 6Any 4 out of 6	Any 2 out of 312Any 4 out of 604Any 4 out of 604

### **Theory Examination Pattern- RPSMIC 404:**

### Internship evaluation by guide/ mentor- 60 marks

### Internship report evaluation by internal faculty- 40 marks

### **II) Practical Examination Pattern**

	Paper I	Paper II	Paper III	Paper IV
Viva	05	05	-	
Quiz	05	05	-	
Laboratory work	40	40	-	
Internship presentation	-	-	50	<b>S</b> <sup>×</sup>
Internship report	-	-	.6	50
Total	50	50	50	50

### Journal

- 1. The students are required to present a duly certified journal for appearing at the practical examination, failing which they will not be allowed to appear for the examination.
- In case of loss of Journal and/ or Report, a Lost Certificate should be obtained from Head/ Co-ordinator / In-charge of the department; failing which the student will not be allowed to appear for the practical examination.

### Internship Report

- 1. Candidates are required to present duly certified Internship Report dissertation report based on the topic of Internship
- 2. The students also have to make a PowerPoint presentation of the work done during Internship for evaluation by the examiner.

Course		401 402			403			404					
	Internal	External	Total	Internal	External	Total	Internal	External	Total	Internal (Internship report evaluation by internal Faculty)	External (Internship evaluation by Guide /mentor)	Total	Grand total
Theory	40	60	100	40	60	100	40	60	100	40	60	100	400
Practical	-	50	50	-	50	50	-	50	50	Delle Carlo	50	50	200

### **Overall Examination and Marks Distribution Pattern**
