S. P. Mandali's Ramnarain Ruia Autonomous College

(Affiliated to University of Mumbai)

Syllabus for T.Y

Program: BSc (Microbiology)

Program Code: RUSMIC

(Credit Based Semester and Grading System for academic year 2021–2022)

PROGRAM OUTCOMES

| РО | PO Description |
|------|---|
| | A student completing Bachelor's Degree in Science program will be |
| | able to: |
| PO 1 | Recall and explain acquired scientific knowledge in a comprehensive |
| | manner and apply the skills acquired in their chosen discipline. |
| | Interpret scientific ideas and relate its interconnectedness to various |
| | fields in science. |
| PO 2 | Evaluate scientific ideas critically, analyse problems, explore options |
| | for practical demonstrations, illustrate work plans and execute them, |
| | organise data and draw inferences. |
| PO 3 | Explore and evaluate digital information and use it for knowledge |
| | upgradation. Apply relevant information so gathered for analysis and |
| | communication using appropriate digital tools. |
| PO 4 | Ask relevant questions, understand scientific relevance, hypothesize |
| | a scientific problem, construct and execute a project plan and |
| | analyse results. |
| PO 5 | Take complex challenges; work responsibly and independently, as |
| | well as in cohesion with a team for completion of a task. |
| | Communicate effectively, convincingly and in an articulate manner. |
| PO 6 | Apply scientific information with sensitivity to values of different |
| | cultural groups. Disseminate scientific knowledge effectively for |
| 1671 | upliftment of the society. |
| PO 7 | Follow ethical practices at work place and be unbiased and critical in |
| 27 | interpretation of scientific data. Understand the environmental issues |
| | and explore sustainable solutions for it. |
| PO 8 | Keep abreast with current scientific developments in the specific |
| | discipline and adapt to technological advancements for better |
| | application of scientific knowledge as a lifelong learner |

PROGRAM SPECIFIC OUTCOMES

| PSO | Description |
|-------|---|
| | A student completing Bachelor's Degree in Science program in the subject of Microbiology will be able to: |
| PSO 1 | Recall, explain and summarize basic concepts related to cytology, |
| | biochemistry, physiology, genetics and reproduction of prokaryotes and |
| | compare it with eukaryotes. |
| PSO 2 | Appreciate and exemplify the diversity in the microbial world and evaluate |
| | their ecological role as well as state their significance to humankind. |
| PSO 3 | Understand the basic concepts associated with growth and control of |
| | microorganisms and apply it in pure culture and preservation techniques. |
| PSO 4 | Differentiate, classify and characterize microorganisms based on their |
| | morphological, cultural, biochemical, and molecular properties. |
| PSO 5 | Explore, compare and evaluate the role of microorganisms in different natural |
| | environments as well as plants, animals and humans, and evaluate and |
| | exemplify their interrelationships. |
| PSO 6 | Apply the understanding of microbial processes to diverse science areas |
| | such as medical, industrial, agricultural and food and evaluate their potential |
| | for human well-being, for tackling environmental issues and exploring |
| | sustainable solutions |
| PSO 7 | Recall and explain the nature of biomolecules and metabolic processes; the |
| | role and kinetics of enzymes as well as the thermodynamic laws that drive |
| | these reactions. |
| PSO 8 | Recall the basic working principles of various bioanalytical techniques and |
| | tools and apply them to detect, estimate and structurally evaluate |
| | biomolecules present in the microbial cells. |
| PSO 9 | Understand and explain the nature of genetic material and elaborate the |
| | molecular mechanisms underlying various genetic processes like replication, |
| | transcription, translation, gene transfer and recombination in bacteria; and |
| | explain basic concepts in virology. |
| | |

| PSO 10 | Apply the basics of genetics and molecular biology to understand and evaluate techniques in genetic engineering and also for the use of |
|--------|--|
| | bioinformatic tools for presentation and processing of data. |
| PSO 11 | Recognize and explain the role of microorganisms in different diseases, attribute pathogenesis mechanisms to their properties and extrapolate it to disease diagnosis, treatment and prevention. Outline and recall concepts in epidemiology of diseases. Classify and evaluate different chemotherapeutic agents. |
| PSO 12 | Recall, classify and summarize mechanisms of defense in humans, detail out the functioning of our immune system, correlate it to disease and its prevention and outline its association to health. Apply immunological principles for diagnosis of diseases. |
| PSO 13 | Understand and outline different biochemical mechanisms and their regulation; retrieve and construct biochemical pathways in microbial metabolism of major macromolecules and, recall and integrate the bioenergetics of metabolic reactions. |
| PSO 14 | Evaluate, exemplify and outline the role of microorganisms in different industrial fermentations, summarize technological aspects of bioprocesses, recall knowledge about patents, copyright and regulatory practices and QA. |
| PSO 15 | Demonstrate key practical skills/competencies in working with microbes for their study and use in the laboratory as well as outside, including the use of good microbiological practices. Analyze problems involving microbes, articulate them and devise innovative and creative solutions. |
| PSO 16 | Hypothesize, design experiments, construct experimental plans, execute them and analyze data with a basic understanding of statistics. Demonstrate an ability to be unbiased and critical in interpretation of scientific data |
| PSO 17 | Communicate effectively to express scientific ideas and/or their experimental data in an effective, precise and concise manner. |

Course Title: Microbial Genetics

Academic year 2020-21

| COURSE | DESCRIPTION |
|---------|---|
| OUTCOME | |
| CO 1 | Understand and differentiate between population and |
| | quantitative genetics and compare model organisms used in genetic |
| | studies. |
| CO 2 | Summarize different natural plasmids and transposons |
| | present in prokaryotes and be able to compare and contrast |
| | between different plasmids. |
| CO 3 | Understand the coherence of the molecular mechanisms |
| | involved in DNA replication and outline different enzymes and |
| | proteins associated with both prokaryotic and eukaryotic DNA |
| | replication |
| CO 4 | Identify, interpret and classify mutations in DNA followed by |
| | mechanism of DNA repair |
| CO 5 | Test the effect of mutagens on bacteria and identify mutants |
| CO 6 | Solve and interpret problems based on mapping of bacterial |
| | genes using transformation, transduction and conjugation |
| CO 7 | Retrieving basic concepts of homologous recombination and genetic |
| , DI | exchange among prokaryotes |

Course Title: Medical Microbiology

| COURSE OUTCOME | DESCRIPTION |
|-------------------|--|
| CO 1 | Understand modern alternatives to Koch's postulates |
| CO 2 | Summarize the basic aspects of clinical and diagnostic microbiology and implement bacteriological investigations using good laboratory practices |
| CO 3 | Understand, interpret and explain the coherence between pathogenesis mechanisms of microorganisms, clinical manifestation of disease and prophylactic measures of representative bacterial, fungal and parasitic infections in various organ systems |
| CO 4 | Extrapolate the understanding of representative infections of skin, respiratory system, urinary tract, gastro intestinal tract central nervous system to other infections within the same system |
| CO 5 | Given a few key clinical features, design and execute lab diagnostic procedures for any given pathological specimen and test antibiotic susceptibility of the isolated pathogen |
| CO6 | Differentiate between the different classes of antibiotics on the basis of their mechanism of action |
| C07 | Attribute strategies through which microbes acquire anti-microbial resistance |
| CO8 | Check and evaluate drugs/ antibiotics for their efficacy by demonstrating their action on microorganisms |

| OUTCOME | |
| CO 1 | Understand and execute the process for isolation and strain |
| | improvement of industrially important microorganisms |
| CO 2 | Outline the types and significance of sterilization process in |
| | fermentation industry |
| CO 3 | Design the process of Inoculum development at various levels of |
| | scale-up |
| CO 4 | Understand the assembly and working of typical fermenters and apply |
| | the knowledge to operate fermenters in microbiological industries |
| CO 5 | Understand, attribute and apply methods of recovery and purification |
| | of fermentation products |
| CO 6 | Recall, infer and apply methods in industrial effluent treatment and |
| | correlate it to environment protection |
| CO 7 | Understand and use spectroscopic techniques in Biological analysis |
| 007 | enderstand and use spectroscopic teeriniques in biological analysis |
| CO 8 | Recognize the significant role of different organizations in genesis of |

Owing to the pandemic situation prevailing in 2020 and continuing in 2021, the external examinations (Semester End) may be conducted online as per the instructions/circulars received from the University of Mumbai and Maharashtra State notifications from time to time. The conventional mode of external examination will commence again only after the declaration of normalcy by the Government authorities.

Course Title: Gene Manipulation, Bioinformatics, & Virology

Academic year 2020-21

| COURSE | DESCRIPTION |
|---------|--|
| OUTCOME | $C_{\mathcal{O}}^{v}$ |
| CO 1 | Understand and explain the fundamentals of gene manipulation |
| CO 2 | Implement bioinformatics tools for genetic analysis and structure building |
| CO 3 | Correlate structure and function of important cell components of prokaryotic and eukaryotic cells |
| CO 4 | Recalling and categorising various genes and proteins involved in functioning of prokaryotic and eukaryotic structures |
| CO 5 | Summarizing the structure, classification, enumeration, cultivation and life cycle of viruses. |
| CO 6 | Recognise and compare the commonly used terms like cancer, prions, viroids and their replication mechanisms |
| CO 7 | Independently illustrate regulation of lytic and lysogenic pathway of lambda phage |
| CO 8 | Test the presence of coliphages and execute experiments for their enumeration |

COURSE OUTCOMES:

| COURSE | DESCRIPTION |
|---------|---|
| OUTCOME | |
| CO 1 | Categorize lipids into different classes based on their structure |
| CO 2 | Map the steps in the biochemical pathway for metabolism of lipids |
| CO 3 | Outline pathways for biochemical synthesis, degradation and |
| | recycling of nucleic acids |
| CO 4 | Explain mechanisms of catabolism of protein and synthesis of amino |
| | acid synthesis in the cell |
| CO 5 | Compare and contrast between various levels of metabolic regulation |
| CO 6 | Explain process of prokaryotic photosynthesis and attribute it to |
| | photosynthetic pigments, photochemical apparatus and light and dark |
| | reactions |
| CO 7 | Compare and contrast metabolism of different inorganic compounds |
| | and outline the concept of Lithotrophy |
| CO 8 | Execute and implement enzyme assays and testing of metabolic |

B. External Examination- 60%- 60 Marks per paper

Semester End Theory Examination:

- 1. Duration These examinations shall be of two hours duration.
- 2. Theory question paper pattern:
 - a. There shall be four questions each of 15 marks on each unit.
 - b. All questions shall be compulsory with internal choice within the questions.
