# Graduate Attributes

S. P. Mandali's Ramnarain Ruia Autonomous College has adopted the Outcome Based Education model to make its science graduates globally competent and capable of advancing in their careers. The Bachelors Program in Science also encourages students to reflect on the broader purpose of their education.

| Graduate Attributes | Graduate Attributes Description<br><br>A student completing Bachelor's Degree in Science program will be able to: |
|---|---|
| **Graduate Attributes- I** | Recall and explain acquired scientific knowledge in a comprehensive manner and apply the skills acquired in their chosen discipline. Interpret scientific ideas and relate its interconnectedness to various fields in science. |
| **Graduate Attributes- II** | Evaluate scientific ideas critically, analyses problems, explore options for practical demonstrations, illustrate work plans and execute them, organise data and draw inferences |
| **Graduate Attributes- III** | Explore and evaluate digital information and use it for knowledge upgradation. Apply relevant information so gathered for analysis and communication using appropriate digital tools. |
| **Graduate Attributes- IV** | Ask relevant questions, understand scientific relevance, hypothesize a scientific problem, construct and execute a project plan and analyze results. |
| **Graduate Attributes- V** | Take complex challenges, work responsibly and independently, as well as in cohesion<br><br>with a team for completion of a task. Communicate effectively, convincingly and in an articulate manner. |
| **Graduate Attributes- VI** | Apply scientific information with sensitivity to values of different cultural groups. Disseminate scientific knowledge effectively for upliftment of the society. |
| **Graduate Attributes- VII** | Follow ethical practices at work place and be unbiased and critical in interpretation of scientific data. Understand the environmental issues and explore sustainable solutions for it. |
| **Graduate Attributes- VIII** | Keep abreast with current scientific developments in the specific discipline and adapt to technological advancements for better application of scientific knowledge as a lifelong learner |

# PROGRAM OUTCOMES

| PO | Description<br><br>**A student completing Bachelor's Degree in Science program in the subject of Physics will be able to:** |
|---|---|
| **PO 1** | To demonstrate fundamental and procedural knowledge related to different areas of study in Physics including mechanics, optics, modern physics, thermodynamics, electronics, electrodynamics at a level attuned with graduate programs in physics at peer institutions |
| **PO 2** | To demonstrate comprehensive, quantitative and conceptual understanding of the core areas of physics. |
| **PO 3** | To apply the principles and acquired skill-set related to physics, to handle innovative and unfamiliar problems, so that effective solution or strategy to deal with, could be developed. |
| **PO 4** | To explore and deduce quantitative results in the extents of physics. |
| **PO 5** | To use contemporary experimental apparatus and analysis tools to acquire, analyse and interpret scientific data in the extents of physics. |
| **PO 6** | To communicate scientific results effectively in presentations or posters in the extents of physics to both the scientists and public at large. |
| **PO 7** | Utilize acquired ICT skills, physics practical skills, mathematical skills to prepare for employment, for advancement of a career path and also for lifelong learning in Physics. |

**COURSE OUTCOMES:**

| COURSE OUTCOME | DESCRIPTION<br><br>A student completing this course will be able to: |
|---|---|
| **CO 1** | Understand the concepts of Center of Mass and Linear momentum. Apply it to two- and three-dimensional objects. Apply Newton's Second Law to the motion of system of particles |
| **CO 2** | Distinguish between all types of collisions. Apply the conservation of momentum for an isolated one-dimensional collision to relate the initial momenta of the objects to their momenta after the collision. Identify that in an isolated system, the momentum and velocity of the center of mass are not changed even if the objects collide. |
| **CO 3** | Apply the conservation laws for both the total energy and the net momentum of the colliding bodies, for isolated elastic collisions in one dimension. |
| **CO 4** | Distinguish between wave equation and Schrodinger's wave equation to find out transition from classical Physics to Quantum Physics in order to explain physics at the level of atom. |
| **CO 5** | Identify practical methods for the different processes like Isothermal, Isochoric, Adiabatic, Reversible and irreversible etc. by taking into account various thermodynamic parameters. |
| **CO 6** | Acquire knowledge of the Entropy, Principle of increase in entropy and variation of Entropy of a gas. |
