

# S.P. Mandali's Ramnarain Ruia Autonomous College (Affiliated to University of Mumbai)

Syllabus for UG

## **Program: B.Sc. (Physics)**

## **Program Code: RUSPHY**

(Choice Based Credit System for the academic year 2023-24)

## **Graduate Attributes**

S. P. Mandali's Ramnarain Ruia Autonomous College has adopted the Outcome Based Education model to make its science graduates globally competent and capable of advancing in their careers. The Bachelors Program in Science also encourages students to reflect on the broader purpose of their education.

Graduate	Graduate Attributes Description
Attributes	A student completing Bachelor's Degree in Science program will be able to:
Graduate	Recall and explain acquired scientific knowledge in a comprehensive manner
Attributes- I	and apply the skills acquired in their chosen discipline. Interpret scientific
	ideas and relate its interconnectedness to various fields in science.
Graduate	Evaluate scientific ideas critically, analyses problems, explore options for
Attributes- II	practical demonstrations, illustrate work plans and execute
	them,organise data and draw inferences
Graduate	Explore and evaluate digital information and use it for knowledge
Attributes- III	upgradation. Apply relevant information so gathered for analysis and
	communication using appropriate digital tools.
Graduate	Ask relevant questions, understand scientific relevance, hypothesize a scientific
Attributes- IV	problem, construct and execute a project plan and analyze results.
Graduate	Take complex challenges, work responsibly and independently, as well as in
Attributes- V	cohesion
	with a team for completion of a task. Communicate effectively, convincingly
Graduate	and in an articulate manner. Apply scientific information with sensitivity to values of different cultural
Attributes- VI	groups.Disseminate scientific knowledge effectively for upliftment of the society.
	<u> </u>
Graduate	Follow ethical practices at work place and be unbiased and critical in interpretation of scientific data. Understand the environmental issues and
Attributes- VII	explore sustainable solutions for it.
Graduate	Keep abreast with current scientific developments in the specific discipline and
Attributes- VIII	adapt to technological advancements for better application of scientific
	knowledge as a lifelong learner

## **PROGRAM OUTCOMES**

PO	Description
	A student completing Bachelor's Degree in Science program in the
	subject of Physics will be able to:
PO 1	To demonstrate fundamental and procedural knowledge related to different areas of study in Physics including mechanics, optics, modern physics, thermodynamics, electronics, electrodynamics at a level attuned with graduate programs in physics at peer institutions
PO 2	To demonstrate comprehensive, quantitative and conceptual understanding of the core areas of physics.
PO 3	To apply the principles and acquired skill-set related to physics, to handle innovative and unfamiliar problems, so that effective solution or strategy to deal with, could be developed.
PO 4	To explore and deduce quantitative results in the extents of physics.
PO 5	To use contemporary experimental apparatus and analysis tools to acquire, analyse and interpret scientific data in the extents of physics.
PO 6	To communicate scientific results effectively in presentations or posters in the extents of physics to both the scientists and public at large.
PO 7	Utilize acquired ICT skills, physics practical skills, mathematical skills to prepare for employment, for advancement of a career path and also for lifelong learning in Physics.

## S.P. Mandali's

## **Ramnarain Ruia Autonomous College**

(Affiliated to University of Mumbai)

## Syllabus for UG

## Program: B.Sc. (Physics)

## **Program Code: RUSPHY**

(Credit Based Semester and Grading System for academic year 2023–2024)

### Course Code: RUSPHY301

## **Course Title:** Mechanics and thermodynamics

### Academic year 2023-24

#### **Course Outcomes:**

After successful completion of this course, a student will be able to:

CO1: Understand the concepts of mechanics & properties of matter, how to apply them to problems.

CO2: Comprehend the basic concepts of thermodynamics & its applications in physical situations.

CO3: Learn about physical conditions in a system at low temperature.

CO4: Demonstrate problem-solving skills in all above areas

Course	Unit	Title	Credits/
Code		$O_{X}$	lectures
RUSPHY 301		Mechanics and thermodynamics	2 credits
Unit I	I	Mechanics	15 lectures
63M		Torque Acting on a Particle, Angular Momentum of a Particle, Angular Momentum of System of Particles, and total angular momentum with respect to CM coordinates. Conservation of Angular Momentum.—6 lectures <b>Halliday and Resnick -Physics part I</b> <b>12.1, 12.2, 12.3, 13.4</b> <b>Compound pendulum</b> : Expression for period, maximum and minimum time period, centers of suspension and oscillations, reversible compound pendulum. Kater's reversible pendulum, Advantages of a compound pendulum over a simple pendulum; Problems from all topics-4 lectures <b>HP: 9.1.1 (pages 279 to 289)</b> <b>Lagrange's equations</b> , Lagrange's equations: D'Alembert's principle, Generalized coordinates, Lagrange's equations using D'Alembert's principle, Examples 5 lectures KRS: Art. 9.1 to 9.6; G:1.4	

Unit II		Thermal Physics & Statistical Physics	15 lectures
		(Review of Zeroeth and first law of thermodynamics) Heat engine, Carnot's cycle, Second law of Thermodynamics, Statement, Equivalence of Kelvin & Planck Statement, Carnot's Theorem, Reversible & Irreversible Process, Absolute scale of Temperature 7 lectures <b>ABG: 7.1,7.2,7.3,7.5, 7.5.1, 7.6, 7.7, 7.8</b>	20
		Statistical Physics Description of a system: Why statistical approach, Particle-states, System-states, Microstates and Macrostates of a system, Equilibrium and Fluctuations, Irreversibility, The equi-probability postulate, Statistical ensemble, Number of states accessible to a system, Phase space, Reversible processes.—8 lectures LG: 1.1 to 1.11	
Unit III		Heat, Thermodynamics & Statistical Physics	15 lectures
	"	Third law of thermodynamics, Nernst heat theorem, Consequences of the third law, Maxwell's thermodynamic relations, Clausius – Clapeyron equation. <b>ABG: 10.12, 10.12.1, 10.12.2 BS: 6.3, 6.11</b> Steam engine, Rankin cycle <b>ABG: 11.2, 11.3</b> Low temp Physics: Different methods of liquefaction of gases, methods of freezing mixtures, Cooling by evaporation under reduced pressure, cooling by adiabatic expansion. <b>BS: 7.1, 7.2, 7.3, 7.4</b> Joule - Thompson effect, JT effect of Van der Waal's	

- 1. Resnick and Halliday : Physics I
- 2. Mechanics H. S. Hans and S. P. Puri, Tata McGraw Hill (2nd ED.)
- 3. Mechanics by Keith R. Symon (KRS)
- 4. Thermal Physics, AB Gupta and H. Roy, Book and Allied (P) Ltd, 2009.
- 5. Heat thermodynamics and Statistical Physics, Brijlal, N. Subramanyam, P. S. Hemne, S. Chand, edition 2007.
- 6. Statistical & Thermal Physics by S. Lokanathan & R. S Gambhir (LG)
- 7. Thermal Physics: Philip M. Morse (W.A. Benjamin Inc. New York)
- 8. Heat & Thermodynamics: Robert and Miller (ELBS)

### Course Code: RUSPHY302

### Course Title: Vector calculus, Analog and Digital Electronics

### Academic year 2023-24

#### **Course Outcomes:**

After successful completion of this course, a student will be able to:

CO1: Understand the basic concepts of mathematical physics and their applications in physical situations.

CO2: Understand the basic laws of electrodynamics and be able to perform calculations using them.

CO3: Understand the basics of transistor biasing, operational amplifiers, their applications.

CO4: Understand the basic concepts of oscillators and be able to perform calculations using them.

Course	Unit	Title	Credits/
Code			lectures
RUSPHY 302		Vector calculus, Analog and Digital Electronics	2 credits
Unit I		Vector Calculus	15 lectures
		Line, Surface and Volume Integrals, The Fundamental Theorem of Calculus: The Fundamental Theorem of Gradient, The Fundamental Theorem of Divergence, The Fundamental Theorem of Curl (Statement and Geometrical interpretation is included, Proof of these theorems are omitted). Problems based on these theorems are required to be done. DG: 3.1, 3.2, 3.3, 3.4, 3.5 Curvilinear Coordinates: Spherical Coordinates, Cylindrical Coordinates DG: 4.1, 4.2	
Unit II	II	Analog Electronics	15 lectures

	General amplifier characteristics: Concept of amplification, amplifier notations, current gain, Voltage gain, power gain, input resistance, output resistance, general theory of feedback, reasons for negative feedback, loop gain. <b>AM: 7.1, 7.2, 7.3, 7.4, 7.5, 7.6, 7.7, 17.1, 17.2, 17.3</b> <b>SC: 9.3, 9.4</b> <b>JFET,MOSFET:-</b> Field Effect Transistors: JFET: Basic ideas, Drain Curve, The trans-conductance curve, Biasing in the ohmic region and the active region, Trans-conductance, JFET common source amplifier, JFET analog switch, multiplexer, voltage controlled resistor, Current sourcing. MOSFET: Depletion and enhancement mode, MOSFET operation and characteristics, digital switching. MB: Art. 13.1 to 13.9, 14.1, 14.2, 14.4, 14.6.	
Unit III	Analog and Digital Electronics	15 lectures
III	Oscillators: Introduction, effect of positive feedback. Requirements for oscillations, phase shift oscillator, Wien Bridge Oscillator, Colpitt's oscillator. <b>MM: 14.1 to 14.11, 14.13, 14.14.</b> <b>Operational Amplifiers</b> : AC analysis, Bandwidth of an OPAMP, Slew rate, Frequency Response of an OPAMP, OPAMP with Negative feedback, Summing Amplifier, Applications of Summing amplifier, OPAMP Integrator and Differentiator, Comparator <b>Digital Electronics</b> Flip-flops and counters: R-S flip flops, Clocked R-S, D Flip flop, J K Master slave flip flop, counters: Synchronous and Asynchronous: 3 bit ripple up counter, mod-3. <b>Digital Principles and Applications – Donald Leach, A</b> <b>Malvino, Goutam Saha (13th Edition): 8.1, 8.2,8.5, 8.8 , 10.1</b> 555 Timer: Block diagram, Monostable and Astable Operation <b>Electronic Principles – A. P Malvino and D. J Bates (7th</b> Ed.): 23.7, 23.8, 23.9	

- 1. Introduction to Electrodynamics 3rd Ed by D.J. Griffith
- 2. Principles of Electronics V. K. Mehta and Rohit Mehta. (S. Chand Multi-colored illustrative edition)
- 3. Electronic devices and circuits An introduction Allan Mottershed (PHI Pvt. Ltd.– EEE Reprint 2013)

### Course Code: RUSPHY303

## Course Title: Applied Physics – I

### Academic year 2023-24

#### **Course Outcomes:**

After successful completion of this course, a student will be able to:

CO1: appreciate the role of Physics in 'interdisciplinary areas related to Materials, Nanosciences, Biophysics, Acoustics.

CO2: understand the scope of the subject in Industry & Research. Experimental learning opportunities will expedite creative thinking.

CO3: Understand the importance of instrumentation in biological sciences.

CO4: Understanding the method for solving the numerical which is based on above concepts.

Course	Unit	Title	Credits/

#### **RUSPHYP03 – Physics Laboratory Course**

The S.Y.B.Sc. Syllabus integrates the regular practical work with a series of demonstration and skill experiments. During the teaching and examination of Physics laboratory work, simple modifications of experimental parameters may be attempted. Attention should be given to basic skills of experimentation which include:

- i) Understanding relevant concepts
- ii) Planning of the experiments
- iii) Layout and adjustments of the equipment
- iv) Recording of observations and plotting of graphs
  - Calculation of results and estimation of possible errors in the observation of results
- Note: Exemption of two experiments from section A and / or B and / or C may be given if student carries out any one of the following activity.
  - Execute a mini project to the satisfaction of teacher in-charge of practical
- Each experiment will be of three hours' duration. Minimum 5 from each group A/B/C and in all minimum 15 experiments from three groups A+B+C must be reported in certified journal along with 9 skill experiments
- > All the skill experiments are required to be completed compulsorily.
- Internal component of Practical examination Evaluation is based on regular experiments and skill experiments.
- A learner will be allowed to appear for the semester end practical examination only if he/she submits a certified journal of Physics (9 Skill experiments and 15 regular experiments for certified Journal)
- For external practical examination, the learner will be examined in three experiments (one from each group)

#### MODALITY OF ASSESSMENT SEM---III

#### Theory Examination Pattern:

#### A) Internal Assessment (40% of 100 marks) = 40 marks.

Theory Paper- Paper code	Internal test marks	Assignment	Marks distribution	Total Marks per paper
Mechanics & Thermodynamics RUSPHY301	20	15 questions on units1,2,3	Assessment- 15 Viva on it05  Total= 20 mark	40
Vector calculus, Analog and Digital Electronics RUSPHY302	20	15 questions on units1,2,3	Assessment- 15 Viva on it05  Total= 20 mark	40
Applied Physics- I RUSPHY303	20	15 questions on units1,2,3	Assessment- 15 Viva on it05  Total= 20 mark	40

B) Inter	nal test pattern (half an hour test )	
Questions	options	Marks
Q.1	20 objective questions, all compulsory, each question with 4 options; (half mark each)	10
Q.2	Attempt any two numerical out of four.(3 marks each)	06
Q.3	Attempt any one numerical out of two.(4 marks each)	04
	Total marks	20

#### C) External examination - 60 % of 100 marks = 60 MARKS, Semester End Theory Question paper of 60 marks

I. These examinations shall be of **2 hours** duration.

II. Paper Pattern: All questions shall be compulsory with internal choice within.

Questions	Options	Marks	Questions on
Q.1)A)	Any 2 out of 4	14	Unit I
Q.1)B)	Any 1 out of 2	01	
Q.2)A)	Any 2 out of 4	14	Unit II
Q.2)B)	Any 1 out of 2	01	
Q.3)A)	Any 2 out of 4	14	Unit III
Q.3)B)	Any 1 out of 2	01	
Q.4)A)	Any 1 out of 2	5	Unit I
Q.4)B)	Any 1 out of 2	5	Unit II
Q.4)C)	Any 1 out of 2	5	Unit III
Total marks		60	

#### Practical Examination Pattern:

#### (A) Internal Examination:

Sr. No.	Activity	Practical- Group-A (Marks)	Practical- Group-B (Marks)	Practical- Group-C (Marks)
1.	Continuous Assessment (1.5 marks per experiment/ 5 regular and 3 skill experiment)	12	12	12
2.	Main Journal (one mark per experiment for 5 regular and 3 skill experiment)	8	8	8
	Total (=1 + 2)	20	20	20
	9 Skill experiments required for certified 15 Main experiments required for certifie		02	

## (B) External (Semester-end practical examination):

Particulars	Practical-Group-A (Marks)	Practical-Group-B (Marks)	Practical-Group-C (Marks)
Laboratory work	25	25	25
Viva	5	5	5
Total	30	30	30

#### PRACTICAL BOOK/JOURNAL

The students are required to present a duly certified journal for appearing at the practical examination, failing which they will not be allowed to appear for the examination. In case of loss of Journal and/ or Report, a Lost Certificate should be obtained from Head of the department / laboratory In-charge of the respective class by presenting working(rough) journal to the HOD. If the student did not present such lost certificate at the practical examination, he/she will not be allowed to appear for the practical examination.

#### **Overall Examination and Marks Distribution Pattern- Semester-III**

#### **Course Title: Optics, Applied-Optics**

#### Academic year 2023-24

#### **Course Outcomes:**

After successful completion of this course, a student will be able to:

CO1: Acquire knowledge of diffraction optical phenomenon and types-Fresnel and Fraunhofer. Apply Huygens's half period zone theory to diffraction caused by different optical devices.

CO2: Understand the basics of polarization, different methods of its production.

CO3: Demonstrate application of Polarization in practical devices such as half wave plate and quarter wave plate. Work out analysis of polarized light using polarizer and wave plates and evaluate polarization status of light beam.

CO4: Understand concept of interference and its application in Michelson interferometers. With application of evaluation of thickness of thin optical plate, refractive index change.

CO5: Understanding Principles of optics applied to develop fiber optic sensors, nonreflecting and high reflecting thin films, grating structure in optical fiber which are of immense use both in Research and Industry.

## Course Code: RUSPHY402

## **Course Title: Introduction to Quantum Mechanics**

#### Academic year 2023-24

#### **Course Outcomes:**

After successful completion of this course, a student will be able to:

CO1: Understand the postulates of quantum mechanics and to understand its importance in explaining significant phenomena in Physics.

CO2: Formulate the Schrodinger time independent and dependent equations.

CO3: Understand the different operators and Commutator brackets in quantum mechanics.

CO4: Recognize the application of Schrodinger steady state equation, and understand the basics of infinite potential-well, particle in cube.

CO5: Understand quantum treatment to atomic phenomenon such as- Barrier potential, Tunneling effect, Step potential

Course	Unit	Title	Credits/
Code			lectures
RUSPHY 402		Introduction to Quantum Mechanics	2 credits
Unit I		Quantum Mechanics	15 lectures
Rau	(C)	<ul> <li>Probability current density, equation of continuity, and its physical significance</li> <li>Definition of an operator, Eigen value and Eigen function</li> <li>Operators in Quantum Mechanics –Position,</li> <li>Momentum, and total energy (Hamiltonian) operators</li> <li>Basic Commutator Algebra in Quantum Mechanics</li> <li>Commutator brackets using position and momentum operators</li> <li>Expectation Values , Problems from all topics.</li> <li>Reference:</li> <li>SPS: 4.9 MJ: 6.1 to 6.8</li> </ul>	
Unit II	11	Applications of Schrodinger's Steady State Equation:	15 lectures

		Particle in an infinitely deep potential well (in detail – its relation with Heisenberg's uncertainty principle), Particle in a cube, Step potential, free particle, barrier potential and tunneling- infinitely deep potential well, concepts of cube, step potential, free particle, barrier potential and tunneling (no mathematical formulations required) Problems from all topics <b>References:</b> SPS: 5.1 to 5.6, 6.1 to 6.3 MJ: 6.9, 7.1 to 7.4 GA: 4.1 to 4.3	30
Unit III		Schrödinger's equation and Hydrogen Atom	15 lectures
		Schrödinger's equation for one dimensional Harmonic oscillator, its solution by operator method. Graphical representation of its energy level and wave functions. <b>PTM: 5.2; AB: 8.7</b> Hydrogen atom: Schrödinger's equation for Hydrogen atom, Separation of variables, Quantum Numbers: Total quantum number, Orbital quantum number, Magnetic quantum number. Angular momentum, Electron probability density (Radial part) <b>AB_2: 9.1 to 9.9</b>

## **Course Code: RUSPHY403**

### Course Title: Applied Physics – II

#### Academic year 2023-24

#### **Course Outcomes:**

After successful completion of this course, a student will be able to:

CO1: appreciate the role of Physics in interdisciplinary areas related to Nano-sciences, Nanomaterials, control electronic instrumentation.

CO2: learn physical, chemical, and biological methods of synthesis of nanomaterials.

CO3: will understand the scope of Analysis Techniques used regularly in material science.

CO4: will explore the scope of the subject in Industry & Research

CO5: will understand the scope of the subject of Microprocessors.

Course	Unit	Title	Credits/	
Code			lectures	
RUSPHY403		Applied Physics – II	2 credits	
Unit I		Synthesis of Nanomaterials	15 lectures	
Roll	6	<ul> <li>Synthesis of Nano-materials – Physical Methods: Introduction, Mechanical Methods – High Energy Ball Milling, Melt Mixing; Methods based on Evaporation – Physical, Vapor Deposition, Ionized cluster beam deposition, Ablation (laser vaporization), Laser Pyrolysis, Chemical Vapor Deposition</li> <li>SK: 3.1, 3.2. 3.2.1, 3.2.2, 3.3, 3.3.1, 3.3.2, 3.3.3, 3.3.4, 3.5</li> <li>Synthesis of Nano-materials – Chemical Methods Introduction, Colloids &amp; Colloids in Solution, Nucleation&amp; Growth of Nanoparticles, Langmuir-Bodgett (LB) Method, Micro-emulsions, Sol-Gel Method</li> <li>SK: 4.1, 4.2, 4.3, 4.6, 4.7, 4.8</li> </ul>		

## ED OVI I ADUO

		Synthesis of Nanomaterials – Biological Methods Introduction, Synthesis using Microorganisms, Synthesis using Plant extracts, Use of Proteins, Templates like DNA, S-Layers, etc., Synthesis of Nanoparticles using DNA SK: 5.1, 5.2, 5.3, 5.4, 5.5	
Unit II	II	Analysis Techniques	15 lectures
		Introduction, Microscopes, Electron Microscope – Scanning Electron Microscope (SEM), Transmission Electron Microscope (TEM), Diffraction Techniques – X- Ray Diffraction (XRD), Atomic Scattering Factor, Bragg's Law of Diffraction, Diffraction from different types of Samples. SK: 7.1, 7.2, 7.3, 7.3.1, 7.3.2, 7.5, 7.5.1, 7.5.2, 7.5.3, 7.5.4	30
Unit III		Microprocessors	15 lectures
		<ul> <li>8085 Microprocessor and Basic Assembly Language Programming</li> <li>Introduction, Historical Perspective, Organization of a Microprocessor Based system, how does the Microprocessor works, Machine Language, Assembly Language, High Level Languages, Writing and executing an Assembly Language Program.</li> <li>RG: 1.1, 1.1.2, 1.1.3, 1.2 (omit 1.2.4)</li> <li>8085 Bus Organization, 8085 Programming Model, The 8085 Microprocessor, Pin connection diagram and function of each pin, A detailed look at 8085 Microprocessor.</li> <li>RG: 3.1.1, 2.1.1, 2.1.2, 4.1.1, 4.1.2, 4.1.3, 4.1.4, 4.1.5 Basic definitions: Instruction, Op-code, operand. Instruction word Size, instruction Format, data format, Addressing Modes, The 8085 Instruction Set(Classification) Data transfer Operations, Arithmetic</li> </ul>	

1. Sulabha Kukarni – Nanotechnology Principles and Practices (SK)

2. Microprocessor Architecture, programming and Applications with 8085 - Ramesh Gaonkar, 5th Edition, Prentice Hall of India (RG)

#### **RUSPHYP04 – Physics Laboratory Course**

The S.Y.B.Sc. Syllabus integrates the regular practical work with a series of demonstration and skill experiments. During the teaching and examination of Physics laboratory work, simple modifications of experimental parameters may be attempted. Attention should be given to basic skills of experimentation which include:

- vi) Understanding relevant concepts
- vii) Planning of the experiments
- viii) Layout and adjustments of the equipment
- ix) Recording of observations and plotting of graphs
- x) Calculation of results and estimation of possible errors in the observation of results
- Note: Exemption of two experiments from section A and / or B and / or C may be given if student carries out any one of the following activity.
  - Execute a mini project to the satisfaction of teacher in-charge of practical
- Each experiment will be of three hours' duration. Minimum 5 from each group A/B/C and in all minimum 15 experiments from three groups A+B+C must be reported in certified journal along with 9 demo experiments
- > All the demonstration experiments are required to be completed compulsorily.
- Internal component of Practical examination Evaluation is based on regular experiments and demo- experiments.
- A learner will be allowed to appear for the semester end practical examination only if he/she submits a certified journal of Physics (9 Demonstration experiments and 15 regular experiments for certified Journal)
- For external practical examination, the learner will be examined in three experiments (one from each group)

RUSPHP04	USPHP04 PRACTICALS-Group-A						
		1. Flat spiral spring (n)					
		2. Young's modulus by Koenig's method.					
	0	3. Optical fiber: transmission of signal					
2		4. Brewster's/ Malus's law verification					
00		5. R.P. of grating					
		6. Cylindrical obstacle: determination of $\lambda$					
		7. Single slit diffraction

## MODALITY OF ASSESSMENT- SEM IV

#### Theory Examination Pattern:

A) Internal Assessment (40% of 100 Marks) = 40 Marks.

Theory Paper- Paper code	Internal test marks	Assignment	Marks distribution	Total Marks per paper
Optics, Applied optics RUSPHY401	20	15 questions on units1,2,3	Assessment- 15 Viva on it05  Total= 20 mark	40
Introduction to Quantum Mechanics RUSPHY402	20	15 questions on units1,2,3	Assessment- 15 Viva on it05  Total= 20 mark	40
Applied Physics- II RUSPHY403	20	15 questions on units1,2,3	Assessment- 15 Viva on it05  Total= 20 mark	40

#### B) Internal test pattern (half an hour test )

Questions	options	Marks
Q.1	20 objective questions, all compulsory, each question with 4 options; (half mark each )	10
Q.2	Attempt any two numerical out of four.(3 marks each)	06
Q.3	Attempt any one numerical out of two.(4 marks each)	04
0.0	Total marks	20

#### C) External examination - 60 % of 100 marks = 60 Marks

#### Semester End Theory Assessment - 60 marks

- I. Duration These examinations shall be of **2 hours** duration.
- II. Paper Pattern: All questions shall be compulsory with internal choice within.

QuestionsOptionsMarksQuestions on
-----------------------------------

Q.1)A)	Any 2 out of 4	14	Unit I
Q.1)B)	Any 1 out of 2	01	
Q.2)A)	Any 2 out of 4	14	Unit II
Q.2)B)	Any 1 out of 2	01	
Q.3)A)	Any 2 out of 4	14	Unit III
Q.3)B)	Any 1 out of 2	01	0
Q.4)A)	Any 1 out of 2	5	Unit I
Q.4)B)	Any 1 out of 2	5	Unit II
Q.4)C)	Any 1 out of 2	5	Unit III
Total marks		60	

#### **Practical Examination Pattern:**

#### (A) Internal Examination:

(A) Int	cal Examination Pattern: ernal Examination:	no.	0	
Sr. No.	Activity	Practical- Group-A (Marks)	Practical- Group-B (Marks)	Practical- Group-C (Marks)
1.	Continuous Assessment (1.5 marks per experiment/ 5 regular and 3 demo experiment)	12	12	12
2.	Main Journal (one mark per experiment for 5 regular and 3 demo experiment)	8	8	8
	Total (=1 + 2)	20	20	20

#### (B) External (Semester-end practical examination):

Particulars	Practical-Group-A (Marks)	Practical-Group-B (Marks)	Practical-Group-C (Marks)
Laboratory work	25	25	25
Viva	5	5	5

Total	30	30	30

#### PRACTICAL BOOK/JOURNAL

The students are required to present a duly certified journal for appearing at the practical examination, failing which they will not be allowed to appear for the examination

In case of loss of Journal and/ or Report, a Lost Certificate should be obtained from Head of the department / laboratory In-charge of the respective class by presenting working(rough) journal to the HOD. If the student did not present such lost certificate at the practical examination, he/she will not be allowed to appear for the practical examination.

## **Overall Examination and Marks Distribution Pattern**

Course	RUSPHY401 (Marks)			RUSPHY402 (Marks)			RUSPHY403 (Marks)			Total (Marks)
	Internal	External	Total	Int.	Ext.	Total	Int.	Ext.	Total	
Theory	40	60	100	40	60	100	40	60	100	300
Practicals	20	30	50	20	30	50	20	30	50	150

Semester IV

(GRAND TOTAL MARKS= 450)

AC/II(20-21).2.RUS10

## S.P. Mandali's

## **Ramnarain Ruia Autonomous College**

(Affiliated to University of Mumbai)

## Syllabus for T.Y.B.Sc. SEM V & VI

## **Program: B.Sc. (Physics)**

## **Program Code: RUSPHY**

(Credit Based Semester and Grading System for academic year 2023–2024)

### Course Code: RUSPHY501

### **Course Title: Mathematical Methods in Physics, Thermal & Statistical**

**Physics** 

#### Academic year 2023-24

#### **Course Outcomes:**

After successful completion of this course, a student will be able to:

CO1: Understand the scope of statistical concept for solving the equation of thermal mechanics.

CO2: Comprehend the basic concepts of mathematics & its applications in physical sciences

CO3: Evaluate the statistical relation by using the concepts of probability.

- CO4: Demonstrate the thermodynamic relations.
- CO5: Understand the concepts of MB, BE and FD distribution. Comparison of distribution.
- CO6: Understand the concepts by solving the numerical.

COURSE			Credits/
CODE	Unit	TITLE	lectures
RUSPHY501		Mathematical Methods in Physics, Thermal & Statistical Physics	4 credits
		Probability	15 lectures
830		Review of basic concepts: sample space, events, independent events, conditional probability, probability theorems, permutations and combinations, discrete and continuous random variables, binomial distribution, joint distributions and covariance, the normal distribution, the Poisson distribution, statistics and experimental measurements, Chebyshev's inequality, law of large numbers, central limit theorem. <b>MB: Chapter 15</b>	
		Differential Equations	15 lectures
	11	Second-order non-homogeneous linear differential equations with constant coefficients: the method of successive integrations and the method of undetermined coefficients. Forced vibrations and resonance. The Laplace transform and its use in the solution of differential	

		equations CH – Sections 5.2.4, 8.2.1, 8.2.2, 8.2.4 MB – Sections 8.6, 8.8 and 8.9 Fourier series: Introduction, Fourier cosine and sine series, Change of interval, Fourier Integral, Complex form of the Fourier series CH: 7.1, 7.1.1, 7.1.2, 7.1.3, 7.1.4, 7.2. Fourier transforms: Introduction, Formal development of the complex Fourier transform, Cosine and Sine transforms, The transforms of derivatives (with proof) CH: 8.1, 8.2.1, 8.2.2, 8.2.4, 8.2.5, 8.2.6	30
		Statistical & Thermal Physics	15 lectures
		Description of a system: Why statistical approach, Particle-states, System-states, Microstates and Macrostates of a system, Equilibrium and Fluctuations, Irreversibility, The equi-probability postulate, Statistical ensemble, Number of states accessible to a system, Phase space, Reversible processes. <b>LG: 1.1 to 1.11</b> Thermal and Adiabatic Interactions: Thermal interaction, Canonical distribution, Energy fluctuations, Entropy of a system in a heat bath, Helmholtz free energy, Adiabatic interaction and enthalpy, General interaction and the first law of thermodynamics, Infinitesimal general interaction, Gibbs free energy, Phase transitions. <b>LG: 2.1, 2.3 to 2.11</b>	
		Statistical Mechanics and Quantum Statistics	15 lectures
2.	V	Statistical Mechanics :Phase space, The probability of a distribution, The most probable distribution, Maxwell-Boltzmann statistics, Molecular speeds. <b>AB: 15.1 to 15.5</b> Quantum Statistics: Bose-Einstein statistics, Black-body radiation, The Rayleigh-Jeans formula, The Planck radiation formula, Fermi-Dirac statistics, Comparison of results, Transition between states. <b>AB: 16.1 to 16.7</b>	

- 1. Mathematical Methods in the Physical Sciences Mary L. Boas (MB)
- 2. Introduction to Mathematical Physics Charlie Harper (CH)
- 3. Statistical & Thermal Physics by S. Lokanathan & R. S Gambhir (LG)
- 4. Perspectives of Modern Physics Arthur Beiser (AB)

### Course Code: RUSPHY502

## **Course Title: Solid State Physics**

### Academic year 2023-24

#### **Course Outcomes:**

After successful completion of this course, a student will be able to:

CO1: Describe the various aspects related to crystal physics.

CO2: Interpret Electrical properties of metals, Fermi-Dirac statistics and electronic distribution in solids, the Kronig- Penney model, Brillouin zones.

CO3: Describe conductivity related features of electrons and Holes in an Intrinsic Semiconductor, and Hall Effect.

CO4: Describe Diamagnetism and Para-magnetism.

CO5: Analyze Qualitative theory of the p-n junction, temperature dependence of p-n characteristics, Diode resistance.

CO6: Describe phenomenon of Superconductivity and types, effects.

COURSE CODE	Unit	TITLE	Credits/ lectures
RUSPHY502		Solid State Physics	4 credits
		Crystal Physics	15 lectures
231		Revision-Lattice points and space lattice, The basis and crystal structure, Unit Cells and lattice parameters, Primitive Cells. Crystal Systems, Crystal Symmetry, Bravais space lattices, Metallic crystal structures, Relation between the density of crystal material and lattice constant in a cubic lattice, Directions, Planes, Miller Indices, Important planes in simple cubic structure, separation between lattice planes in a cubic crystal, Reciprocal Lattice, X-ray Diffraction <b>SOP: Ch. 4 Art – II, III, IV, V, VI, VII, XIV,XV, XVI, XVI</b>	
		Electrical properties of metals	15 lectures
	II	Electrical properties of metals: Classical free electron theory of metals, drawbacks of classical theory, Relaxation time, Collision time and mean free path, Quantum theory of free electrons, Fermi-Dirac statistics and electronic distribution in solids, Density of energy states and Fermi energy, Heat capacity of the electron gas, Mean energy of electron gas at 0 K	

	SOP: Ch. 6 Art – I to V, XIV, XV, XVII, XVIII	
	Band theory of solids, The Kronig- Penney model (Omit eq. 6.184 to 6.188), Brillouin zones, Number of wave functions in a band, Motion of electrons in a one-	
	dimensional periodic potential, Distinction between metals, insulators and intrinsic semiconductors	
	SOP: Ch. 6 Art – XXXVII, XXXVIII, XXXIX,XXXX, XXXXI	
	Conduction in Semiconductors	15 lectures
	Electrons and Holes in an Intrinsic Semiconductor, Conductivity, Carrier concentrations in an intrinsic semiconductor, Donor and Acceptor impurities, Charge densities in a semiconductor, Fermi level in extrinsic semiconductors, Diffusion, Carrier lifetime, The continuity equation, Hall Effect 2.Magnetic Properties of matter:	
	Diamagnetism and Paramagnetism, The origin of permanent magnetic dipoles, Diamagnetism and Larmor precession, the static paramagnetic susceptibility <b>D: 18.1 to 18.4</b>	
	Diode, magnetism and superconductivity	15 lectures
	Semiconductor-diode Characteristics: Qualitative theory of the p-n junction, the p-n junction as a diode, Band structure of an open-circuit p-n junction <b>MH: 4.1 to 4.10; 5.1, 5.2, 5.3</b>	
IV	The current components in a p-n junction diode, Quantitative theory of p-n diode currents, The Volt- Ampere characteristics, The temperature dependence of p-n characteristics, Diode resistance	
4	MH: 5.4 to 5.8 Superconductivity: survey, Mechanism of Superconductors, Effects of magnetic field, Critical	
	Currents, The Meissner effect, the penetration depth, Type I and Type II Superconductors	
	SOP: Chapter 8: II, III, IV, VI, VII, XII, XIII	

- 1. Solid State Physics: S. O. Pillai, New Age International. 6th Ed. (SOP)
- 2. Electronic Devices and Circuits: Millman, Halkias & Satyabrata Jit. (3rd Ed.) Tata McGraw Hill. (MH)
- 3. Solid State Physics: A. J. Dekker, Prentice Hall(D)

## Course Code: RUSPHY503

## Course Title: Atomic & Molecular Physics

## Academic year 2023-24

#### **Course Outcomes:**

After successful completion of this course, a student will be able to:

CO1: Understand the basic mathematical concepts of vector calculus and applications of them in physical situations.

CO2: Understand the Schrödinger's equations and their application on hydrogen atom.

CO3: Understand the energy level diagrams using hydrogen atom and comprehend understanding of its quantum numbers.

CO4: Understand spin of an electron and its experimental proof with exclusive principle.

CO5: Understand the magnetic effect on the atom and their consequences using quantum and classical theories.

CO6: Understand the Molecular spectra and its effect on various energy levels using Raman effect.

CO7: It enhances the knowledge of modern, quantum and classical aspects for the further studies.

COURSE CODE	Unit	TITLE	Credits/ lectures
RUSPHY503	~?	Atomic & Molecular Physics	4 credits
		Schrödinger's equation and Hydrogen atom	15 lectures
691	I	Schrödinger's equation for Harmonic oscillator, its solution by operator method. Graphical representation of its energy level and wave functions. <b>PTM: 5.2; AB: 8.7</b> Hydrogen atom: Schrödinger's equation for Hydrogen atom, Separation of variables, Quantum Numbers: Total quantum number, Orbital quantum number ,Magnetic quantum number. Angular momentum, Electron probability density (Radial part) <b>AB: 9.1 to 9.9</b>	
	II	Electron Spin	15 lectures

	<ul> <li>Electron Spin: The Stern-Gerlach experiment, Pauli's Exclusion Principle, Symmetric and Antisymmetric wave functions.</li> <li>AB: 10.1, 1.03</li> <li>Spin orbit coupling, Hund's Rule, Total angular momentum, Vector atom model, L-S and j-j coupling.</li> <li>Origin of spectral lines, Selection rules.</li> <li>AB:10.2,10.6,10.7, 10.8, 10.9; 11.1 and 11.2.</li> </ul>	
III	Zeeman effect and Paschen-Back effect Effect of Magnetic field on atoms, Zeeman effect, Earlier discoveries and developments, Experimental arrangement, The normal Zeeman effect and its explanation(Classical and Quantum) HSA: 9.14, 9.15 The Lande g factor, Anomalous Zeeman effect; Paschen- Back effect, Paschen-Back effect of principal series doublet, Selection rules for Paschen-Back effect. HEW: 9.16, 9.17, 10.7, 10.8, 10.9	15 lectures
IV	Molecular Spectra : Molecular Spectra (Diatomic Molecules): Rotational energy levels, Rotational spectra, Vibrational energy levels, Vibrational-Rotational spectra .Electronic Spectra of Diatomic molecules: The Born-Oppenheimer approximation, Intensity of vibrational-electronic spectra: The Franck-Condon principle. AB: 14.1, 14.3, 14.5, 14.7 BM: 6.11, 6.13 Raman Effect: Quantum Theory of Raman Effect, Classical theory of Raman Effect, Experimental Setup of Raman Effect, Applications of Raman Spectroscopy. BM: 4.1.1, 4.1.2	15 lectures

- 1. Introduction to Quantum mechanics P. T Mathews (**PTM**)
- 2. Perspectives of Modern Physics Arthur Beiser (AB)
- Introduction to Atomic & Nuclear Physics Henry Semat& J. R Albright (5<sup>th</sup> Ed) (HSA); Introduction to Atomic Spectra – H. E White (HEW)
- 4. Fundamentals of Molecular Spectroscopy C. N Banwell& E. M McCash (**BM**)

RAMNARAIN RUIA AUTONOMOUS COLLEGE, SYLLABUS FOR TYBSc. PHYSICS 2023-2024

## Course Code: RUSPHY504

### Course Title: Electrodynamics

### Academic year 2023-24

#### **Course Outcomes:**

After successful completion of this course, a student will be able to:

CO1: Understand the basic mathematical concepts of vector calculus and its applications of them in Electrodynamics.

CO2: Understand the penetration of electric and magnetic fields in dielectric material and its practical applications.

CO3: Acquired conceptual understanding of Maxwell's laws and its quantitative interpretations.

CO4: Understand basics of electromagnetic waves and their propagation in material and practical applications in waveguide.

CO5: Explore role of Poynting theorem in energy transport via electromagnetic waves.

CO6: It prepares students for the advanced study of electrodynamics with practical applications in communication and energy transport.

COURSE CODE	Unit	TITLE	Credits/ lectures
RUSPHY504		Electrodynamics	4 credits
		Electrostatics	15 lectures
RUSPHY504	1	Electric Field lines, Flux and Gauss' law, The divergence of E, Applications of Gauss' law, The curl of E. Introduction to potential, Comments on potential, Poisson's equation and Laplace's equation, The potential of a localized charge distribution, Review of Conductors & Faraday's Cage DG: 2.2.1 to 2.2.4, 2.3.1 to 2.3.4. Greiner-1.1,1.2,1.3 First Uniqueness theorem (Without proof), The classic image problem- Infinite conducting plane DG: 3.2.1 to 3.2.3. Greiner—chapter2-Green's theorems, Green's function,	

	Ex 2.1(Image charge problem)	
	Polarisation & Magnetostatics	15 lectures
11	<ul> <li>Dielectrics, Induced Dipoles, Alignment of polar molecules, Polarization, Bound charges and their physical interpretation, Gauss' law in presence of dielectrics, A deceptive parallel, Susceptibility, Permittivity, Dielectric constant, Energy in dielectric systems.</li> <li>DG: 4.1.1 to 4.1.4, 4.2.1, 4.2.2, 4.3.1, 4.3.2, 4.4.1, 4.4.3. Straight-line currents, The Divergence and Curl of B, Applications of Ampere's law in the case of a long straight wire and a long solenoid, Comparison of Magneto-statics and Electrostatics.</li> <li>DG: 5.3.1 to 5.3.4.</li> </ul>	80
	Magnetism & Varying Fields	15 lectures
	<ul> <li>Magnetization, Bound currents and their physical interpretation, Ampere's law in magnetized materials, A deceptive parallel, Magnetic susceptibility and permeability.</li> <li>DG: 6.2.1, 6.2.2, 6.3.1, 6.3.2, 6.4.1.</li> <li>Energy in magnetic fields, Electrodynamics before Maxwell, Maxwell's correction to Ampere's law, Maxwell's equations, Magnetic charge, Maxwell's equations in matter, Boundary conditions.</li> <li>DG: 7.2.4, 7.3.1 to 7.3.6.</li> </ul>	
	Electromagnetic Waves	15 lectures
V	The continuity equation, Poynting's theorem, Newton's third law in electrodynamics. <b>DG: 8.1.1, 8.1.2., 8.2.1.</b> The wave equation for <b>E</b> and <b>B</b> , Monochromatic Plane waves, Energy and momentum in electromagnetic waves, Propagation in linear media, Reflection and transmission of EM waves at normal incidence, Electromagnetic waves in conductors, guided waves-wave guides <b>DG: 9.2.1 to 9.2.3, 9.3.1 to 9.3.2, 9.4.1, 9.5.1</b>	

- 1. Introduction to Electrodynamics by David Griffith (3 rd edition)-Prentice hall of India (DG)
- 2. Introduction to Electrodynamics: A. Z. Capria and P. V. Panat.
- 3. Electricity and Magnetism: Navina Wadhwani

### **RUSPHYP05 – Physics Laboratory Course**

The T. Y. B. Sc. Syllabus integrates the regular practical work with a series of demonstration and skill experiments. During the teaching and examination of Physics laboratory work, simple modifications of experimental parameters may be attempted. Attention should be given to basic skills of experimentation which include:

- xi) Understanding relevant concepts
- xii) Planning of the experiments
- xiii) Layout and adjustments of the equipment
- xiv) Recording of observations and plotting of graphs
- xv) Calculation of results and estimation of possible errors in the observation of results

Regular Physics Experiments: A minimum of 8 experiments from each of the course are to be performed and reported in the journal

Skill Experiments: All the 8 skills are compulsory and must be reported in the journal. Skills will be tested during the examination through viva or practical. The certified journal must contain a minimum of 16 regular experiments (8 from each group), with all 8 Skills in semester V.

A separate index and certificate in journal is must for each semester course. There will be two turns of three hours each for the examination of practical courses

- Internal component of Practical examination Evaluation is based on regular experiments and skill experiments.
- For external practical examination, the learner will be examined in two experiments (one from each group)
- A learner will be allowed to appear for the semester end practical examination only if he submits a certified journal of Physics

## MODALITY OF ASSESSMENT – SEM V

#### Theory Examination Pattern: -

#### A) Internal Assessment - 40% = 40 marks.

Theory Paper- Paper code	Test (Marks)	Assignment	Marks distribution (Assignment )	Total Marks per paper
Math. Methods of Physics, Thermal & Statistical Physics RUSPHY501	20	15 questions on units1,2,3	Assessment- 15 mark Viva on it05 mark  Total= 20 mark	40
Solid State Physics RUSPHY502	20	15 questions on units1,2,3	Assessment- 15 mark Viva on it05 mark  Total= 20 mark	40
Atomic & Molecular Physics RUSPHY503	20	15 questions on units1,2,3	Assessment- 15 mark Viva on it05 mark  Total= 20 mark	40
Electrodynamics RUSPHY504	20	15 questions on units1,2,3	Assessment- 15 mark Viva on it05 mark  Total= 20 mark	40

### B) Internal test pattern (half an hour test)

Questions	Options	Marks
Q.1	20 objective questions, all compulsory, each question with 4 options; (half mark each)	10
Q.2	Attempt any two numerical out of four. (3 marks each)	06
Q.3	Attempt any one numerical out of two. (4 marks each)	04
	Total marks	20

#### C) External examination - 60 % = 60 marks

#### Semester-end Theory Assessment - 60 marks

- 1. Duration These examinations shall be of **2 hours** duration.
- 2. Paper Pattern:
  - I. There shall be **5** questions each of **12** marks. On each unit there will be one question & last question will be based on all the 4 units.
  - II. All questions shall be compulsory with internal choice within the questions.

Questions	Options	Marks	Questions on
Q.1)A)	Any 1 out of 2	6	Unit I
Q.1)B)	Any 1 out of 2	6	
Q.2)A)	Any 1 out of 2	6	Unit II
Q.2)B)	Any 1 out of 2	6	
Q.3)A)	Any 1 out of 2	6	Unit III
Q.3)B)	Any 1 out of 2	6	
Q.4)A)	Any 1 out of 2	6	Unit IV
Q.4)B)	Any 1 out of 2	6	
Q.5)A)	Any 1 out of 2	3	Unit I
Q.5)B)	Any 1 out of 2	3	Unit II
Q.5C)	Any 1 out of 2	3	Unit III
Q.5)D)	Any 1 out of 2	3	Unit IV

### Practical Examination Pattern:

#### (A) Internal Examination:

Sr. No.	Activity	Practical- Group-A	Practical- Group-B
		(Marks)	(Marks)
1.	Seminar on one experiment : Content- 2 mark ,Presentation-2 mark, Q(Teacher)2 mark Q(Student) -2 mark.	8	8
2.	<b>Continuous Assessment</b> (2 mark per experiment/ 8 regular and 4 skill experiment)	24	24
3.	Main Journal (1 mark per regular experiment)	8	8
	Total (1+2+3)	40	40
	Requirement for the certification 8 Skill experiments and 16 regular experiments		

Practical I (Marks)	Practical II(Marks)
50	50
10	10
60	60
	50 10

#### PRACTICAL BOOK/JOURNAL

The students are required to present a duly certified journal for appearing at the practical examination, failing which they will not be allowed to appear for the examination.

In case of loss of Journal and/ or Report, a Lost Certificate should be obtained from Head/ Coordinator / In-charge of the department; failing which the student will not be allowed to appear for the practical examination.

# Course Title: Classical Mechanics& Non-Linear Mechanics Academic year 2023-24

#### Course Outcomes:

After successful completion of this course, a student will be able to:

CO1: Understanding the modification of Newton's second law by using the concepts of gravitation.

CO2: Study the anharmonic motion of particles and framing the relation for the same.

CO3: Implement formulation of mechanical problem in Lagrange's equations and concept of constraints.

CO4: Explore Application of D'Alembert's principle and Lagrange's equations to Physical configurations.

COURSE	Unit	TITLE	Credits/
CODE	Om	XO	lectures
RUSPHY601		Classical Mechanics& Non Linear Mechanics	4 credits
	I	Central Force	15 lectures
	N.	Motion under a central force, central force inversely proportional to the square of the distance, Elliptical orbits. The Kepler's problem. Hyperbolic Orbits: The Rutherford problem – Scattering cross section. <b>KRS: Art. 3.13 to 3.16</b> Moving origin of co-ordinates, Rotating co-ordinate systems, Laws of motion on the rotating earth, Foucault pendulum, Larmor's theorem (with proof) <b>KRS: Art. 7.1 to 7.5</b>	
2	$\mathbb{N}$	Lagrange's equations	15 lectures
631	Ш	Lagrange's equations: D'Alembert's principle, generalized coordinates, Lagrange's equations using D'Alembert's principle, Examples, Systems subject to constraints, Examples of systems subject to constraints, Constants of motion and ignorable coordinates. KRS: Art. 9.1 to 9.6; G:1.4	
		Kinematics	15 lectures
	III	Kinematics of moving fluids, Equation of motion for an ideal fluid, Conservation laws for fluid motion, Steady flow. <b>KRS: Art. 8.6 to 8.9</b> The rotation of a Rigid body: Motion of a rigid body in space, Euler's equations of motion for a rigid body, Euler's angles,	

	Heavy symmetrical top (without notation). KRS: Art. 11.1, 11.2, 11.4, 11.5; BO: 6.7	
	Non-linear mechanics	15 lectures
IV	Non-linear mechanics: Qualitative approach to chaos, The anharmonic oscillator, Numerical solution of Duffing's equation, Transition to chaos: Bifurcations and strange attractors, Aspects of chaotic behaviour. BO: Art. 11.1, 11.3 to 11.5	90 00

- 1. Mechanics by Keith R. Symon (KRS)
- 2. Classical Mechanics A Modern Perspective by V. D Barger & M. S Olsson (BO)
- 3. Classical Mechanics by Herbert Goldstein (G)

# **Course Title: Electronics**

### Academic year 2023-24

#### **Course Outcomes:**

After successful completion of this course, a student will be able to:

CO1: Understand the basic electronic components FET, MOSFET, SCR and their working wrt circuit applications.

CO2: Understand the selection and requirement of components based on component characteristics for various applications.

CO3: Understand the theory and applied aspects of OP-Amp and 555 Timer.

CO4: Understand the circuit assembling of various devices.

CO5: Understand DC power supply, Transistor Multivibrators, Logic families- flip-flops and counters.

CO6: Understand Electronic communication techniques of modulations.

COURSE CODE	Unit	TITLE	Credits/ lectures
		Electronics	4 credits
RUSPHY602	I	FET and SCR:	15 lectures
231		<ul> <li>Field Effect Transistors: JFET: Basic ideas, Drain Curve, The trans-conductance curve, Biasing in the ohmic region and the active region, Trans-conductance, JFET common source amplifier, JFET analog switch, multiplexer, voltage controlled resistor, Current sourcing.</li> <li>MOSFET: Depletion and enhancement mode, MOSFET operation and characteristics, digital switching.</li> <li>Thyristors: SCR – Working, Equivalent circuit, important terms, I-V Characteristics, SCR as a switch, half wave rectifier and full wave rectifier.</li> <li>TRIAC: Construction, Operation, I-V Characteristics, Applications.</li> <li>DIAC: Construction, Operation, Characteristics and applications.</li> <li>MB: Art. 13.1 to 13.9, 14.1, 14.2, 14.4, 14.6.</li> <li>VKM: Art. 20.1 to 20.10, 21.1 to 21.6, 21.8, 21.9,</li> </ul>	

		21.10. 3. VKM: Art 7.7 to 7.11. MB: 7.10.	
	II	Regulated DC power supply, Differential Amplifier and Transistor Multivibrators	15 lectures
		Regulated DC power supply: Supply characteristics, series voltage regulator, short circuit protection (current limit and fold back) Monolithic linear IC voltage regulators. (LM 78XX, LM 79XX, LM 317). Differential Amplifier using transistor: The Differential Amplifier, DC and AC analysis of a differential amplifier, Input characteristic-effect of input bias, Off-set current and input offset voltage on output, common mode gain, CMRR. Transistor Multivibrators: Astable, Monostable and Bistable Multivibrators, Schmitt trigger. <b>1. MB: Art 17.1 to 17.5.</b> <b>2.KVR:Art. 14.5.2.1, 14.5.2.5, 14.5.2.6, 14.5.4.1.</b> <b>3.MB: Art. 20.5, 20.8, 21.4, 22.7,22.8, 23.2.</b> <b>MH: 16.14</b>	200
	III	Operational Amplifier and 555 Timer	15 lectures
		<ul> <li>Op Amp Applications: Log amplifier, Instrumentation amplifiers, Voltage controlled current sources (grounded load), First order Active filters, Astable using OP AMP, square wave and triangular wave generator using OPAMP, Wein-bridge oscillator using OP AMP.</li> <li>555 Timer: Block diagram, Triggered linear ramp generator.</li> <li><b>1. ## **Course Title: Nuclear Physics**

### Academic year 2023-24

#### **Course Outcomes:**

After successful completion of this course, a student will be able to:

CO1: Distinguish Gamow theory of alpha decay and derive Geiger- Nuttal law.

CO2: Compare the performances of different accelerators.

CO3: Evaluate each term involved in Weizsacher 's semi empirical mass formula and derive the equation of it.

CO4: Distinguish of discovery of basic elementary particle.

CO5: Understand the basics of Meson theory of nuclear force.

CO6: Understand the different elementary particle and their conservation laws.

CO7: Demonstrate quantitative problem-solving skills in all the topics covered.

COURSE	Unit	TITLE	Credits/
CODE			lectures
RUSPHY603		Nuclear Physics	4 credits
	I	Alpha & Beta Decay	15 lectures
231		Alpha Decay: Velocity, energy, and Absorption of alpha particles: Range, Ionization and stopping power, Nuclear energy levels. Range of alpha particles, alpha particle spectrum, Fine structure, long range alpha particles, Alpha decay paradox: Barrier penetration (Gamow's theory of alpha decay and Geiger-Nuttal law), Beta decay: Introduction, Velocity and energy of beta particles, Energy levels and decay schemes, Continuous beta ray spectrum-Difficulties encountered to understand it, Pauli's neutrino hypothesis, Detection of neutrino, Energetics of beta decay. K: 13.1,13.2,13.5; P: 4. II. 1, 4. II. 2, 4. II. 3, 1.II.3 K:14.1,14.7 P: 4.III.1,4.III.2, 4.III.3, 4.III.5; G: 5.5.	
	Π	Gamma Decay & Nuclear Models	15 lectures
		Gamma decay: Introduction, Internal conversion, nuclear isomerism, Mossbauer effect Nuclear Models: Liquid drop model, Weizsacher's semi- empirical mass formula, Mass parabolas - Prediction of

### Semester VI-----Practicals

### **RUSPHYP06 – Physics Laboratory Course**

The T. Y. B. Sc. Syllabus integrates the regular practical work with a series of demonstration and skill experiments. During the teaching and examination of Physics laboratory work, simple modifications of experimental parameters may be attempted. Attention should be given to basic skills of experimentation which include:

- i. Understanding relevant concepts.
- ii. Planning of the experiments
- iii. Layout and adjustments of the equipment
- iv. Recording of observations and plotting of graphs
- v. Calculation of results and estimation of possible errors in the observation of results.

**Regular Physics Experiments:** A minimum of 8 experiments from each of the practical course are to be performed and reported in the journal.

**Demo Experiments:** The demonstration experiments are to be performed by the teacher in the laboratory and students should be encouraged to participate and take observation wherever possible. Demonstration experiments are designed to bring about interest and excitement in Physics. Students are required to enter details of these 'demo' experiments in their journal. The certified journal must contain a minimum of 16 regular experiments (8 from each practical course), with minimum 8 demonstration experiments in semester VI. A separate index and certificate in journal is must for each semester course. There will be two turns of three hours each for the examination of practical courses

Demonstration Experiments:       1. Amplitude Modulation         2. Frequency Modulation         3. Iodine absorption spectra         4. Equation Solver         5. 13.     Data sheets reading for Diodes, transistor, Op-Amp, and       Optoelectronic devices		11.	Velocity of Sound.	
Optoelectronic devices		12.	Seven segment display.	
		13.	Data sheets reading for Diodes, transistor, Op-Amp, and	
14. Circuit Designing – single stage amplifier, Transistor			Optoelectronic devices	
		14.	Circuit Designing – single stage amplifier, Transistor	

		Multivibrator etc. and designing on Breadboard.	
Group A	1.	Quincke's method for surface tension of Mercury	
(RUSPHYP601)	2.	Lloyd's mirror	
	3.	Double refraction	
	4.	FET characteristics	
	5.	UJT as relaxation oscillator	
	6.	SCR characteristics	
	7.	Photodiode characteristics	
	8.	Applications of MOSFET	
	9.	SCR-Half Wave rectifier	
	1.	Capacitance by using parallel bridge	
	2.	Calibration of Si diode & copper constantan thermocouple	
	۷.	as temperature sensor	
	3.	Maxwell's, desauty's and Maxwell -Wein Bridge	
	4.	555 timer as Monostable Multivibrator	
Group B	5.	555 timer as Astable Multivibrator	
(RUSPHYP602)	6.	Transistor series regulator – fold-back	
	7.	555 timer as ramp generator	
	8.	LM317 as current regulator	
	9.	OPAMP as Monostable /Astable multivibrator using	
	Э.	breadboard

## MODALITY OF ASSESSMENT-SEM VI

#### Theory Examination Pattern: -

#### A) Internal Assessment - 40% = 40 marks.

Theory Paper- Paper code	Test Marks	Assignment	Marks distribution (Assignment )	Total Marks per paper
Math. Methods of Physics, Thermal & Statistical Physics RUSPHY501	20	15 questions on units1,2,3	Assessment- 15 mark Viva on it05 mark  Total= 20 mark	40
Solid State Physics RUSPHY502	20	15 questions on units1,2,3	Assessment- 15 mark Viva on it05 mark  Total= 20 mark	40
Atomic & Molecular Physics RUSPHY503	20	15 questions on units1,2,3	Assessment- 15 mark Viva on it05 mark  Total= 20 mark	40
Electrodynamics RUSPHY504	20	15 questions on units1,2,3	Assessment- 15 mark Viva on it05 mark  Total= 20 mark	40

#### B) Internal test pattern (half an hour test )

Questions	ons options					
Q.1	20 objective questions , all compulsory, each question with 4 options; (half mark each )	10				
Q.2	Attempt any two numerical out of four.(3 marks each)	06				
Q.3	Attempt any one numerical out of two.(4 marks each)	04				
	Total marks	20				

#### C) External examination - 60 %

Semester-end Theory Assessment - 60 marks

- vi. Duration These examinations shall be of **2 hours** duration.
- vii. Paper Pattern:
  - III. There shall be **5** questions each of **12** marks. On each unit there will be one question & last question will be based on all the 4 units.
  - IV. All questions shall be compulsory with internal choice within the questions.

Questions	Options	Marks	Questions on
Q.1)A)	Any 1 out of 2	6	Unit I
Q.1)B)	Any 1 out of 2	6	0.9/
Q.2)A)	Any 1 out of 2	6	Unit II
Q.2)B)	Any 1 out of 2	6	
Q.3)A)	Any 1 out of 2	6	Unit III
Q.3)B)	Any 1 out of 2	6	/
Q.4)A)	Any 1 out of 2	6	Unit IV
Q.4)B)	Any 1 out of 2	6	
Q.5)A)	Any 1 out of 2	3	Unit I
Q.5)B)	Any 1 out of 2	3	Unit II
Q.5C)	Any 1 out of 2	3	Unit III
Q.5)D)	Any 1 out of 2	3	Unit IV

### Practical Examination Pattern:

#### (A)Internal Examination:

Sr. No.	Activity	Practical- Group-A	Practical- Group-B
NO.	~ <u>(</u> 0.	(Marks)	(Marks)
1.	Seminar on one experiment :	8	8
	Content- 2 mark		
	Presentation-2 mark		
	Q(Teacher)2 mark		
	Q(Student) -2 mark		
2.	<b>Continuous Assessment</b> (2 mark per experiment/ 8 regular and 4 demo experiment))	24	24
3.	Main Journal (1 mark per regular experiment)	8	8
	Total (1+2+3)	40	40

Requirement for the certification	
8 demo experiments and 16 regular experiments	

#### (B) External (Semester end practical examination):

Particulars	Practical I (Marks)	Practical II (Marks)
Laboratory work	50	50
Viva	10	10
Total	60	60

#### PRACTICAL BOOK/JOURNAL

The students are required to present a duly certified journal for appearing at the practical examination, failing which they will not be allowed to appear for the examination. In case of loss of Journal and/ or Report, a Lost Certificate should be obtained from Head/ Coordinator / In-charge of the department; failing which the student will not be allowed to appear for the practical examination.

### **Overall Examination and Marks Distribution Pattern**

# Semester---- VI

Course	RUSPHY601			RUSPHY602		RUSPHY603			RUSPHY604			Total	
		(Mark	s)		(Marks)		(Marks)		(Marks)		(Marks		
	Int.	Ext.	Total		E	Т	I	E	Т	I	E	Т	
Theory	40	60	100	40	60	100	40	60	100	40	60	100	400

Course	0	601		Total					
(Marks)					(Marks)				
08	Int.	Ext.	Total	Int.	Ext.	Total			
Practicals	40	60	100	40	60	100	200		
(GRAND TOTAL MARKS: 600.)
