Course Title: Data Condensation and Visualisation Techniques Academic year 2024-25

COURSE OUTCOMES:

COURSE	DESCRIPTION		
OUTCOME	A student completing this course will be able to:		
CO 1	Identify and differentiate between various scales of measurement. Contrast different types of data and elucidate the methods utilized for data collection.		
CO 2	CO 2 Elucidate the definition and elucidate the interrelation between Yule's coefficient of association Q and Yule's coefficient of Colligation Y concerning two attributes.		
CO 3	Develop Univariate and Bivariate frequency distributions for discrete and continuous variables along with Cumulative frequency distributions. Illustrate these distributions through graphical representations including Histograms, Polygons/Curves, Ogives, Heat Maps, and Tree Maps
