

AC/II(21-22).2.RUS12

S. P. Mandali's
Ramnarain Ruia Autonomous College
(Affiliated to University of Mumbai)

Syllabus for: UG

Program: B.Sc.

Program Code: Zoology (RUSZOO)

(Credit Based Semester and Grading System
for the academic year 2021–2022)

S. P. Mandali's
Ramnarain Ruia Autonomous College
(Affiliated to University of Mumbai)

Syllabus for: T. Y. B. Sc.

Program: B.Sc.

Program Code: Zoology (RUSZOO)

(Credit Based Semester and Grading System
for the academic year 2021–2022)

NOTE

In the context of UGC circular of 2006 and the need to understand animal systems better at specialization stages in Zoology, limited anatomical studies of the animals has been introduced at the level of specialization in Zoology, i.e. at T.Y.B.Sc. level. These anatomical studies have been introduced keeping in focus that all aspects of ethics of animal experimentation is informed to the students and that it will be ensured that students are made to understand the ethical use of animals in Biology. In this context, anatomical studies in a limited manner will be used for training with the following conditions:

- 1) The college is agreed to the inclusion of anatomical studies provided, that the students are not asked to kill and cut open live animals.**
- 2) The animal specimen if used for anatomical studies will be procured dead from local food market and are items of regular consumption by people.**
- 3) The sessions of anatomical studies are arranged in a planned manner to minimise the number of animal specimens used and to reuse the same animal specimen for multiple sessions.**
- 4) Further, College will constitute an Anatomical Study monitoring board which will be informed about the use of animals and that the usage will comply to the guidelines of ethical use and handling of animals.**
- 5) Students opting for specialization in Zoology (T.Y.B.Sc.) will be informed in advance about the inclusion of anatomical studies in the course work.**

Course Code: RUSZOO501

Course Title: Study of animal types: Non-chordates

Academic year 2021-22

COURSE OUTCOMES:

COURSE OUTCOME	DESCRIPTION
	After successfully completing the course, the students will be able to:
CO 1	Learn and describe the unique characters of phylum Annelid, Arthropoda, Mollusca, Echinodermata.
CO 2	Understand body organization, systematic position, habit and habitat, internal systems and physiology of phylum Annelid to Echinodermata.
CO 3	Understand the economic importance of phyla Annelid to Echinodermata
CO 4	Develop conceptual clarity with regard to the anatomy of animals at different levels and will get an idea of general characteristics and Detailed of invertebrate animal systems.
CO 5	Interrelate the working and different systems of non-chordates and link it with their evolutionary process

Detailed syllabus

RUSZOO501	Title: Study of Animal types: Non-chordates	Credits: 2.5
Unit I	Phylum- Annelid e.g. Earthworm	15 lectures
	Systematic position, habit and habitat	
	Structure and histology of body wall	
	Locomotion	
	Type of nutrition	
	Physiology of respiration	
	Physiology of excretion & excretory system	
	Physiology of reproductive system	
	Nervous system	
	Regeneration	
Unit II	Phylum- Arthropoda e.g. Cockroach	15 lectures
	Systematic position, Habit and habitat	
	External characters	
	Morphology and Physiology of Digestive system	
	Physiology of Blood vascular system	
	Physiology of Excretory system	
	Morphology and Physiology of Male and Female	
	Urinogenital System	
	Anatomy of Nervous system and sense organs	
Unit III	Phylum-Mollusca e.g. Sepia	15 Lectures
	Systematic position, Habit and habitat	
	External characters	
	Morphology and Physiology of Digestive system	
	Morphology and Physiology of Circulatory system	
	Morphology and Physiology of Excretory system	
	Morphology of Reproductive system	
	Morphology of Nervous system and sense organs	
	Economic importance	
Unit IV	Phylum- Echinodermata e.g. Starfish	15 Lectures
	Systematic position, Habit and habitat	
	External characters, Endoskeleton, coelom	

	Digestive system, Physiology of Digestive system	
	Locomotion: Water Vascular System	
	Physiology of Circulatory system	
	Reproductive system	
	Fertilization and larval development	
	Nervous system	
	Regeneration	
	Assignment - Model – Animal Systems	
RUSZOO501	PRACTICALS	Credits-03
STUDY OF ANIMAL TYPES: NON-CHORDATES		
1.	Hydra a) Preparation of culture media of Hydra culture. b) Estimation of growth rate of Hydra depending on use of different culture media. c) Study of regeneration in Hydra	
2.	Anatomical study of Earthworm so as to study its a) Morphology b) Digestive system c) Reproductive system d) Nervous system e) Excretion-mounting of septal nephridium	
3.	Study of Cockroach a) Morphology b) Study of mouth parts c) Digestive system d) Reproductive system e) Nervous system f) Respiratory system (trachea and spiracle) g) Locomotion (Mounting of legs)	
4.	Study of Sepia so as to study its a) Morphology b) Digestive system c) Reproductive system d) Nervous system	
5.	Study of Star fish for its a) Morphology b) Water vascular system c) Digestive system d) Reproductive system e) Nervous system	

6.	Anatomical study of prawn a) Brain b) Appendages c) Statocyst	
7.	Note: Visit to local fish market to study available invertebrates

Course Code: RUSZOO502
Course Title: Haematology and Immunology
Academic year 2021-22

COURSE OUTCOMES:

COURSE OUTCOME	DESCRIPTION
	After successfully completing the course, the students will be able to:
CO 1	Explain various components and formation of Blood, its cellular components and their function.
CO 2	Demonstrate the total count of RBCs, WBCs and Hb level and comprehend blood disorders.
CO 3	Be familiar with diagnostic tests performed in the pathological laboratories and recall their clinical significance.
CO 4	Apply for professional DMLT courses as well as utilize this knowledge in research.
CO 5	Explain the components of immune system and its function in the protection of the body.
CO 6	Give the reasons for Rheumatoid arthritis as an autoimmune disease, SCID and AIDS as immunodeficiency disease and describe various antigen-antibody reactions for diagnostic tests, type of vaccine and role of adjuvant in vaccine.
CO 7	Explain the role of immune components in organ transplantation, cancer treatment and recall the concept of Immunomodulation and will be able to do research in it.

Detailed syllabus

RUSZOO502	Title: Haematology and Immunology	Credits: 2.5
Unit I	Basic Haematology	15 lectures
	Composition of blood - Plasma & formed elements	
	Blood volume - Total quantity and regulation, Haemorrhage	
	Plasma proteins - Inorganic constituents, respiratory gases, organic constituents other than proteins (include internal secretions, antibodies and enzymes)	
	RBCs - Structure and functions, abnormalities in structure, total count, variation in number; types of anaemia and genetic disorders; ESR	
	Haemoglobin – Structure, formation and degradation, role in transport of oxygen and carbon dioxide (Chloride shift and Bohr's effect); types of haemoglobin (foetal, adult and sickle)	
	WBCs -Types of leukocytes and function; total count and variation in number; leucopoiesis and leukaemia and its types.	
	Blood clotting -Thrombocytes; factors and mechanism of coagulation; anticoagulants; formation of blood platelets (thrombopoiesis); clotting mechanism; bleeding and clotting time; failure of clotting mechanism; haemophilia and purpura	
Unit II	Applied Haematology	15 lectures
	Introduction to Applied Haematology Definition, scope and brief introduction of basic branches: clinical, microbiological and forensic haematology	
	Diagnostic techniques used in haematology <ul style="list-style-type: none"> • Microscopic examination of blood: For detection of blood cancers (Lymphoma, Myeloma); infectious diseases (Malaria, Filariasis, Leishmaniasis); hemoglobinopathies (Sickle-cell, Thalassemia) • Coagulopathies: Diagnostic methods (haemophilia and purpura) • Microbiological examination: Blood culture: 	

	<p>Method and application in Diagnosis of infectious diseases (Typhoid and TB)</p> <ul style="list-style-type: none"> Biochemical examinations of blood for: <p>Liver function tests: Albumin, AST, ALT, AST:ALT ratio, Total bilirubin, Direct bilirubin, Prothrombin time / International normalized ratio (PT/INR), Serum glucose, LDH and Alkaline phosphatase</p> <p>Kidney function tests: Serum creatinine, blood urea nitrogen</p> <p>Carbohydrate metabolism tests: Blood sugar, Glucose tolerance test, Glycosylated haemoglobin test</p> <p>Other biochemical tests: Blood hormones (Thyroid, FSH, LH)</p> Blood Bank: Collection, storage, preservation of its components Blood transfusion: Crossing matching, Transfusion of blood and bone marrow transplant. 	
Unit III	Basic Immunology	15 Lectures
	Overview of Immunology: Definition and scope	
	<p>Components of immune system:</p> <ul style="list-style-type: none"> Innate immunity – Definition, Factors affecting innate immunity, Mechanisms of innate immunity – physical barriers, chemical barriers and cellular barriers Adaptive or Acquired immunity – Active Acquired immunity – Natural and Artificial; Passive Acquired immunity – Natural and Artificial 	
	<p>Cells and Organs of immune system</p> <ul style="list-style-type: none"> Cells of immune system– B cells, T cells and null cells, macrophages, dendritic cells and mast cells Organs of immune system– Primary – Thymus and bone marrow; Secondary - Lymph node and spleen 	
	<p>Antigens: Definition, properties of antigens; haptens</p> <ul style="list-style-type: none"> Antibodies Definition, basic structure, classes of antibodies – IgG, IgA, IgM, IgD and IgE 	
	<p>Hypersensitivity, Autoimmunity and Immunodeficiency</p> <ul style="list-style-type: none"> Definition of Hypersensitivity; Classification of hypersensitivity reactions: Type-I, Type-II, 	

	<p>Type-III and Type-IV (one example of each type)</p> <ul style="list-style-type: none"> • Introduction and a brief account of autoimmunity and example, Rheumatoid arthritis • Introduction to immunodeficiency – Congenital, e.g. SCID; Acquired, e.g. AIDS 	
Unit IV	Applied Immunology	15 Lectures
	<p>Antigen-Antibody interaction</p> <ul style="list-style-type: none"> • General features of antigen-antibody interaction; Precipitation reaction: Definition, characteristics and mechanism, precipitation in gels (slide test) - Radial immunodiffusion (Mancini method), Double immunodiffusion (Ouchterlony method) • Agglutination reaction: definition, characteristics and mechanism • Haemagglutination (slide and micro-tray agglutination), passive agglutination, Coomb's test and ELISA 	
	<p>Vaccines and Vaccination</p> <ul style="list-style-type: none"> • Brief history of vaccination, principles of vaccines, Active and Passive immunization; Routes of vaccine administration • Classification of Vaccines: Live attenuated, Whole-Killed or inactivated, Sub-unit vaccines: Toxoids, Protein vaccines, Viral-like particles, DNA vaccines • Adjuvants: Introduction and application; Adjuvants used for human vaccines (Alum, Virosomes and Liposomes, Saponins, Water-in-oil emulsions) • Vaccines against human pathogens: Polio; Hepatitis A and B; Rotavirus; Tuberculosis(BCG); Diphtheria, Tetanus and Pertussis (DPT); Typhoid (TAB) vaccines 	
	<p>Transplantation and Tumour Immunology</p> <ul style="list-style-type: none"> • Introduction to transplantation; Types of grafts; Immunologic basis of graft rejection: MHC compatibility in organ transplantation, • Immunomodulator – only one example of drug. • Tumour immunology (Cancer immunology): Introduction to cellular transformation and cancer; Immunotherapy: Antigen-independent cytokine therapy, 	

	Passive immunotherapy	
	Assignment - Model on Haematology/ Immunology topics	
RUSZOO502	PRACTICALS	Credits-03
HAEMATOLOGY AND IMMUNOLOGY		
1.	Enumeration of erythrocytes - Total count	
2.	Erythrocyte Sedimentation Rate by suitable method – Westergren or Wintrobe method	
3.	Estimation of haemoglobin by Sahli's acid haematin method	
4.	Enumeration of leucocytes –Total Count	
5.	Differential count of WBC	
6.	Determination of Serum LDH	
7.	Estimation of total plasma proteins by Folin's method	
8.	Estimation of serum/ plasma total triglycerides by Phosphovanillin method	
9.	Latex agglutination test - Rheumatoid Arthritis	
10.	To demonstrate Immunodiffusion method by Ouchterlony technique/Radial immune diffusion.

Course Code: RUSZOO503
Course Title: Molecular Biology and Biotechnology
Academic year 2021-22

COURSE OUTCOMES:

COURSE OUTCOME	DESCRIPTION
	After successfully completing the course, the students will be able to:
CO 1	Understand and describe the general principals of gene organization expression prokaryotes and eukaryotes, common gene analysis techniques, gene expression, different types of mutation, the role of mutagenic agents and methods of DNA repair system.
CO 2	Describe the principles for gene regulation in prokaryotic and eukaryotic cells, tools and techniques of genetic engineering and understand non-disjunction during mitosis and meiosis, its effects on genome and in turn on a person.
CO 3	Comprehend the importance and different methods of prenatal diagnosis to diagnose the diseased condition in a developing foetus.
CO 4	Understand the advantages of tissue culture in laboratory condition which can be useful for patients.
CO 5	Develop the skills of performing different aseptic techniques used to maintain sterility during experimental process.
CO 6	Analyse and compare the different culture media and optimum conditions required depending on the need of proliferating cells.
CO 7	Develop skills so as to equip them to work in upcoming fields of science and technology.

Detailed syllabus

RUSZOO503	Title: MOLECULAR BIOLOGY AND BIOTECHNOLOGY	Credits-2.5
Unit I	Molecular Biology	15 lectures
	Types of mutation <ul style="list-style-type: none"> Point mutations – substitution, deletion and insertion mutations Substitution mutations – silent (same-sense), missense and nonsense mutations, Transition and transversion, Deletion and Insertion mutations – frameshift mutations Trinucleotide repeat expansions – fragile X syndrome, Huntington disease Spontaneous mutation – tautomeric shifts, spontaneous lesion 	
	Induced mutations/mutagens/mutagenic agents/DNA damage <ul style="list-style-type: none"> Physical agents – ionizing radiation (X-rays, α, β and γ rays), non-ionizing radiation (UV light) Chemical agents – base analogs (5-bromouracil), intercalating agents (acridine dyes), deaminating agents (bisulfite compounds), hydroxylating agents (hydroxylamine), alkylating agents (ethylmethanesulphonate), aflatoxin (aflatoxin B1) 	
	Preventative and repair mechanisms for DNA damage <ul style="list-style-type: none"> Mechanisms that prevent DNA damage – superoxide dismutase and catalase Mechanisms that repair damaged DNA – direct DNA repair (alkyltransferase, photoreactivation, excision repair) Post-replication repair – recombination repair, mismatch repair, SOS repair, transcription - repair coupling 	
	Eukaryotic gene expression <ul style="list-style-type: none"> Regulatory proteins – zinc fingers, helix-turn-helix domain and leucine zipper DNA methylation 	
Unit II	Genetic Engineering	15 lectures
	Tools in Genetic Engineering <ul style="list-style-type: none"> Enzymes involved in Genetic Engineering: Introduction, nomenclature and types with examples, working mechanism, Ligases – Restriction enzymes, E.coli DNA ligase, RNA polymerases. 	

	<ul style="list-style-type: none"> • Vectors for gene cloning: General properties, advantages and disadvantages of cloning vectors – phage vectors, BAC vectors • Cloning techniques: Cloning after restriction digestion - blunt and cohesive end ligation, cDNA synthesis (Reverse transcription) • Transfection techniques: electroporation, virus mediated gene transfer – Retrovirus 	
	Techniques in Genetic Engineering <ul style="list-style-type: none"> • PCR techniques: Principles, working and applications of thermocycler and introduction to RTPCR. • Sequencing techniques: DNA sequencing: Maxam-Gilbert method, Sanger's method – Manual and automated methods • Protein sequencing: Sanger's method, Edman's method, Applications of sequencing techniques • Separation and detection techniques: Blotting techniques: Southern blotting, Northern blotting and Western blotting Applications of blotting technique. • DNA Microarray: Introduction and Applications 	
Unit III	Human Genetics	15 Lectures
	Non-disjunction during mitosis and meiosis Chromosomal Aberrations: Structural: Deletion: types, effects and disorders; Translocation: types: robertsonian and non-robertsonian, disorders; Inversion: types, effects and significance; Duplication and their evolutionary significance (multigene families) Numerical: Aneuploidy and Polyploidy (Autoploidy and Allopoloid)	
	Genetic Disorders <ul style="list-style-type: none"> • Inborn Errors of Metabolism: Phenylketonuria, G-6-PD deficiency, Alkaptonuria, Albinism, Niemann Pick syndrome • Single gene mutation: Cystic fibrosis, Muscular dystrophy • Multifactorial: Breast Cancer, Diabetes Mellitus, Ischemic heart. • Uniparental Disomy: Angelman Syndrome and Prader-Willi Syndrome 	
	Diagnosis <ul style="list-style-type: none"> • Prenatal Diagnosis (Amniocentesis) and chorio-villus sampling - Ultrasound scanning and Fetoscopy, Banding techniques (G, C, Q), FISH and M-FISH, 	

	<p>Protein truncation test (PTT), Single Nucleotide Polymorphism and its applications</p> <ul style="list-style-type: none"> • Genetic counselling: Psycho-social and ethical aspects for the individual and the family in connection with genetic investigations. 	
Unit IV	Tissue culture	Lectures 15
	<p>Introduction to animal cell culture</p> <ul style="list-style-type: none"> • Advantages of tissue culture – control of the environment, characterization and homogeneity of sample, economy, scale and mechanization, <i>in vitro</i> modeling of <i>in vivo</i> conditions • Limitations of tissue culture – expertise, quantity, dedifferentiation and selection, origin of cells, instability 	
	<p>Aseptic techniques</p> <ul style="list-style-type: none"> • Objectives of aseptic techniques – maintaining sterility • Sterilization – basic principles of sterilization, importance of sterility in cell culture • Sterile handling – swabbing, capping, flaming, handling bottles and flasks, pipetting, pouring 	
	<p>Culture media</p> <ul style="list-style-type: none"> • Physicochemical properties – pH, CO₂ and bicarbonate, buffering, O₂, osmolality, temperature, viscosity, surface tension and foaming • Types of media – Natural and Artificial media • Serum – protein, growth factors, hormones, nutrients and metabolites, lipids, minerals and inhibitors • Balanced Salt Solutions • Complete Media– amino acids, vitamins, salts, glucose, oxygen supplements, hormones and growth factors, antibiotics 	
	<p>Primary and secondary culture and establishment of cell lines.</p> <ul style="list-style-type: none"> • Establishment of primary and secondary cultures of normal, adult and embryonic sources. • Isolation of cells – enzyme digestion, perfusion, mechanical disaggregation, explants cultures • Substrate for attachment • Culture conditions – selection against some cell types, conditioned medium, feeder cells 	

RUSZOO503	PRACTICALS	Credits-03
MOLECULAR BIOLOGY AND BIOTECHNOLOGY		
1.	Isolation & Estimation of RNA by Orcinol method (formula method and standard graph)	
2.	Isolation & Estimation of DNA by Diphenylamine method (formula method and standard graph)	
3.	Separation of proteins by SDS-PAGE from the given sample (plasma proteins)	
4.	Colorimetric estimation of proteins from given sample by Bradford's method.	
5.	Karyotype (Idiogram) analysis for the following syndromes with comments on numerical & structural variations in chromosomes: <ol style="list-style-type: none"> a. Turner's syndrome b. Klinefelter's syndrome c. Down's syndrome d. Cri-du-chat syndrome e. D-G translocation f. Edward's syndrome g. Patau's syndrome 	
6.	2. Problems in genetics based on abnormalities in chromosomes: <ol style="list-style-type: none"> a. Total number of chromosomes present = 46, male. Reciprocal translocation between chromosomes 2 and 5. Breakage and reunion has occurred between long arm of 2nd chromosome, band 21 and long arm of 5th chromosome, band 31 b. Interpret the following formula: 46, XY, t (2;5) (q21; q31) c. Duplication: 46, XX, dup (1) (q22q25) d. Total number of chromosomes = 46, female. Duplication on chromosome number 1, long arm between band 1q22 and 1q25 e. Turner's Syndrome: 45, X f. Klinefelter's Syndrome: 47, XXY 	
7.	Stained preparation of Onion root tip and calculation of Mitotic index	
8.	Identification of contrasting traits in drosophila using photographs	
9.	Sterilization technique (Workplace, Glassware, Chemicals, Biological fluids or samples)	
10.	Use of autoclave for sterilization of equipments for tissue culture, Packaging of glassware	
11.	Trypsinization and vital staining using Trypan blue stain	

12.	Tissue culture media preparation, aseptic transfer & inoculation of culture	
13.	Streaking of butt, slant and plate (continuous and discontinuous methods) with E.coli (Demonstration only)

Ramnarain Ruia Autonomous College

Course Code: RUSZOO504

Course Title: Endocrinology, Osteology and Embryology

Academic year 2021-22

COURSE OUTCOMES:

COURSE OUTCOME	DESCRIPTION
	After successfully completing the course, the students will be able to:
CO 1	Understand the importance of epidermal and dermal derivatives and their functions.
CO 2	Comprehend the types & secretions of endocrine glands and their functions.
CO 3	Develop the conceptual clarity of the structure, types and functions of human skeleton.
CO 4	Understand and analyse the processes involved in embryonic development, comparative embryology and its application.
CO 5	Develop skills for doing research in the field of developmental biology

Detailed syllabus

RUSZOO504	Title: Endocrinology, Osteology and Embryology	Credits- 2.5
Unit I	Endocrine glands and regulation	15 lectures
	General organization of mammalian endocrine system	
	Hormones: Classification, properties, mechanism of hormone action, hormone secretion and transport	
	Histology and functions of following endocrine glands: Pituitary, Thyroid, Parathyroid, Pancreas, Adrenal, Testis and Ovaries <ul style="list-style-type: none"> • Study of following endocrine clinical disorders and their management: Diabetes, acromegaly, dwarfism, goiter, rickets, cushing syndrome. 	
Unit II	Human Osteology	15 Lectures
	Introduction: Cartilage and Bone <ul style="list-style-type: none"> • Chemical composition, Structure and Function of Cartilage. • Chemical composition, Structure and Functions of Bone. 	
	Axial skeleton <ul style="list-style-type: none"> • Skull: general characteristics of skull bones 1) cranial bones 2) facial bones • Vertebral column: General characteristics of a vertebra, structure of different types of vertebrae (cervical, thoracic, lumbar, sacrum & coccyx) • Ribs & sternum (Thorax): General skeleton of ribs & sternum • Hyoid bone: General structure 	
	Appendicular skeleton <ul style="list-style-type: none"> • Pectoral girdle and Pelvic girdle • Forelimbs and Hindlimbs 	
	Sexual dimorphism of human skeleton	
Unit III	Experimental and Chick embryology	15 Lectures
	Introduction to experimental embryology Germplasm theory, Mosaic theory, Regulative theory, Gradient theory, Spemann's theory of organizers	
	Basic concept and principles of experimental embryology - brief idea of morphogenesis and organogenesis, fate maps, cell adhesion, cell affinity	

	and differentiation.	
	Development of Chick: Structure of chick embryo – 18 hours, 24 hours, 36 hours, 48 hours, 72 hours	
	Signaling pathways and intercellular communication during development: Induction and competence, epithelial-mesenchymal interaction	
	Recent trends in developmental biology: Methods to determine the role of genes during development (transgenic and chimeric mouse, “knockout” experiments), Genes contributing to developmental defects (oncogenes), multipotent and pluripotent stem cells and their niche	
Unit IV	Integumentary system and derivatives	15 Lectures
	Basic structure of integument: Epidermis and dermis; classification of keratinized and non-keratinized derivatives	
	Epidermal derivatives of Vertebrates: Hair, hoof, horn, claw, teeth, beak, epidermal scales (large scales, small scales, modified scales - spine), glands - types and functions (mucous, serous, ceruminous, poison, uropygial, salt), feathers	
	Dermal derivatives of vertebrates: Scales in fish; scutes in reptiles and birds; dermal scales in mammals - Armadillo, Antler – Caribou	
	Special derivatives of integument (Epidermal): Wart in toad; rattle in snake; horny beak in turtle, birds, monotremes; spur in male birds - jacana, fowl; whale bone - baleen whale; liliac callosities – African mandrill; kneepads – camel	
RUSZOO504	PRACTICALS	3 Credits
ENDOCRINOLOGY, OSTEOLOGY AND EMBRYOLOGY		
1.	To study the histology of glands: T.S. of pituitary, thyroid, pancreas, adrenal, ovary, testis	
2.	To study the clinical disorders caused by endocrine glands with the help of photographs: acromegaly, dwarfism, goiter, rickets, cushing syndrome.	
3.	To study human skeleton: A) Study of axial skeleton a) Skull bone b) Ossicles of middle ear c) Hyoid bone d) Rib cage e) Sternum B) Vertebral column	

	a) Cervical vertebrae b) Typical cervical vertebrae (3-6) c) Atlas or 1st cervical vertebra d) Axis or 2nd cervical vertebra e) 7th cervical vertebra f) Thoracic vertebrae (8-19) g) Typical lumbar vertebra (20-24) h) Sacral vertebrae and coccyx (synsacrum): Sacrum (25-29), Coccyx (30-33)	
4.	Observation of developing chick embryo -18 hours, 24 hours, 36 hours, 48 hours, 72 hours	
5.	To prepare temporary mounting of chick embryo up to 72 hours	
6.	To study the effect of temperature in the development of chick embryo upto 48 hours/ 72 hours	
7.	To study T.S. of integument: amphibian, reptilian, avian, mammalian	
8.	To study horns, antlers	
9.	To study different types of scales: dermal, epidermal	
10.	To study epidermal glands: mucous, sebaceous, sweat, poison, uropygial	
11.	To study special integumentary derivatives

MODALITY OF ASSESSMENT (T.Y.B.Sc.)

A] Internal assessment - 40%: 40 marks

Sr. no.	Evaluation type	Marks
1.	One class test (Multiple choice questions)	20
2.	Two Assignments/ Case study/ Group Discussion	20
	TOTAL	40

B] External examination - 60%

- **Semester End Theory Assessment = 60 Marks**

* (Deviation from the usual modality)

Owing to the pandemic situation prevailing in 2020 and continuing in 2021, the external examinations (Semester End) may be conducted online as per the instructions/circulars received from the University of Mumbai and Maharashtra State notifications from time to time. The conventional mode of external examination will commence again only after the declaration of normalcy by the Government authorities.

- Duration – These examinations shall be of **two hours** each paper.
- Paper Pattern: All questions shall be compulsory with internal choice within the questions.

Paper pattern

Questions	Options	Marks	Questions on
Q.1) A, B, C	Any 2 out of 3	12	Unit I
Q.2) A, B, C	Any 2 out of 3	12	Unit II
Q.3) A, B, C	Any 2 out of 3	12	Unit III
Q.4) A, B, C	Any 2 out of 3	12	Unit IV
Q.5) a, b, c, d, e	Any 3 out of 5	12	All Units
	TOTAL	60	

Practical Examination Pattern:

(A) Internal Examination		Practical
Heading		
Journal		05
Lab Participation		05
Lab work/	Field report/	10
Presentation		
Total		20

(B) External (Semester end practical examination)

Particulars	Practical
Lab work and / or <i>Viva voce</i>	30
Total	30

PRACTICAL BOOK/JOURNAL

The students are required to present a duly certified journal for appearing at the practical examination, failing which they will not be allowed to appear for the examination.

In case of loss of Journal and/ or Report, a Lost Certificate should be obtained from Head/ Co-ordinator / In charge of the department; failing which the student will not be allowed to appear for the practical examination.

Course Code: RUSZOO601

Course Title: Study of Animal type: Chordates

Academic year 2021-22

COURSE OUTCOMES:

COURSE OUTCOME	DESCRIPTION
	After successfully completing the course, the students will be able to:
CO 1	Understand about the habitat and economic importance of the Vertebrates
CO 2	Analyse the external morphology and physiology of systems of vertebrate animal
CO 3	Compare and contrast between the differences and similarities of morphologies and physiologies of vertebrate animals
CO 4	Develop an overview of the evolutionary concepts including homology and homoplasy, and Detailed discussions of major organ systems.
CO 5	Apply their knowledge for doing research in allied fields.

RUSZOO601	Title: Study of Animal Type- Chordates	Credits- 2.5
Unit I	Class- Pisces e.g. <i>Scoliodon</i>	15 lectures
	Systematic position, Habit and habitat External characters and sexual dimorphism Exoskeleton and Endoskeleton Digestive system- food and feeding Physiology of digestion Respiratory system, Mechanism of respiration Circulatory system and its mechanism Nervous system and sense organs Male and Female Urinogenital System Economic importance	
Unit II	Class – Amphibian e.g. Frog	15 lectures
	Systematic position, Habit and habitat External characters and sexual dimorphism Endoskeleton Digestive system, food and feeding, physiology of digestion Respiratory system- Mechanism of respiration Circulatory system and its mechanism. Nervous system and Sense organs Male and Female Urinogenital system	
Unit III	Class- Aves e.g. Pigeon	15 Lectures
	Systematic position, Habit and habitat External characters Exoskeleton and Endoskeleton Muscular system Digestive system, food, feeding and physiology of digestion Respiratory system and its mechanism, Role of air-sacs Circulatory system and its mechanism Nervous system and Sense organs Male and Female Urinogenital system	
Unit IV	Class Mammalia e.g. Rat	15 Lectures
	Systematic position, Habit and habitat External characters Epidermal Derivatives Digestive system, food, feeding and physiology of digestion Nervous system and Sense organs Respiratory system and its mechanism Circulatory system and its mechanism Excretory system and its mechanism Male and Female Reproductive systems Assignment- Model – Animal Systems	

RUSZOOP601	PRACTICALS	Credits-03
STUDY OF ANIMAL TYPES- CHORDATES		
1.	Study of <i>Scoliodon</i> a) Morphology b) Digestive system c) Nervous system (cranial nerves) including brain d) Circulatory system e) Male and female urinogenital system f) Mounting of placoid scales and chondrocytes	
2.	Study of Frog a) Morphology b) Digestive system c) Nervous system d) Circulatory system (arterial & venous) e) Male and female urinogenital system	
3.	Study of Pigeon a) Morphology b) Digestive system c) Respiratory system- air sacs d) Nervous system e) Circulatory system (arterial & venous) f) Male and female urinogenital system	
4.	Study of Rat a) Morphology b) Digestive system c) Respiratory system d) Urinogenital system of Male and Female e) Nervous system f) Circulatory system (arterial & venous)	
5.	Anatomical study of Hen's head so as to study its a) Brain b) Columella auris c) Hyoid apparatus d) Mounting of Blood (Blood cells)	
6.	Study of flight muscles of Hen	
Note: Visit to National Parks.

Ramnarain RUIA Autonomous College

Course Code: RUSZOO602

Course Title: Physiology, Histology and Pathology

Academic year 2021-22

COURSE OUTCOMES:

COURSE OUTCOME	DESCRIPTION
	After successfully completing the course, the students will be able to:
CO 1	Understand and describe nomenclature and mechanism of enzyme, enzyme inhibition and regulatory enzymes.
CO 2	Draw graph and calculate optimum pH, temperature, V _{max} and K _m value for enzyme and find out competitive and non-competitive enzyme inhibition from graph.
CO 3	Appreciate the therapeutic and industrial application of enzymes.
CO 4	Describe importance of homeostasis, mechanisms by which it is achieved and comprehend the adaptive responses of the animals to the changes in environmental temperature, availability of ions and water in the environment.
CO 5	Identify microscopically histological layer of the organs and develop skills useful for doing research in the same field.
CO 6	Gain knowledge of various terminologies for pathological conditions in body and the application of pathology in Forensics.
CO 7	Develop interest and skills which will be helpful for research in animal studies.

Detailed syllabus

RUSZOO602	Title: Physiology, Histology and Pathology	Credits- 2.5
Unit I	Enzymology	15 lectures
	Definition, nomenclature and classification (based on Enzyme Commission) of enzymes, cofactors and coenzymes, the concept and properties of active site, Enzyme Specificity, Mechanism of enzyme action.	
	Factors affecting enzyme activity- pH, temperature and substrate concentration; concept of activation energy.	
	Enzyme kinetics, Concept of steady state, Derivation of Michaelis-Menton equation and Lineweaver-Burk plot, concept and significance of k_m , V_{max} and k_{cat} ,	
	Enzyme inhibitors- competitive, non-competitive, uncompetitive inhibitors and their kinetics; therapeutic applications of enzyme inhibitors Regulation of enzyme activity: allosteric regulation and regulation by covalent modification of enzymes; Zymogen (pepsinogen); Isozymes (LDH)	
	Clinical significance and industrial applications of enzymes	
Unit II	Homeostasis (Temperature and Ionic regulation)	15 lectures
	Homeostasis - External and internal environment; Acclimation and acclimatization; Control systems in biology: Feedback mechanism- negative feedback and positive feedback with suitable examples.	
	Thermoregulation -Cold blooded, warm blooded, poikilotherms, homeotherms, ectotherms, endotherms, relation between temperature and biological activities, temperature balance; heat production- shivering and non-shivering thermogenesis; brown fat – special thermogenic tissue in mammals, mechanisms of heat loss; adaptive response to temperature- daily torpor, hibernation, aestivation	

	Osmotic and Ionic regulation - osmoregulator, osmoconformers, ionoregulators and ionoconformers, maintaining water and electrolyte balance; ionic regulation in iso-osmotic environment; living in hypo-osmotic and hyper-osmotic environment; problems of living in terrestrial environment: water absorption, saltwater ingestion and salt excretion, salt glands, role of kidney in ionic regulation, metabolic water	
Unit III	Histology	15 Lectures
	Vertical section of skin -Layers and cells of epidermis; papillary and reticular layers of dermis; sweat glands, sebaceous glands and skin receptors.	
	Digestive System <ul style="list-style-type: none"> • Vertical Section of tooth – hard tissue – dentine and enamel; soft tissue –Dentinal pulp and periodontal ligaments, Transverse section of tongue – mucosal papillae and taste buds • Alimentary Canal – basic histological organization with reference to transverse section of oesophagus, stomach, duodenum, ileum and rectum of mammal. • Glands associated with digestive system- histology with reference to transverse section of salivary glands, liver, pancreas 	
	Respiratory organs –transverse section (T.S.) of trachea and lung	
	Excretory system - L.S. of Kidney	
Unit IV	General pathology	15 Lectures
	Infectious diseases: aetiology and its types. Cell injury – causes and types	
	Retgressive changes: Definition, cloudy swelling, degeneration: fatty, mucoid and amyloid (gross and microscopic changes)	
	Necrosis: Definition and causes; nuclear and cytoplasmic changes; Types: Coagulative, Liquefactive, Caseous, Fat and Fibroid. (gross and microscopic changes)	
	Gangrene: Definition and types-dry, moist and gas	

	gangrene (gross and microscopic changes)	
	Disorders of pigmentation: Endogenous: Brief ideas about normal process of pigmentation, melanosis, Inhaled, ingested and injected pigments	
	Circulatory disturbances: Causes and effects of Hyperaemia, Ischaemia, Thrombosis, Embolism, Edema and Infarction	
	Inflammation: Definition and causes, cardinals of inflammation; acute and chronic inflammation	
	Applied pathology and its application: Anatomical, clinical and molecular; investigating methods: biopsy and surgery (for pathological examination of tissue), autopsy, post mortem changes - Algor mortis - body cooling, Rigor mortis - stiffening of limbs, state of decomposition- autolysis (process of self-digestion) and putrefaction.	
	Tumour Pathology- Benin and Malignant	
	Assignment topic- Lab visit and report submission	
RUSZOOP602	PRACTICALS	Credits-03
PHYSIOLOGY, HISTOLOGY AND PATHOLOGY		
1.	Effect of pH on activity of enzyme Acid Phosphatase	
2.	Effect of varying enzyme concentration on activity of enzyme Acid Phosphatase	
3.	Effect of varying substrate concentration on activity of enzyme Acid Phosphatase	
4.	Effect of inhibitor on the activity of enzyme Acid Phosphatase	
5.	Study of separation of LDH isozymes by agarose gel electrophoresis	
6.	To study the effect of enzymes in detergent	
7.	Study of mammalian tissues: a) V. S. of Skin b) V.S. of Tooth c) T.S. of Stomach d) T.S. of Ileum e) T.S. of Liver f) T.S. of Pancreas g) T.S. of Lung	
8.	Identification of following diseases or conditions (from slides or pictures) – Melesma, Vitiligo, Psoriasis, Bed	

	sores, Necrosis, Oedema, Malaria, Filariasis, Leishmaniasis	
9.	Widal's Test	
10.	Study and interpretation of pathological reports: Blood, Urine and Stool (faeces).

Course Title: Toxicology and Computational Biology

Academic year 2021-22

COURSE OUTCOMES:

COURSE OUTCOME	DESCRIPTION
CO 1	After successfully completing the course, the students will be able to: Understand different biological toxins, their good or bad effects on vertebrates, safe level of drugs and dose response relationship and ethical issues in drug toxicity.
CO 2	Understand ethical and philosophical concept of bioethical issues including intellectual property right and the concepts and practices of bioprospecting.
CO 3	Identify drugs of natural origin and their source and comprehend and analyse the method of self-medication and the application.
CO 4	Know different concepts of biostatistics, recognize and give examples of different types of data gathered from public health, clinical studies etc.
CO 5	Choose an appropriate test for comparing two different variables in different populations.
CO 6	Understand existing software which can be used effectively to extract the information from large databases.
CO 7	Identify, formulate and review research literature and the use of construction of the phylogenetic tree.

Detailed syllabus

RUSZOO603	Title: TOXICOLOGY AND COMPUTATIONAL BIOLOGY	Credits- 2.5
Unit I	Basic Toxicology	15 lectures
	Introduction of Toxicology- Brief history, different areas of toxicology, Principles and scopes of Toxicology	
	Toxins and Toxicants <ul style="list-style-type: none"> • Phytotoxins (caffeine, nicotine) • Mycotoxins (aflatoxins) • Zootoxins • Cnidarian toxin • Bee venom • Scorpion venom • Snake venom 	
	Site of exposure: Local reactions of exposure and Routes of exposure	
	Types of toxicity – Acute toxicity, subacute toxicity, sub-chronic toxicity, chronic toxicity, immediate toxicity, delayed toxicity, reversible toxicity, irreversible toxicity, local toxicity, systemic toxicity	
	Concept of LD50, LC50, ED50	
	Dose Response relationship <ul style="list-style-type: none"> • Individual/ Graded dose response • Quantal dose response • Shape of dose response curves • Therapeutic index • Margin of safe Dose translation from animals to human – Concept of extrapolation of dose • NOAEL (No Observed Adverse Effect Level), Safety factor, ADI (Acceptable Daily Intake) 	
	Basics of Regulatory toxicology <ul style="list-style-type: none"> • OECD guidelines for testing of chemicals (an overview) • CPCSEA guidelines for animal testing center • Ethical issues in animal studies • Animal models used in regulatory toxicology studies • Alternative methods in toxicology (in vitro test) 	
Unit II	Bioethics, Bioprospecting and Zoopharmacognosy	15 Lectures

	Bioethics <ul style="list-style-type: none"> • Intellectual property rights and patenting • Forms of protection, patents, copyrights, trade secrets, trademarks, patenting biological materials, live forms, genes and DNA sequences 	
	Bioprospecting <ul style="list-style-type: none"> • Traditional, modern bioprospecting • Chemical prospecting • Genetic prospecting • Bionic prospecting • Economic value and benefit sharing • Bioprospecting and conservation, pros and cons of bioprospecting 	
	Zoopharmacognosy <ul style="list-style-type: none"> • Definition, history and types • Self-medication and its mechanism • Methods of self-medication through - Ingestion – ants and mammals, Geophagy – invertebrates and birds • Absorption and adsorption • Topical application – birds and mammals • Applications of zoopharmacognosy - Social and trans generational zoopharmacognosy, Value to humans. 	
Unit III	Biostatistics	15 Lectures
	Probability Distributions - Normal, Binomial, Poisson distribution, Z-transformation, p-value, Probability - Addition and multiplication rules and their application	
	Measures of Central Tendency and Dispersion - Variance, standard deviation, standard error	
	Parametric and non-parametric tests - Parametric tests: two-tailed Z-test and t-test, Non-parametric test: Chi-square test and its applications	
	Regression and Correlation - Simple linear regression: main features, applications, Correlation coefficient and its significance	
	Testing of Hypothesis: Basic concepts, types of hypothesis: Null hypothesis and Alternate hypothesis Levels of significance and testing of hypothesis	
Unit IV	Bioinformatics	15 Lectures

	Introduction to Bioinformatics and Bioinformatics web resource (NCBI, EBI, ExPASy, OMIM, PubMed, OMIA)	
	Applications of Bioinformatics	
	Databases – Tools and their uses	
	Biological databases: Primary sequence databases: Nucleic acid sequence databases (GenBank, EMBL, EBI, DDBJ) Protein sequence data bases (UniProtKB, PIR, PDB)	
	Secondary sequence databases: Derived databases - PROSITE, BLOCKS	
	Sequence alignment methods <ul style="list-style-type: none"> • BLAST, FASTA • Significance of sequence alignment • Pairwise sequence alignment (Needleman & Wunsch, Smith & Waterman methods) • Multiple sequence alignment (PRAS, CLUSTALW) 	
	Predictive applications using DNA and protein sequences <ul style="list-style-type: none"> • Evolutionary studies: Concept of phylogenetic trees, Parsimony and Bayesian approaches, synonymous and non-synonymous substitutions, convergent and parallel evolution • Pharmacogenomics: concept and applications • Protein Chips and Functional Proteomics: Different types of protein chip, detecting and quantifying; applications of Proteomics • Metabolomics: Concept and applications 	
RUSZOOP603	PRACTICALS	Credits-03
Toxicology and Computational Biology		
1.	To calculate LC-50 value of the given toxicant.	
2.	To study the effect of paracetamol on the level of enzyme activity in liver on aspartate and alanine amino transferase (in vitro approach)	
3.	Study of Zoopharmacognosy with reference to Chimpanzees, African Elephants, Wild Boars and Parrots.	
4.	Following biostatistics practicals will be done using data analysis tool of Microsoft Excel: <ol style="list-style-type: none"> a) From the given data derive mean, 	

	standard deviation b) Correlation, regression analysis using given data c) Problems based on Z test d) Problems based on t test e) Problems based on Chi square test f) Problems based on ANOVA	
5.	Exploring the integrated database system at NCBI server and querying (Querying a nucleotide sequence, querying a protein sequence, use of operators)	
6.	Exploring tools on ExPASy (Querying a nucleotide sequence, querying a protein sequence, use of operators)	
7.	Exploring BLAST tool (nucleotide sequence comparison)	
8.	Exploring Uniprot tool (protein sequence comparison)	
9.	Exploring bibliographic database PubMed (Data mining - Downloading a research paper on subject of interest, use of operators)	
10.	Case study (Assignment- Based on Unit II)

Course Code: RUSZOO604

Course Title: Environmental Biology and Entomology

Academic year 2021-22

COURSE OUTCOMES:

COURSE OUTCOME	DESCRIPTION
CO 1	After successfully completing the course, the students will be able to: Understand the natural resources, their management, laws governing environment and International treaties and conventions in environment protection.
CO 2	Understand the different methods of wildlife conservation and analyse about threats to wildlife.
CO 3	Apply their knowledge and undertake the wildlife habitat projects for animal protection and create awareness about Wildlife Conservation.
CO 4	Understand and compare between different Zoogeographical realms.
CO 5	Interrelate between different environmental conditions and the fauna found in different zoogeographical areas.
CO 6	Correlate the role of useful and harmful insects in human life and gain knowledge about its applications in diverse fields.
CO 7	Understand the scope and importance of Entomology.

Detailed syllabus

RUSZOO604	Title: ENVIRONMENTAL ZOOLOGY AND ENTOMOLOGY	Credits- 2.5
Unit I	Environment management	15 lectures
	Natural resources, their classification, modification and exploitation: Forest resources, water resources (surface and ground), mineral resources, food resources, energy resources: Renewable and non-renewable resources, Impact on climate, flora, fauna & mineral resources.	
	Concept of Carbon Audit, Carbon foot-printing and its application	
	Waste Management: 3 Rs (Reduce, Reuse & Recycle) of solid waste, e-waste, hazardous waste	
	Water management: Rain water harvesting, watershed management, effluent treatment, recycling plants, control and treatment of water	
	Laws governing environment (Environment Protection Act), Air (Prevention and Control of Pollution) Rules - 1982, Water (Prevention and Control of Pollution) Rules - 1978, Hazardous Wastes (Management and Handling) Rules - 1989. EIA (Environmental Impact Assessment), ISO18001	
	Role of government, NGOs, International treaties and conventions in environmental protection & conservation	
Unit II	Wildlife Management	15 lectures
	Threats to wildlife- Diseases (zoonosis and reverse zoonosis), hunting, poaching, Habitat loss (encroachment and deforestation), tourism, overgrazing, human animal conflict and climate change.	
	Techniques and methods of wildlife conservation Wildlife Census, conservation of wildlife - frozen zoo, schedules, rules, national and international conservation bodies; IUCN UNDP, FAO, ESA, INCPEN, CITES, CEEDS,WWF.	
Unit III	Zoogeography and ethology	15 lectures
	Introduction • Origins of Ocean and continents.	

	<ul style="list-style-type: none"> • Plate Tectonics and continental drift. 	
	Distribution of animals in space and time <ul style="list-style-type: none"> • In-Space –Horizontal and superficial • In Time geological or durational • Patterns of animal distribution –Continuous, discontinuous, isolation and bipolarity • Theories of animal distribution. 	
	Barriers of distribution animals – <ul style="list-style-type: none"> • Topographic, climate, vegetative, large water masses, land mass, lack of salinity and special characteristics habits like homing, instincts etc. • Means of dispersal – land bridges, natural rafts and drift wood, favouring gales, migration by host, accidental transportation and by human agencies. 	
	Zoogeographical realms <ul style="list-style-type: none"> • Palearctic • Ethiopian • Oriental • Nearctic Australian • Neotropical and Antarctic. 	
	Applied Animal Ethology: <ul style="list-style-type: none"> • Types of behaviours • Physiological basis of behaviour • Ecological basis of behaviour and behavioural adaptation • Behaviour and evolution • Animal training and companion animal 	
Unit IV	General Entomology	15 Lectures
	Introduction, Importance & Scope of Entomology, Branches of Entomology: Definition, distinguishing features of insects, harmful and useful insects, Agricultural, Medical, Forest, Forensic & Industrial	
	General body structure of insects: <ol style="list-style-type: none"> a) Head - Mouth parts: cutting, chewing, lapping, sucking, sponging. b) Thorax – Structure and modification of wings, Modification of legs and wings in insects - e.g. honey bee, cockroach, beetle c) Abdomen 	
	Metamorphosis in insects -Definition, types, hormones	
	Insect Communication: Definitions, types, significance <ul style="list-style-type: none"> • Insect pheromones • Bioluminescence • Sound production 	

	Significance of insects as biological tool: Biological weapon; tissue culture; gene study; Productive insects - honey bee, silk worm, lac insect; insect products; insects pests (general): bollworm, rice weevil, <i>Tribolium sps</i> , flour moth, locust Assignment – Insect mouth parts and legs	
RUSZOOP604	PRACTICALS	Credits-03
Environmental Zoology and Entomology		
1.	To estimate phosphate phosphorus from sample water.	
2.	To estimate COD, BOD from sample water.	
3.	To estimate Nitrite Nitrogen and Nitrate Nitrogen from sample water.	
4.	To study the intensity of sound by Decibel meter.	
5.	To study acidity and alkalinity of sample water by methyl orange and phenolphthalein.	
6.	To observe the animals in the chart and place them in endangered, vulnerable category.	
7.	Indicate the distribution of genus/species/subspecies in the given world map with respect to its realm and comment on the pattern of distribution.	
8.	Indicate the realms and the fauna found in that realm on the given world map, justify.	
9.	To study different types of mouth parts: cutting, chewing, lapping, piercing and sucking, sponging Mounting of thoracic appendages-legs and wings (housefly, mosquito, cockroach)	
10.	To study metamorphosis in insects: ametabolic - lepidoptera, hemimetabolic - cicada, holometabolic - butterfly, mosquito.	
11.	To study mechanism of bioluminescence in insects. Insect pests and control: rice weevil, flour moth, aphids, tribolium	
	Report-Wildlife

MODALITY OF ASSESSMENT (T.Y.B.Sc.)

A] Internal assessment - 40%: 40 marks

Sr. no.	Evaluation type	Marks
1.	One class test (Multiple choice questions)	20
2.	Two Assignments/ Case study/ Group Discussion	20
	TOTAL	40

B] External examination - 60%

- Semester End Theory Assessment = 60 Marks**

* (Deviation from the usual modality)

Owing to the pandemic situation prevailing in 2020 and continuing in 2021, the external examinations (Semester End) may be conducted online as per the instructions/circulars received from the University of Mumbai and Maharashtra State notifications from time to time. The conventional mode of external examination will commence again only after the declaration of normalcy by the Government authorities.

- Duration – These examinations shall be of **two hours** each paper.
- Paper Pattern: All questions shall be compulsory with internal choice within the questions.

Paper pattern

Questions	Options	Marks	Questions on
Q.1) A, B, C	Any 2 out of 3	12	Unit I
Q.2) A, B, C	Any 2 out of 3	12	Unit II
Q.3) A, B, C	Any 2 out of 3	12	Unit III
Q.4) A, B, C	Any 2 out of 3	12	Unit IV
Q.5) a, b, c, d, e	Any 3 out of 5	12	All Units
	TOTAL	60	

Practical Examination Pattern:

(C) Internal Examination

Heading	Practical
Journal	05
Lab Participation	05
Lab work/ Field report/ Presentation	10
Total	20

(D) External (Semester end practical examination)

Particulars	Practical
Lab work and / or <i>Viva voce</i>	30
Total	30

PRACTICAL BOOK/JOURNAL

The students are required to present a duly certified journal for appearing at the practical examination, failing which they will not be allowed to appear for the examination.

In case of loss of Journal and/ or Report, a Lost Certificate should be obtained from Head/ Co-ordinator / In charge of the department; failing which the student will not be allowed to appear for the practical examination.

Overall Examination and Marks Distribution Pattern

Course	501/601		502/602		503/603		504/604		Total per Course	Grand Total
	Internal	External	Internal	External	Internal	External	Internal	External		
Theory	40	60	40	60	40	60	40	60	100	400
Practicals	20	30	20	30	20	30	20	30	50	200
